Education

University of California, San Diego

Sep. 2021 – Jun. 2025

B.S. in Mathematics Computer Science; Data Science and Business Econ Minor; GPA: 3.80

San Diego, CA

Relevant Coursework

- Machine Learning, Deep Learning, Probabilistic Reasoning, Neural Networks
- Data Structures, Algorithms Analysis, Software Engineering, Systems Programming
- Data Systems, Big Data Analytics, Database Management Systems
- Graph Theory & Algebra, Computability Theory, Optimization

Experience

Convoloo.com

Jan 2025 – Present

Software Development Engineer Intern

San Diego, USA

- Built an AI-powered story generation MVP with user-driven character, theme, story content, and visuals using DALL·E-3, optimizing memory handling for multi-page visual storytelling.
- Built an interactive web application using Streamlit, improving UI/UX for AI-driven content creation.
- Explored LangChain for AI workflow automation, enhancing generative AI capabilities in application development.

UC San Diego Health

Sep 2024 – Present

Hepatology Research Assistant in Artificial Intelligence

San Diego, CA

- Developed real-time deep learning models for automated liver segmentation in quantitative ultrasound (QUS) imaging, optimizing workflow for MASLD analysis.
- Integrated newly acquired liver ultrasound data into the existing dataset, ensuring compatibility for multi-class segmentation by adjusting label encoding and preprocessing pipelines.
- Implemented multi-region segmentation of the liver and abdominal wall, improving QUS parameter estimation for hepatic fat quantification.

Hainan Current Culture Media Co., Ltd.

July 2023 – Sep 2023

Software Developer Intern

Beijing, China

- Developed interactive math tutorials with Python Manim, creating educational animations to enhance visualization
- Collaborated to design user-friendly interfaces for an educational platform, improving accessibility and engagement
- Optimized rendering and animation processes, building reusable code to reduce load times and enhancing performance
- Assisted in integrating math visualization components into a web app, enhancing interactivity and responsiveness

Projects

Simple To-Do List App | *PHP, React, JavaScript, SQL, HTML, CSS, Python*

January 2025

- Developed a to-do list web app where users can add, edit, delete, and mark tasks as completed with persistent storage.
- Built a PHP backend with MySQL for storing tasks, implementing secure CRUD operations and form handling.
- Designed a responsive frontend using React, integrating RESTful API calls to dynamically update routine and tasks.
- Implemented Python scripts for automated database backups.

Banking App with Finance Management Dashboard | *Next.js, TypeScript, Plaid API, ShadCN, Git*

October 2024

- Developed a financial management dashboard with Next.js for real-time transaction insights across linked bank accounts
- Integrated Plaid and Dwolla APIs for secure bank linking, transaction display, and seamless fund transfers
- Developed reusable components using ShadCN, including forms, sheets, and tables, to streamline user interactions
- Configured Appwrite for backend functions including handle user authentication, data storage, and API management

Note Taking App | *React, JavaScript, HTML, CSS, Git*

September 2024

- Developed a dynamic note-taking app using React, enabling users to create, edit, and organize notes with custom labels
- Implemented a favorite system for marking and unmarking notes as favorites, with real-time updates to the favorite list
- Styled the app using CSS and managed state with React hooks to ensure a responsive and user-friendly interface

Technical Skills

Languages: Python, Java, C++, HTML, CSS, JavaScript, SQL, Bash, TypeScript, PHP

Developer Tools: VS Code, IntelliJ IDEA, Docker, GitHub Desktop, Jupyter Notebook, Colab, Xcode

Technologies/Frameworks: Linux, GitHub, Git, JUnit, React, Node.js, TensorFlow, Keras, Pandas, NumPy,

Scikit-Learn, Manim, MongoDB, MySQL, PostgreSQL, SQLite
