

Clement Ukwishaka

SQL Server Database Administrator

Houston, Texas 77084 | +1 (713) 277-4169 | clementukwishaka110@gmail.com | www.linkedin.com/in/clement-ukwishaka

PROFESSIONAL SUMMARY

SQL Server Database Administrator with over 6 years of experience managing enterprise-level database infrastructures. Proven expertise in designing and implementing high availability (HA) and disaster recovery (DR) solutions, including Always On Availability Groups, failover clustering, replication, log shipping, and mirroring. Adept at performance tuning, query optimization, and indexing strategies to enhance database efficiency. Skilled in cloud-based database administration using Azure SQL Database and Azure Security Center. Strong background in ETL processes, SSIS, SSRS and automation using PowerShell. Experienced in ensuring database security, compliance, and governance through encryption, auditing, and role-based access control. A strategic thinker with excellent problem-solving skills, a proactive approach to risk mitigation, and a history of optimizing database environments for high performance and scalability.

TECHNICAL SKILLS

- Database Administration: SQL Server (2008R2–2022), Azure SQL Database, Always On, Failover Clustering, Replication, Log Shipping, Mirroring, Contained Databases
- Performance Tuning & Optimization: Execution Plans, Index Tuning, Query Store, SQL Profiler, Extended Events, Database Engine Tuning Advisor (DTA), SentryOne, SolarWinds (DPA)
- Disaster Recovery & High Availability: Backup/Restore Strategies, Point-in-Time Recovery, DR Planning, Log Shipping, SQL Sentry, Redgate
- Cloud & Security Management: Azure Data Studio, Azure VMs, Active Directory, Data Encryption, MFA, Access Controls, Database Auditing
- Business Intelligence & ETL: SSIS, SSRS, Power BI, ETL Pipelines, Data Extraction, Transformation, and Load
- Automation & Scripting: PowerShell, Data Migration Assistant, ServiceNow, VMware, Hyper-V, Azure Storage Explorer, Spotlight, Visual Studio

PROFESSIONAL EXPERIENCE

SQL Server Database Administrator

Universal Engineering Services | July 2022 – Present

- Designed and implemented HA/DR solutions, including Always On Availability Groups, failover clustering, and log shipping, ensuring 99.99% database uptime.
- Spearheaded migration of on-prem SQL databases to Azure SQL Database and Managed Instances, reducing infrastructure costs by 30%.
- Optimized database performance, achieving a 70% improvement in query execution speed and reducing system lag.
- Optimized complex queries, index strategies, and database tuning, leading to 40% improvement in query execution times.
- Developed and automated backup and recovery strategies, successfully minimizing data loss risks and achieving a zero-downtime recovery framework.
- Led SQL Server upgrades and migrations from 2012 to 2022, including security patching and performance enhancements.

- Configured and maintained SQL Server security policies, implementing TDE, Always Encrypted, MFA, and Data Masking, ensuring compliance with regulatory requirements.
- Collaborated with cross-functional teams to design and implement data warehousing solutions, utilizing SSIS, SSRS, and Power BI for business intelligence reporting.
- Automated administrative tasks using PowerShell scripting, reducing manual effort by 50% and improving database management efficiency.
- Provided 24/7 on-call support, troubleshooting critical performance issues and maintaining system stability.

SQL Server Database Administrator

Terracon Consultant, Inc. | May 2018 – June 2022

- Led the upgrade and consolidation of SQL Server environments, reducing operational overhead and improving database performance by 35%.
- Implemented query tuning techniques, optimizing stored procedures and indexing strategies to improve transaction speeds.
- Designed replication and mirroring solutions to ensure seamless data synchronization across distributed systems.
- Managed database security policies and audits, enforcing role-based access control (RBAC), database encryption, and logging mechanisms.
- Developed robust ETL pipelines using SSIS, streamlining data integration processes between multiple sources.
- Scheduled Full, Differential, and T log backups for users and system databases using SQL Agent.
- Provided training and mentorship to junior DBAs, fostering a strong technical team.

Helpdesk Analyst

Terracon Consultant, Inc. | Jan 2016 – Apr 2018

- Delivered technical support and troubleshooting for database connectivity issues and application performance concerns.
- Managed ServiceNow ticketing system, resolving database-related service requests efficiently.
- Assisted in the installation, configuration, and maintenance of database servers, gaining foundational experience in SQL Server Administration.

RECENT PROJECTS

- **SQL Server Cloud Migration:** Migrated 300+ on-premises SQL Server databases to Azure SQL Managed Instance, improving scalability and reducing operational costs.
- **Enterprise Performance Optimization:** Implemented query tuning, index rebuilding, and partitioning, leading to a 60% improvement in system response times.
- **Disaster Recovery Planning:** Designed and tested failover strategies, reducing potential downtime during DR events by 85%.
- **Security & Compliance Implementation:** Strengthened data encryption, auditing, and access controls, ensuring compliance with GDPR and HIPAA.

EDUCATION & CERTIFICATIONS

- **Bachelor of Computer Science** | Catholic University of Eastern Africa – Nairobi, Kenya | 2018
- **SQL Server Administration Training** | KiawiTechIT Academy, Houston, TX
- **Microsoft Certified: Azure Database Administrator Associate (AZ-104)** - In Progress
