EXECUTIVE SUMMARY

Results-oriented Project Manager with 12+ years of experience leading cross-functional teams on complex, multi-million-dollar strategy, compliance, data science, and construction projects. Skilled in aligning programs with business goals and managing enterprise portfolios through strategic planning and risk mitigation. Highly adaptable to many industries. Known for leading with clarity, resolving ambiguity, and mentoring teams to provide a lasting impact.

PROFESSIONAL EXPERIENCE

Senior Project Manager – Strategy, Compliance, Program Management, Vermont 01/2022 – 10/2025
Department of Homeland Security / U.S. Citizenship & Immigration Services

- Program and Portfolio Management: Leads enterprise level programs consisting of interdependent strategic initiatives, with direct alignment to business and operational outcomes across 20+ stakeholder groups.
- Projects: Leads all aspects of planning and execution, including intake, feasibility, priority setting, scoping, scheduling, budget control, stakeholder engagement, and risk mitigation to ensure on-time and compliant delivery.
- Risk and Issue Management: Established and maintains master program plans, including dependency mapping, risk/assumption/issue management frameworks, and phased rollout strategies to ensure readiness.
- Enterprise Business Analysis: Develops business cases, executive briefings, and proposals to support investment and prioritization decisions.
- Stakeholder Management: Maintains strong bonded working relationships with stakeholders to continually manage expectations, shift priorities, and transparently address concerns.
- Learning and Development: Provides consultative coaching and mentoring to project managers, offering PMO best practices and consistent application of PMI/PMP principles.
- Continuous Improvement: Review existing operations and implement innovative process to generate new ideas and ensure CI outcomes are delivered.
- Culture of Innovation: Developed automated workflows using Python, SQL, Power BI, and Tableau to save Business Analysts 6 hours of work per week. Always open to new ideas and suggestions for effective and efficient processes, operations, and workflows.
- Program Governance: Develops key measures, key controls, and performance KPIs to demonstrate the value of the program and show impact through storytelling and dashboards.
- Control Governance: Creates formal change control processes to manage scope changes and mitigate downstream risks throughout the program lifecycle.
- Resource Management: Negotiates and manages deployment of program resources and budgets, providing forecasts and presenting variances with narrative and review points to ensure effective utilization.

Operations Research Analyst, Vermont
Department of Homeland Security

04/2020 – 01/2022

- Big Data Analytics: Regularly uses data analysis and statistical methods to understand relationships and test hypotheses, including linear regression, ANOVA, standard deviation, t-test, and Z-test using R, Python, and SQL.
- Dashboards: Designed and launched visual analytics platforms using Power BI, Tableau, Python, and SQL to support cross-functional decision making, storytelling, and program KPIs.

- Leadership: Drove data-centered decision-making by presenting technical findings in clear, non-technical language to executive stakeholders across DHS.
- PII and HIPAA: Supported enterprise-level data compliance and regulatory reporting via the DHS Vaccine Status System in a client-facing role. Conducted in-depth data analysis, identifying improvement areas, and offering strategic recommendations.

Project Manager – Site Acquisition, Space Design, Construction, Williston, VT 02/2013 – 04/2020
Department of Homeland Security

- Leadership: Led concurrent \$1M–\$25M commercial construction projects, overseeing all phases from site selection, design and engineering through construction build-out and closeout.
- Business Alignment: Made critical decisions on site planning, vendor coordination, space design, and construction execution to ensure alignment with agency goals.
- Cost Estimating and Control: Developed a cost estimation tool using RSMeans data and regional modifiers, improving budgeting accuracy and planning efficiency. Forecasted burn rate and compared to budget, making adjustments as needed.
- Stakeholder alignment: Led cross-functional teams including leasing brokers, architects, engineers, contractors, and DHS stakeholders, ensuring consistent communication and alignment across diverse parties.
- Technical Expertise: Conducted weekly status meetings and walkthroughs, tracking progress, identifying risks, and resolving issues to maintain timeline and budget integrity.
- Value Engineering: Applied value engineering and cost analysis to minimize budget expansion while maintaining design intent and operational needs.
- Complex Schedules: Developed and maintained complex, overlapping contractor schedules.
- Innovation: Implemented Lessons Learned governance to understand what works well and what needs improvement across portfolio of projects to enable continuous process improvement.

Management Analyst, Williston, VT

Department of Homeland Security and HDR, Inc.

06/2008 – 02/2013

- Led full software development lifecycle as Product Owner. Developed and ensured on-time delivery of budget and schedule reports. Tracked and managed lease contract terms. Assisted project managers with quarterly reporting requirements.
