

DIEGO HENRIQUE ESPINDULA MENDES

West Lafayette, IN 47906 | (765) 240-6643 | dhmendes@gmail.com | [LinkedIn](#)

JAVA SOFTWARE ENGINEER

Results-driven software engineer with 20+ years of experience developing scalable enterprise solutions using Java/J2EE technologies. Experience in architecting RESTful APIs, microservices, and distributed cloud systems that serve thousands of users. Remote worker since 2012 with a proven track record of successful collaboration in international teams across multiple industries. Passionate about creating high-performance, secure applications with a focus on code quality and system optimization.

HIGHLIGHTED ACHIEVEMENTS

- Reduced integration errors by 95% and support tickets by 95% through optimization of data synchronization processes
- Improved banking system performance by 35% via code refactoring and database procedure optimization
- Designed distributed microservice architecture supporting 100+ enterprise clients with minimal downtime

TECHNICAL EXPERTISE

- **Backend Development:** Java 8+, Spring Boot, Spring MVC, Jakarta EE, J2EE, RESTful APIs, Microservices, Metabase, BI
- **Database & Caching:** Oracle, PostgreSQL, MySQL, DynamoDB, Redis, SQL query optimization
- **Cloud Infrastructure:** AWS (RDS, Aurora, DynamoDB), Azure, CI/CD pipelines
- **Security & Performance:** Authentication/Authorization systems, Database optimization, Performance tuning
- **DevOps & Testing:** CircleCI, Jenkins, Maven, Git, JUnit, Mockito, Rest Assured, Datadog, Snyk
- **Methodologies:** Agile/Scrum (Certified ScrumMaster), XP, Service-Oriented Architecture

PROFESSIONAL EXPERIENCE

BACKEND JAVA DEVELOPER / SOFTWARE ENGINEER

Cropster | Remote (Innsbruck, Austria based) | 05/2023 – 01/2025 - Cloud-based software solutions for the coffee industry serving users worldwide

- Architected and developed scalable microservices using Java 11+, Spring Boot, and AWS infrastructure

- Optimized database interactions with AWS RDS MySQL Aurora Cluster and DynamoDB, improving query response time by 80% in many cases
- Created data visualization dashboards using Metabase, transforming complex production data into actionable insights
- Collaborated with DevOps to streamline CI/CD pipeline using CircleCI and AWS cloud services
- Implemented comprehensive unit and integration testing with JUnit, Mockito, and Rest Assured

INTEGRATION DEVELOPER / SOFTWARE ENGINEER

Anthology Inc. (formerly Campus Labs & Chalk and Wire) | Remote | 09/2015 – 02/2023 - *Leading provider of higher education assessment and learning technology*

- Led development of high-throughput backend system and APIs serving thousands of educational users
- Designed and built interoperability solutions between core web-based software and various educational tools, increasing client integration options
- Architected microservices-based integration platform supporting 100+ enterprise clients
- Implemented security best practices for authentication and authorization in compliance with educational data privacy standards
- Optimized data synchronization processes, reducing integration errors by 95% and support tickets by 90%
- Maintained backward compatibility while implementing new features across multiple product versions
- Collaborated effectively in distributed teams across multiple time zones, ensuring seamless communication and project delivery

SYSTEMS ENGINEER

Varonis | Remote (South Region, Brazil) | 05/2012 – 07/2015 *Data security and analytics*

company

- Designed secure system architectures integrating Varonis products into enterprise environments
- Analyzed customer security requirements and delivered technical solutions integrating with existing infrastructure
- Implemented data security protocols and monitoring systems in compliance with regional regulations
- Contributed to 100% regional sales growth through effective technical demonstrations and custom solution design
- Created detailed technical documentation and solution architecture proposals for enterprise clients

SENIOR JAVA DEVELOPER

GVT | Curitiba, Brazil | 10/2011 – 05/2012 *Telecommunications company*

- Developed scalable web-based content management applications using JEE (EJB 2, 3)
- Integrated applications with Weblogic Portal and Weblogic Application Server
- Designed and implemented RESTful web services and optimized database interactions

SOFTWARE DEVELOPER - TEAM LEADER JAVA

HSBC | Curitiba, Brazil | 08/2006 – 10/2011 *Global banking and financial services organization*

- Led development team for investment portal, internet banking, and financial systems handling millions of transactions
- Architected and implemented systems integration for compliance with Brazilian financial regulations
- Successfully delivered Customer Data Management system consolidating data from multiple sources
- Optimized database procedures and application code to improve system performance by 35%
- Implemented continuous integration practices using Ant, Maven, and Hudson (Jenkins)
-

EDUCATION

Pontifical Catholic University of Paraná | Curitiba, Brazil System Analyst Bachelor's Degree (2002 - 2005)

Federal University of Technology - Paraná | Curitiba, Brazil Technician in Mechanics (1998 - 2001)

CERTIFICATIONS

- CSM – Certified ScrumMaster
- IBM Certified Solution Developer - IBM WebSphere Portal V6.0
- IBM Certified Solution Designer - Rational Software Architect
- IBM Certified Associate Developer - Rational Application Developer for WebSphere Software V6.0
