

Daeil Kang

Bellevue, WA USA 98006
Email: kangdi68@gmail.com

Highlights

- QA with Manual and Automation and SDLC/STLC for 15 years with extreme attention to detail.
- Java/Python and C#/JavaScript, TestNG, Junit, Pytest, Appium, CI/CD using YAML in GitHub, PyCharm, Eclipse, Xcode, Android Studio, Git, GCP, Jira, testRail, allure, JSON, XML, html/CSS/DOM, TCP/IP, HTTP, selenium/Web driver, Selenium grid, Page Object Model, JWT, iperf, Charles ADB, BrowserStack/AWS/SauceLab/LambdaTest, Wireshark, MySQL, Curl, SIP, IMS, GPS, shell script for Linux/Unix/Windows, Android/iOS, openCV, REST API, Postman, Playwright, wireless(3g/4g/5g, bluetooth, wifi, etc.), embedded system.

Technical Experience

Sr QA Automation Engineer(Chartboost/Zynga, Bellevue,WA) 10/17/2022 ~ 12/13/2024

- Convert to automation from 10% to 80% approximately to increase QA efficiency and eventually company performance.
- Make Python/Pytest appium automation platform for native/webView applications(Ad mediation/monetization/user consent management SDK) on iOS(xcuiTest) and Android(uiAutomator2) devices with Page Object Model
- Implement automation to verify REST API calls with the company's production and staging server
- create automation with BrowserStack cloud testing platforms after researching various device farms like AWS/SauceLab/LambdaTest and apply CI/CD
- Automate making test results for testraais/allure reports and notifying slack channels and updating JIRA and authentication with Firebase
- Add and improve and maintain Pytest automation scripts and also communicate with other QA members and SW development teams to make sure scripts have been implemented correctly to verify the company's advertising and monetization platform.
- Handling JSON/XML files and data
- Code reviews from peer automation developers.
- Create/Improve CI/CD by using YAML pipeline/workflow code in GitHub Actions for test automation.
- Web template automation by using javascript with testCafe
- create/review/modify test plans/cases
- analyze Charles logs and find root causes.

Sr QA engineer(Luxoft, Redmond) 9/1/2020 ~ 10/14/2022

- Continue same role at AT&T

Sr Specialist-product development engineer (AT&T, Redmond,WA) 5/1/2013 ~ 9/1/2020

- Manual Testing device for certifying devices for AT&T services(5G/LTE, Wireshark, bluetooth, wifi, VoIP) with knowledges of IMS/SIP, TCP/IP/ADB, iperf, Wireshark, telecom equipments, VoIP, messaging/WEA, GPS/aGPS etc..
- Launched more than 50 devices in the market for AT&T services annually after validation
- Audit 3rd party lab for certification for AT&T test plans.(lab and field test)

- UAT on device applications(iOS and android)
- Create Java application handling device inventories by using database(MySQL)
- test instrumentation, including power supplies, call boxes, and GPS simulators.
- Log analysis by capturing pcap, QXDM, logcats, etc and find root causes.
- create/review/modify test plans/cases
- Creating automation platform and tool for QA to increase QA efficiency
 - Appium automation with Java/TestNG
 - Selenium grid with JSON configurations for test platform
 - Create a test tool with C# from scratch by using AT commands with devices.
 - R&S/Spirent automation scripts, etc..
 - Python scripts for Android security analysis and making reports automatically (processing big data extracted from Android device and making reports like excel sheets automatically)

Software test Engineer(Newbay software/Synchronoss, Seattle,WA) Mar.2010~Jan.2013

- Testing application software on various handsets
- Debugging application/platform for Newbay cloud services.
- Implementing automation tool on Android (junit/Robotium)

Senior Engineer(Samsung, Korea/Bellevue, WA) Aug 1995~ July 2009

- Field test and log analysis for root cause analysis to debug issues.
- Software development by using Assembly language with equipment like oscilloscope, logic analyzer, etc on embedded system with micro-controllers, DSP and UI/applications development on TDMA/GSM/EDGE/GPRS products by using C language

Education and training

- Master's degree in Electronics Feb.1995
Kyung-buk University, Daegu, Korea.
- Bachelor Degree in Electronics Feb.1993
Kyung-buk University, Daegu, Korea.
