

Darshan Nayak | Full Stack Developer

Location: Rhode Island, USA | Mail: nayakdarshan984@gmail.com | Ph: 774-955-0601 | [LinkedIn](#)

PROFESSIONAL SUMMARY:

Full Stack Developer with over 4 years of experience designing, developing and deploying scalable and secure applications. Proven ability to optimize performance, enhance security and streamline development processes. Expertise in building microservices architectures, implementing event-driven systems and developing responsive user interfaces. Proficient in Java, Spring Boot, Quarkus, Node.js, Express.js, GraphQL, Apollo Client, Prisma, Kafka, RabbitMQ, Redis, Python, TensorFlow, Machine Learning models, React, VueJS, TypeScript, Redux, Pinia, Material UI, WebSockets, STOMP, Azure DevOps, GitHub Actions, Terraform, JUnit, TestNG, REST Assured, Cucumber, Git, GitHub, Jira, Confluence, MySQL, MongoDB, Spring Security, OAuth2, Jenkins, Docker, Kubernetes, AWS, Angular, HTML5, CSS3 and Bootstrap. Adept at implementing caching strategies, integrating NLP features such as Sentiment Analysis, NER and BERT Transformers and collaborating effectively within Agile teams. Consistently delivers high-quality solutions that meet business objectives and exceed client expectations.

TECHNICAL SKILLS:

Programming Languages: Java 17, Python, TypeScript, JavaScript

Frameworks & Libraries: Spring Boot 3+, Quarkus, React 18+, Redux, Angular, TensorFlow, Next.js, tailwind.css, Django

Databases: MySQL, MongoDB, Redis, Postgres

Backend & API Development: RESTful APIs, GraphQL, Apollo Client, Node.js, Express.js, Node.js, Rust, Redis, TimescaleDB

Machine Learning: Text Classification, Named Entity Recognition (NER), Sentiment Analysis, BERT Transformers

Security & Compliance: Spring Security, OAuth2, SOC 2, PCI DSS, OWASP Top 10

Message Brokers: Kafka, RabbitMQ

DevOps & CI/CD: Jenkins, GitHub Actions, Azure DevOps, Terraform

Containerization & Orchestration: Docker, Kubernetes

Testing & Automation: JUnit 5, TestNG, Mockito, REST Assured, Cucumber (BDD), Jest, React Testing Library

Data Streaming: WebSockets, STOMP

Cloud & Infrastructure: AWS, Azure

Version Control & Collaboration: Git, GitHub, Jira, Confluence

Frontend Technologies: HTML5, CSS3, Material UI, Bootstrap, VueJS, Pinia, Apollo Vue, SolidJS

EDUCATION:

Master of Computer Science - University of Massachusetts Dartmouth, New Bedford, MA, USA

Bachelor of Computer Science - Rajiv Gandhi Proudhyogiki Vishwavidyalaya (R.G.P.V) University in Bhopal, Madhya Pradesh

CERTIFICATION:

[Java Programming: Solving Problems with Software – Coursera](#)

[Algorithmic Toolbox: University of San Diego](#)

[Python 3 Programming – Coursera](#)

PROFESSIONAL EXPERIENCE:

FULL STACK DEVELOPER CITIZENS – RI

Jan 2024 – Present

- Optimized API performance, reducing response time from 250ms to 90ms by implementing GraphQL with Apollo Client, improving data-fetching efficiency by 60%.
- Architected and launched a highly scalable event-driven architecture using Kafka, RabbitMQ and Node.js backends, increasing transaction throughput by 40% while ensuring fault-tolerant message processing.
- Enhanced system performance by implementing advanced caching strategies with Redis, reducing database load by 60% and improving transaction speeds.
- Built high-performance microservices using Java 17, Spring Boot 3+ and Quarkus, enabling rapid API responses and efficient resource utilization.
- Constructed a real-time transaction monitoring dashboard using Next.js, Angular (internal tools), Tailwind CSS and Django REST, visualizing 1M+ daily transactions and reducing alert response time by 55% while boosting fraud detection accuracy by 40%.
- Crafted an AI-powered real-time fraud detection system using Python, TensorFlow and BERT-based NLP models, reducing fraudulent transactions by 45%.
- Ensured compliance with banking security standards such as SOC 2, PCI DSS and OWASP Top 10, successfully passing quarterly security audits.
- Formulated a highly responsive front-end using React 18+, Angular (v10+ in legacy and internal tooling), TypeScript, Redux and Material UI, enhancing enterprise user experience and reducing page load time by 40%.
- Implemented WebSockets and STOMP for live financial data streaming, enabling real-time stock market and portfolio updates.
- Reduced deployment time by 50% by managing CI/CD pipelines with Azure DevOps, GitHub Actions and Terraform, enabling seamless production rollouts.
- Devised and ran automated test suites using JUnit 5, TestNG and REST Assured, improving defect detection rates by 40%.
- Collaborated with product and client-facing teams on early solution design for key enterprise clients, contributing to 3+ successful onboarding projects and improving time-to-deployment by ~25% through clearer technical scoping and aligned delivery plans.
- Leveraged Git, GitHub, Jira and Confluence for version control, issue tracking and project documentation, streamlining collaboration across cross-functional teams.

FULL STACK DEVELOPER BITINFOCOM TECHNOLOGIES - INDIA

Jan 2020 - Dec 2022

- Spearheaded the design and deployment of a microservices architecture that elevated system performance by 30%, leveraging optimized RESTful APIs and seamless GraphQL integration to enhance data retrieval efficiency.
- Fortified application security protocols by integrating Spring Security and OAuth2, resulting in a 99% success rate in user authentication processes, significantly mitigating security risks.
- Streamlined deployment processes by automating CI/CD pipelines with Jenkins and GitHub Actions, which led to a 40% reduction in deployment times and improved release cycles.
- Sculpted and deployed robust database solutions using MySQL and MongoDB, focusing on data integrity, performance optimization and efficient data retrieval strategies.
- Authored comprehensive unit and integration tests using JUnit and Mockito, ensuring high code quality and reliability throughout the development lifecycle.
- Leveraged Docker for effective containerization of applications and utilized Kubernetes for orchestrating microservices, enhancing deployment flexibility and scalability.
- Partnered with DevOps teams to effectively manage AWS resources and streamline application deployments, ensuring high availability and performance.
- Established efficient caching strategies using Redis, significantly enhancing application performance and reducing server load.
