

DAVID WANG

Senior Software Engineer

(239) 497-0797 @ davidsw9228@gmail.com www.linkedin.com/in/ds2wang
Seattle, WA

SUMMARY

Full-stack software engineer specializing in **React, Fluent UI, .NET, Python, Node and Go**, applying **AI/ML and cloud technologies (Azure, AWS)** to deliver scalable enterprise automation.

EXPERIENCE

Senior Software Engineer 04/2020 - Present

Microsoft

- **Developed and scaled Power Automate using React/Fluent UI, Azure/.NET, and Azure AI, enabling intelligent workflow automation for over 10 million active users globally.**
- Built an AI workflow designer using React, TypeScript, and Azure OpenAI to enable natural-language automation and increase creation speed by approximately 40%.
- Integrated AI Builder and Azure Cognitive Services with Python APIs, automating document extraction and reducing manual data entry by about 70%.
- Built a human-in-the-loop validation station in React and Azure Functions that improved model accuracy by 18% for enterprise document workflows.
- Redesigned the approvals interface with React Hooks and Graph API, reducing approval cycle times by 50%.
- Implemented analytics dashboards using React and Power BI Embedded, providing administrators with real-time automation KPIs.
- Refactored backend orchestration with C#/.NET async and Redis Cache, cutting transaction latency from 1.2s to 400ms.
- Automated legacy browser-based interactions using Playwright (Python), reducing manual intervention by 45%.
- Mentored junior and mid-level engineers while driving architectural improvements in Power Automate, resulting in faster feature delivery and cleaner codebases.
- **Engineered Microsoft Dynamics 365 (Web) using React/Fluent UI, Azure/.NET, and X++/AL to deliver AI-driven business automation and insights across enterprise modules.**
- Built CRM and ERP modules using React, .NET APIs, and Azure AI to power forecasting, automation, and omnichannel engagement for 50K+ users.
- Revamped Sales and Finance dashboards with React, Fluent UI, and Redux, boosting workflow efficiency by 35% and enabling real-time analytics.
- Unified dashboards across Sales, Marketing, and Finance using React and OData REST APIs, accelerating decision-making for global clients.
- Automated invoice ingestion via Azure Form Recognizer and Python FastAPI, reducing accounting effort by 65%.
- Collaborated with AI teams to embed Azure Cognitive Services (Text Analytics, Vision) for forecasting, document automation, and intelligent case routing.

Software Development Engineer II 08/2018 - 04/2020

Amazon

- **Developed AWS Educate's web platform using React, Node.js, Python (Flask), and AWS services (EC2, S3, Lambda, DynamoDB) to support 500K+ students and 10K+ educators.**
- Integrated Amazon Lex chatbots and Polly TTS for conversational learning assistants guiding students through AWS concepts.
- Deployed Amazon Rekognition and SageMaker image-classification labs for real ML experimentation.
- Built a gamified badge-tracking dashboard using React and Redux, improving learner retention by 30%.
- Enhanced the Educator Dashboard with React and Python APIs, allowing one-click AWS credit distribution and class content sharing.
- Implemented backend microservices in Node.js and Python on AWS Lambda and API Gateway, automating onboarding and provisioning for over 1 million users.
- Developed real-time lab provisioning for EC2, S3, and VPC exercises via Lambda and DynamoDB, supporting over 200K concurrent sessions.
- Created career-path modules with React and Python, integrating Big Data and AI/ML learning paths aligned with AWS certification tracks.

KEY ACHIEVEMENTS

- ◆ **Microsoft Power Automate**
Enabled AI-driven automation across finance, manufacturing, and public sectors, improving operational efficiency for 10M+ global users.
- ◆ **Microsoft Dynamics 365**
Enhanced CRM and ERP workflows for retail, healthcare, and services enterprises, driving productivity for 50K+ users.
- ◆ **AWS Educate**
Expanded cloud and AI learning access for 500K+ students and educators across technology and academia.
- ◆ **CloudHealth Platform**
Optimized multi-cloud cost and performance analytics, enhancing scalability and reliability of a platform used by Fortune 500 enterprises.

SKILLS

React · Fluent UI · Next.js · Typescript

Node.js · C# · Python · Java · Ruby · Go ·

Graph API · REST APIs · Odata APIs · Redis ·

MySQL · PostgreSQL · Docker · Kubernetes ·

AWS · Azure · Microservices

Applied AI · OpenAI API / GPT Integration ·

Cognitive Services · Azure OpenAI ·

AWS SageMaker / Lex / Polly / Rekognition ·

LangChain / Prompt Engineering

EXPERIENCE

Software Engineer08/2015 - 07/2018

CloudHealth Technologies, Inc.

- Enhanced a leading cloud management platform, enabling enterprises to optimize multi-cloud infrastructure cost and performance using Ruby, Java, MySQL, Redis, and RabbitMQ.
- Improved product stability, scalability, and reliability as a key member of the Platform Engineering Team, contributing to core backend and data pipeline optimizations.
- Quickly identified and isolated failure points of the product and subsequently deployed code to correct or improve upon these failures.

EDUCATION

Bachelor' Degree in Computer Science2011 - 2015

University of Waterloo
