David Yang

Senior Software Engineer — Node.js/ Scalable Backend / DevOps

Senior Software Engineer with over 12 years of professional experience in designing, developing, and deploying scalable, secure, and high-performance backend systems using **Node.js**, **TypeScript**, and modern JavaScript technologies. Skilled in building robust RESTful and GraphQL APIs, architecting **microservices**, and implementing **event-driven systems** on cloud platforms such as **AWS** and **GCP**. Proven ability to lead development teams, collaborate across cross-functional stakeholders, and deliver impactful solutions across diverse industries including **healthcare**, **finance**, and **telecommunications**. Deep understanding of Agile methodologies, DevOps practices, and full SDLC ownership from design to production support.

SKILLS

- ★ **Programming Languages & Frameworks:** JavaScript/TypeScript, Node.js, React, Next.js, Angular, Vue.js, Nest.js, Express.js, Python, C#, .NET Core
- ★ **Backend Engineering:** Restfull APIs, GraphQL, tRPC, Json-RPC, RabbitMQ, Kafka, Stripe, Paypal
- ★ **Frontend Technologies:** TailwindCSS, WebSockets, Styled-components, Emotion, Material UI, Ant Design, Chakra UI
- ★ **State Management:** Redux, Zustand, MobX, Context API, Vuex
- ★ **Databases & ORMs:** PostgreSQL, MySQL, MongoDB, TypeORM
- ★ **DevOps & Cloud Platforms:** AWS (Lambda, S3, RDS, API Gateway, CloudFront), Docker, Kubernetes, GitHub Actions, Jenkins
- ★ **Testing & QA Tools:** Jest, Cypress, Playwright, Puppeteer, Mocha, Vitest, Jasmine, Sentry, PostHog
- ★ **Software Architecture & Patterns:** Microservices, Micro front-ends, Event-Driven Architecture, Flux, MVVM, REST, GraphQL
- ★ **Build & Tooling:** Webpack, Babel, Vite, Git, CI/CD pipelines

EXPERIENCE

Teladoc Health, Purchase, New York — Senior Software Engineer

September 2023 - September 2025 (Full Time)

- ✧ **Architected and delivered a cloud-native telehealth platform using NestJS, Next.js, and AWS**, partnering with executive leadership to align product vision with scalable engineering practices and establish a strong technical foundation for future growth.
- ✧ Designed, implemented, and maintained highly scalable **Node.js microservices** powering Teladoc's patient engagement and monitoring platform.
- ✧ Built and managed APIs for integration with health-tracking devices (Fitbit, Apple HealthKit, Omron) using **TypeScript, Express, and OAuth2**, enabling real-time health data collection.
- ✧ Architected an **event-driven architecture** utilizing **Kafka** and **AWS SNS/SQS**, significantly reducing system coupling and enabling asynchronous processing of medical alerts.
- ✧ Developed a vitals aggregation and anomaly detection engine that proactively flags critical conditions, improving clinical response time by **40%**.
- ✧ Led a project to containerize legacy services and deploy them on **AWS Fargate** and **EKS**, resulting in **60% reduction in deployment complexity**.
- ✧ Collaborated with the compliance team to implement and maintain **HIPAA-compliant audit logging**, token expiration strategies, and secure data transmission protocols.
- ✧ Conducted code reviews, led sprint ceremonies, mentored junior developers, and introduced engineering guidelines to standardize Node.js backend practices across teams.

Rocket Mortgage, Detroit, Michigan — Senior Software Engineer

February 2020 - August 2023 (Full Time)

- ✧ Spearheaded the backend development of Rocket Mortgage's next-gen **Loan Insights Platform**, using **Node.js** and **TypeScript** to build reusable API modules.
- ✧ Developed and maintained over 20 microservices handling sensitive data for credit checks, income verification, document management, and loan eligibility.
- ✧ Led integration projects with Equifax, Plaid, and TransUnion, creating secure, audited APIs for identity and financial validation.
- ✧ Refactored legacy codebases and migrated monolithic components into containerized microservices, improving release frequency by **75%**.
- ✧ Designed and implemented scalable **GraphQL endpoints** to optimize client-server communication and reduce over-fetching.
- ✧ Implemented **centralized logging, monitoring, and alerting** with ELK stack and Prometheus/Grafana, reducing mean time to resolution (MTTR) by **50%**. Conducted performance benchmarking, applying Redis caching and query optimization techniques to enhance throughput.

Rocket Mortgage, Detroit, Michigan — Software Engineer

October 2018 - January 2020 (Part Time)

- ✧ Developed user-facing and internal services supporting underwriting workflows, including document upload services, PDF generation tools, and secure digital signature integrations.
- ✧ Collaborated with UX teams to build internal admin dashboards in React, while maintaining the backend with **Express** and **Knex.js**.
- ✧ Introduced **socket-based communication** for real-time loan status updates, improving transparency for support agents.
- ✧ Automated daily data syncs with third-party financial systems using scheduled cron jobs and AWS Lambda.
- ✧ Contributed to the internal Node.js package library to streamline API client development and request validation.

Binson's Home Health Care, Chicago, Michigan — Software Engineer

Jun 2014 - January 2020 (Full Time)

- ✧ Designed and developed a custom medical billing system using **Node.js**, **Express**, and **MongoDB**, fully integrated with Medicaid and private insurer APIs.
- ✧ Created and enforced **role-based access control** and secure patient data flows to align with HIPAA requirements.
- ✧ Developed a claims validation engine that scanned over 100 rules per entry, reducing insurance rejections by **22%**.
- ✧ Built multiple internal portals (admin, billing, operations) using **React**, connected to secure, scalable Node.js APIs.
- ✧ Led the implementation of centralized logging and monitoring using **Winston**, **Graylog**, and **Prometheus**.
- ✧ Partnered with billing managers to automate reporting workflows using **JasperReports** and **Node cron jobs**.
- ✧ Initiated migration from shared-host deployments to containerized services, increasing development agility.

EDUCATION

✧ **M.S. IN INFORMATION SYSTEMS TECHNOLOGY**

Wilmington University(May 2015 – Oct 2017)

✧ **M.S. IN COMPUTER SCIENCE**

Eastern Michigan University(Apr 2012 – Sep 2014)

✧ **B.S. IN ENGINEERING**

University of Michigan(Jun 2005 – Sep 2010)
