

Deekshitha Mallela

Full stack Java developer

<https://www.linkedin.com/in/deekshithamallela/>

Email: dmallela3@gmail.com

Phone: (214) 557-4369

Location: Irving, TX

Education Details:

Texas Tech University, Lubbock, Texas

Jan 2022 – Dec 2023

Master's in computer science

SUMMARY

- Over **4+ years** of extensive **Java/J2EE Full - Stack Developer** experience in developing **Micro services** and Web Applications.
- Experience in implementing the **micro services** in Web Applications using the frameworks such as **Spring** development for **Java**.
- Experienced in **Hibernate Framework** for the Object Relational Mapping therefore simplifying the Data creation, Data manipulation and Data Access.
- Experienced in web development using **HTML5, CSS3, JavaScript, AJAX** and **jQuery**.
- Working experience in **Core Java** with strong understanding & working knowledge of Object-Oriented Programming and also APIs like **Collections, Multi-Threading, Exception**.
- I have work experience in **Core Java** with a strong understanding and working knowledge of Object-Oriented Programming and APIs like **Collections, Multi-Threading, Exception**.
- Experience in implementing SOA and Web Services using **SOAP, REST**.
- Experience in working with the **NoSQL** Database like **MongoDB** and **Cassandra** to manage extremely large data sets.
- Experience in **SQL, PL/SQL programming, Oracle, MySQL** and **MS SQL Server** and worked on **Stored Procedures & Triggers**.
- Experience in developing project (SDLC) in **Agile** and **Waterfall** methodology.
- Excellent Interpersonal and Communication skills coupled with strong technical and problem-solving capabilities with a can-do attitude.

SKILLS

Programming Scripting Languages	Java 11/8/7,C,Python
Framework and Tools	Spring Boot, Spring MVC, Hibernate, RESTful Webservices, JDBC, JSP, RabbitMQ, Web Forms
Web Technologies	HTML5, XML, DOM, JSON, CSS3, Angular10/8/6, JavaScript, Typescript, jQuery, Bootstrap, React, SOAP API, Restful webservices
Cloud Technologies	AWS, Azure, Kubernetes
Databases	Microsoft SQL Server, MySQL, Oracle, MongoDB, PostgreSQL
IDE Tools	Eclipse, Visual studio code, Jenkins, Confluence, Docker
Version control system	GitHub, Git kraken, Jenkins, SVN, Visual Studio
Testing Tools	Selenium, Apache JMeter, SoapUI
Distributed Systems	Kafka
Project management tools	JIRA, ServiceNow, Bit Bucket

EXPERIENCE

Discover, USA

Feb 2023 - Present

Full stack developer

- Involved in analysis, design and development phases of **Software Development Life Cycle (SDLC)**.
- Developed application using new features of **Java 11 annotations, Lambda expressions** for adding functionality processing capability and **Stream API** to facilitate **pipeline** processing and used **Filter** method to eliminate elements based on the criteria.
- Used **Java 11** features in developing code like Lambda expressions, creating resource classes, fetching documents from database.
- Involved in developing a **Micro Service Architecture** application utilizing **Spring Boot**.
- Used **Spring Boot** at back end which helps to develop applications with ease.
- Implemented **REST** based **Micro services** to provide all the **CRUD** capabilities using **Spring Boot**.
- Proficient in handling various HTTP status codes and error responses to ensure robustness and reliability of **RESTful** services.
- Expertise in versioning **REST** APIs to manage changes and ensure backward compatibility with clients.

- Used complete annotation driven approach to develop the application using **Spring Boot** and was involved in setting up the spring bean profiling.
- Involved in developing data models using **Hibernate** Object relational mapping (**ORM**) framework and used **Hibernate Annotations** to reduce time at the configuration level.
- **HTML5, CSS3** was used to design web pages on client side and **Bootstrap** was used to make the pages more responsive.
- Developed **Kafka** producers and consumers to enable real-time data streaming for processing and analysis.
- Configured **Kafka** clusters for high availability, scalability, and fault tolerance, ensuring reliable message delivery.
- Proficient in designing and implementing **Kafka** producers to publish real-time data streams across distributed systems.
- Worked on **Angular.JS** which combines web applications with Model View Controller capability to make development and testing of code efficient.
- Developed and maintained Single Page Applications (SPAs) using **Angular**
- Proficient in **Angular** core concepts like modules, components, services, and dependency injection
- Implemented a complex data visualization dashboard using **Angular** charts and data binding techniques
- Optimized the performance of a large **Angular** application through code splitting and lazy loading
- Designed configuration **XML Schema** for the application and used **JavaScript** for the client-side validation.
- Implemented **Micro Services** using **PCF** (Pivotal Cloud Foundry) platform built upon **AWS**.
- Managed **AWS** (Amazon Web Services) like **EC2, S3** bucket, **Auto-Scaling, SNS** and **SQS**.
- Worked on creation of custom **Docker** container images, tagging, and pushing the images.
- Implemented end-to-end **CI/CD** pipelines for multiple software projects, streamlining development and deployment processes.
- Monitored and maintained **CI/CD** pipelines, identifying and resolving issues promptly to ensure continuous delivery.
- Used **Test-Driven Development** technique and implemented test cases using **JUnit**.
- Used **Jenkins** for continuous integration and continuous deployment.
- Constructed **REST** and **SOAP** web service work as an interface to collect verification information from external system like user data using **JAX-RS**.
- Created collections and performed CRUD operations on **MongoDB** and used **mongo Repository**.
- Wrote complex business logic using **PL/SQL** Packages, stored procs and **SQL queries**.
- Experienced in designing data models for **Cassandra**, utilizing its **NoSQL**, columnar database structure to optimize data storage and retrieval for high availability and scalability.
- Followed **Agile** process throughout development lifecycle and developed the application as per the coding standards.
- Developed and implemented Behavior-Driven Development (**BDD**) frameworks using tools like Cucumber to collaboratively define and automate acceptance criteria.

Environment: Java 11, spring, MVC, Spring Boot, Hibernate, Micro Services, REST, Bootstrap, HTML5, CSS3, JavaScript, Angular 6, Angular.JS, AJAX, AWS, Docker, Jenkins, JUnit, SOAP, MongoDB, SQL, Agile.

Centene Corp ,India
Full stack developer

Feb 2021 - Dec 2021

- Designed the application using J2EE design patterns and technologies based on **MVC architecture**.
- Developed Informant service layer by using **Spring MVC**.
- Created **Spring MVC** components like configure Request mapping annotation controllers, view resolver components.
- Developed **REST** web services using **Spring Boot** to extract and concise the data from the database.
- Used **React flux** to polish the data and for single directional flow.
- Experienced in integrating third-party libraries and APIs into **React** applications for enhanced functionality.
- Skilled in implementing accessibility features and best practices to ensure inclusivity in **React** applications.
- Developed the **micro services** on **Spring Boot** and **Spring Data JPA** with Caching frameworks.
- Used **Spring Boot** which is radically faster in building **Micro services** and develop Spring based application with very less configuration. Developed **Micro services** using **RESTful** services to provide all the **CRUD** capabilities.
- Developed **session, entity & message driven beans**, mapping of Java Objects to Database Tables using **Hibernate**.
- Developed the User Interactive web pages in a professional manner with using web technologies like **HTML5, XHTML**, and **CSS3** as per company's standards.
- Used **Angular 6** to create a Single Page Application (SPA). Enhanced application performance by **Angular 6** Component based development in view of future **Angular framework** transitions.
- Developed complete checkout process using different **Angular.js** modules and services by using dependency injection for creating controllers.
- Integrated **Kafka** with Apache Spark for stream processing and with Elasticsearch for real-time indexing and search capabilities.
- Implemented comprehensive logging and auditing using **Spring Security** features to monitor and trace security-related events within the application.
- Develop **Docker** based micro services deployment modules with **Jenkins** based **pipelines/frameworks**.
- Performed unit testing using **JUnit**, integration and deployment of applications done using tools such as **Maven**.
- Written **SQL** queries **PL SQL** Stored procedures, functions, triggers, cursors, sequences, and indexes, which are going to be invoked by Batch processes.
- Worked on **Agile, SCRUM** development methodology and built the application with **Test Driven Development (TDD)**.

- Interact with other developers and end users to design and implement new features throughout the framework.

Environment: Java 8, spring, Spring Boot, MVC, Micro Services, Hibernate, REST, HTML5, CSS3, JavaScript, AngularJS, XML, JMS, Docker, Jenkins, EJB, Log4j, JUnit, SQL, PL/SQL, Agile and Windows.

Walmart, India

March 2019 - Feb 2021

Java Developer

- Created and developed **web services** for different business segments within the company for multiple applications.
- Involved in analysis and design phase of **Software Development Life cycle (SDLC)**.
- Used **Spring MVC** and Dependency Injection for handling presentation and business logic.
- Developed the applications using **SPRING framework** including **Spring Core, Spring WS, Spring MVC, and Spring Integrations** design pattern.
- Implemented **Spring MVC** and **DAO** for various modules.
- Used **Spring Framework** for Dependency injection and integrated with the **Hibernate**.
- Extensively used **spring** with **Hibernate** among the modules in presenting the data.
- Develop user-defined tags using **XML**.
- Used **JMS** to create, send and read messages.
- Used **Core Java** OOPS concepts (inheritance, polymorphism) in developing the code.
- Implemented Java **and SOAP** based web services using for **JAX-RS and JAX-WS** respectively.
- Implemented stored procedures and dynamic **SQL on SQL Server**.
- Followed **agile** software development practice paired programming, test driven development and **scrum** status meetings.
- Participated in the status meetings and status updating for the management team.

Environment: Java 8/7, spring, MVC, Hibernate, XML, JMS, Java Classes, RESTful, SOAP, SQL, Agile and Windows.
