

Deepak Nakka

Software Engineer

Charlotte, NC | +1(980)4155901 | deepak@jobitwork.com | [LinkedIn](#)

SUMMARY

- Software Engineer with around 3 years of experience in developing scalable and efficient applications following SDLC, Agile, and Waterfall methodologies.
- Proficiency in Core Java and Java 8/11, with expertise in frameworks including Spring MVC, Spring Boot, Spring Security, Microservices, Hibernate, JPA, and JSF.
- Experienced in building full-stack applications using React.js, Vue.js, Node.js, Angular.js, and J2EE technologies such as Servlets, JSP, JSTL, JavaBeans, JDBC, and Java Mail.
- Strong background in web technologies, including HTML, CSS, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, and XML, to develop responsive and interactive applications.
- Hands-on experience with cloud platforms, including AWS (VPC, EC2, S3, CloudFront, ELB), Azure, and Apache Tomcat, ensuring secure and scalable deployments.
- Skilled in working with relational and NoSQL databases, including MySQL, SQL Server, PostgreSQL, Oracle, and MongoDB.
- Proficient in development and testing tools like Jira, Jenkins, JUnit, JMeter, and MS Excel, ensuring robust project execution, testing, and performance optimization for business-critical applications.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Core Java, Java 8/11, SQL, Python, C++, C, C#

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF, React.JS, Vue.JS, Node.JS, Angular.JS, Django, NumPy, PANDAS

IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code, Eclipse

J2EETechnologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript, Bootstrap, jQuery, AJAX, JSON, XML

Cloud Tool/Application Server: AWS (VPC, EC2, S3, CloudFront, ELB), Azure, Apache Tomcat, IBM WebSphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

VersionControl/OtherTools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, Excel, JMeter, Docker, Oracle VM

OperatingSystems: Windows, Linux, Mac

EXPERIENCE

MetLife, USA | Software Engineer

Aug2024- Present

- Spearheaded Agile-driven development, reducing project timelines by 30% and delivering high-quality solutions across 5+ projects through iterative sprints and cross-functional collaboration.
- Designed and implemented scalable web applications using Core Java and Java 17, leveraging Spring MVC, Spring Boot, and Microservices to align with business requirements and improve system performance.
- Developed responsive UIs with React.js, Angular.js, HTML, CSS, and TypeScript, boosting user engagement by 40% and optimizing performance across multiple platforms and devices.
- Deployed applications on AWS (VPC, EC2, S3, CloudFront, ELB), ensuring high availability, fault tolerance, and scalability, resulting in a 25% improvement in system uptime.
- Optimized database performance by integrating MongoDB and enhancing JDBC connectivity, achieving a 20% reduction in data retrieval time for high-traffic applications.
- Collaborated with cross-functional teams using Jira and Git, improving code quality and reducing bugs by 15% through rigorous code reviews and version control best practices.
- Automated CI/CD pipelines using Jenkins, reducing deployment time by 30% and ensuring seamless integration and delivery of high-quality code.
- Conducted performance testing using JMeter, identifying and resolving bottlenecks, resulting in a 20% improvement in application response time under heavy load.

CitiusTech, India | Software Engineer

Jun2021-Jun 2023

- Delivered 10+ enterprise-level applications using Java 8/11, Spring Security, and Hibernate, improving system reliability by 30% and ensuring secure, scalable solutions for diverse industries.
- Built and deployed Microservices architecture using Spring and JSF, integrating MySQL, PostgreSQL, and Oracle databases achieving a 25% improvement in data retrieval efficiency.
- Developed responsive web applications with Vue.js, Node.js, and Bootstrap, increasing user engagement by 25% and reducing application load time by 20%.
- Leveraged IBM WebSphere and Azure for cloud deployments, optimizing infrastructure management and improving deployment efficiency by 40% for mission-critical applications.
- Integrated JavaBeans, JDBC, and Java Mail for seamless data exchange, reducing system errors by 15% and enhancing communication across internal systems.
- Enhanced UI/UX with jQuery and Ajax, enabling dynamic content rendering and improving user satisfaction by 20% through smoother and more interactive experiences.
- Utilized Jenkins, JUnit, and JMeter for CI/CD, automated testing, and performance optimization, ensuring high-quality code delivery and efficient handling of high-traffic workloads.

EDUCATION

Master of Science in Computer Science University of North Carolina at Charlotte, Charlotte, North Carolina	Dec2024
Bachelor of Technology in Computer Science and Engineering Vellore Institute of Technology, Vellore, India	May2023

PROJECTS

Social Networking Site | Java, Java Servlets, Maven, Apache Tomcat

- Designed and launched a robust social networking platform utilizing Java Servlets and Apache Tomcat, enabling user registration and post creation achieved a 40% increase in daily active users within the first three months.
- Created a comprehensive Maven-based project management system that supported the deployment of 12 applications to Tomcat, which enriched deployment frequency and reduced downtime by 20% across web services.

Twitter Network Sentimental Analysis | Python, Machine Learning Algorithms

- Analyzed over 1 million tweets with NLTK and TextBlob, achieving 85% accuracy in sentiment classification and gaining valuable insights.
- Bettered pattern recognition by 20% in vaccination sentiment classification, aiding public health communication with more accurate insights.
