SUMMARY

- Software Engineer with 5+ years of experience designing, developing, and deploying scalable, cloud-native, and full-stack applications across diverse industries.
- Proficient in Java, Python, JavaScript/TypeScript, and modern frameworks including React.js, Next.js, Spring Boot, and FastAPI.
- Experienced in architecting and delivering microservices, REST/GraphQL APIs, and secure enterprise-grade software solutions.
- Skilled in AWS, Kubernetes, and Docker for building resilient cloud infrastructure, containerization, and high-availability deployments.
- Strong expertise in CI/CD automation, DevOps best practices, and infrastructure-as-code using GitHub Actions, Jenkins, and Docker Compose.
- Adept at implementing monitoring, observability, and performance optimization with Prometheus, Grafana, and advanced logging/alerting tools.
- Solid foundation in system design, data structures & algorithms, object-oriented programming, and Agile methodologies.
- Proven track record of reducing release cycles, improving system reliability, and delivering impactful, data-driven business solutions.

SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, Bash
- **Software Engineering:** Object-Oriented Design, Design Patterns, System Design, Data Structures & Algorithms, SOLID Principles
- **Frontend Technologies:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, Zustand
- **Backend & API Development:** Node.js, Express.js, Spring Boot, FastAPI, REST APIs, GraphQL, Microservices Architecture
- **Databases & Storage:** PostgreSQL, MySQL, MongoDB, Firebase, SQLite, Prisma ORM, Mongoose
- **DevOps & Cloud Platforms:** Docker, Kubernetes, GitHub Actions, AWS (EC2, S3, Lambda), Vercel, Netlify
- **CI/CD & Infrastructure Automation:** GitHub Actions, AWS CLI, Docker Compose, Jenkins
- **Testing & Quality Assurance:** Unit & Integration Testing, Jest, React Testing Library, Chrome DevTools, Test-Driven Development
- **Security & Authentication:** OAuth 2.0, JWT, Firebase Auth, Role-Based Access Control, Secure API Design
- **Monitoring & Observability:** Prometheus, Grafana, Logging, Tracing & Alerting
- **Tools & Utilities:** Git, GitHub, Bitbucket, Postman, ESLint, Prettier, Webpack, NPM
- **Project Management & Collaboration:** Agile, Scrum, JIRA, Trello, Notion, Confluence

WORK EXPERIENCE

DXC Technology

July 2024 – Present

Software Engineer

- Contributed to the Astro Data & Analytics Platform Modernization, engineering cloud-native solutions through scalable microservices architecture using Node.js, FastAPI, and GraphQL.
- Designed and implemented highly responsive frontend modules in React.js, Next.js, and Tailwind CSS, enhancing data visualization dashboards and improving user engagement for data-driven decision-making.
- Deployed and managed workloads on AWS (EC2, S3, Lambda) and Kubernetes, ensuring fault-tolerant and highly available infrastructure.
- Streamlined CI/CD pipelines with GitHub Actions, Docker Compose, and Jenkins, reducing release cycles by 40% while maintaining code quality through automated testing.
- Integrated OAuth 2.0, JWT, and Role-Based Access Control for secure API design, safeguarding sensitive customer data and achieving compliance with enterprise-grade security standards.
- Established monitoring and observability practices using Prometheus and Grafana, enabling real-time system health tracking and reducing incident resolution time by 25%.

Trigent Software

January 2019 – December 2022

Software Engineer

- Designed core components of the Raptor Technologies School Safety System, ensuring high availability and security for schools nationwide.

- Implemented backend services leveraging Spring Boot and Express.js, powering RESTful APIs that enhanced student and visitor management processes.
- Participated in the transition from monolithic to microservices architecture, improving modularity and simplifying deployment cycles.
- Developed and maintained responsive frontend components using JavaScript, HTML5, CSS3, Bootstrap, and Redux, resulting in a 25% improvement in user engagement across safety dashboards.
- Managed relational and NoSQL databases including PostgreSQL, MySQL, and MongoDB, optimizing queries for faster response times and efficient data retrieval.
- Built authentication and authorization modules leveraging Firebase Auth, ensuring sensitive user data was protected with role-based access controls.
- Deployed applications on AWS EC2 and S3, using Docker for containerization and AWS CLI for infrastructure automation.
- Conducted unit and integration testing, leveraging Chrome DevTools to identify and resolve performance bottlenecks, reducing production defects by 30%.
- Collaborated in Agile teams using Scrum methodology, JIRA, and Trello, ensuring consistent on-time delivery of 95% of sprint commitments.

PROJECTS

E-Commerce Analytics Dashboard

- Designed an interactive analytics dashboard using Python, Dash, and Plotly, enabling real-time visualization of customer purchase trends and sales performance.
- Integrated data pipelines with SQLite and Pandas, optimizing ETL processes to support fast reporting and insights generation for business teams.

Microservices-Based Travel Booking Platform

- Developed and deployed a modular travel application using Microservices, Docker, and Kubernetes, separating booking, payment, and search services to improve scalability and fault isolation.
- Implemented high-performance service communication with gRPC and REST APIs, optimizing response times and ensuring seamless integration across distributed components.

EDUCATION

- **Master of Science in Computer Science**
Wichita State University, Kansas | **GPA: 3.9**

January 2023 – May 2024
