Professional Summary

Results-driven Software Professional with over 14+ years of experience in leading Java-based backend systems, Azure cloud infrastructure, and Angular frontend solutions. Proven expertise in managing cross-functional teams, implementing scalable architectures, and delivering high-quality software products. Adept at aligning technology strategies with business goals to accelerate time-to-market and ensure customer satisfaction.

Skills

Languages & Frameworks: Java/J2EE, Spring Boot, Spring MVC, Hibernate, JPA, Junit, Spring Mockito, Servlet, JSP, JSTL, JDBC and Web Services (SOAP/REST), JSF 2.0 (Primefaces, Richfaces).

Web Technologies: Angular, React JS, HTML5, XHTML, CSS3, JavaScript, Typescript, jQuery, XML, AJAX, JSON.

Database (RDBMS): MySQL5.5, MS SQL Server 2005,2008, PostGre SQL, DB2.

Cloud Platforms: Azure (App Services, Cosmos DB), Azure Kubernetes Services, Azure IoT Hub, PCF, Firebase Cloud Messaging (FCM).

Tools & Technologies: Maven, ANT, Gradle, Firebase, JIRA, Rally, Version One, Pivotal Tracker, Confluence, Eclipse, IntelliJ IDEA, Webstorm, Atom, SublimeText, Visual Studio Code, iReport4, Cortex Studio, Star UML, Kafka, Splunk.

Version Control: GIT, SVN, SourceTree.

Leadership: Agile methodologies, team mentoring, resource allocation, conflict resolution.

Development Practices: CI/CD pipelines, test-driven development (TDD), DevOps, Design Patterns, OO Design Principles (SOLID).

Communication: Stakeholder management, technical documentation, cross-functional collaboration.

Team Management: Recruiting, mentoring, performance reviews, fostering collaboration.

Functional Domain Knowledge: Lighting & controls, Engineering & Industrial Service, Plant Automation, US Healthcare & Telecommunications, HR Staffing, Retail & E-commerce.

Professional Experience

Engineering Lead

Cooper Lighting Solutions | Atlanta, GA | Jan 2020 – Jan 2025

Technologies: Java 17, Spring Boot 3.2, Angular 17, MS Azure- Azure Kubernetes Service (AKS), Azure Active Directory, Service Bus, Git, Blob Storage, App Insights, Cosmos DB, Timeseries DB, Device Management with IoT Hub, PostGre SQL, Firebase Cloud Messaging (FCM)

- Lead and managed a team of 10 engineers, overseeing the development and maintenance of Java-based enterprise applications.
- Spearheaded the migration of a monolithic Java application to a microservice's architecture using Java, Spring Boot on Azure Kubernetes Services.

- Developed and maintained scalable backend systems using Java, Spring Boot and Angular for UI components.
- Integrate with MS Azure features like Device registration, Provisioning in IoT Hub, used app Insights to analyze usage & performance of web application.
- Used Azure IoT Hub - Cloud to Device feature to send firmware upgrade commands to devices/fixtures.
- Collaborated with Product Management and UX teams to define roadmaps and priorities, technical requirements and align engineering efforts with business goals.
- Automated process e.g. emails for device statistics, escalation process that saved BA/Developer work.
- Researched market trends to improve existing products and develop new ideas like validating a site during device commissioning phase rather when the complete site was commissioned.
- Successfully migrated on-premise & legacy applications to a cloud-native architecture (Azure), reducing infrastructure costs.
- Reviewing code and architectural designs.
- Providing guidance/troubleshoot on complex technical problems or prod issues.
- Leading & facilitating technical discussions, design reviews, with architects and engineering team.
- Delivered projects on time & managed right expectations across teams.
- Timely & clear communication.
- Mentored junior engineers, fostering a culture of continuous learning and improvement.
- Introduced best practices for coding and DevOps, achieving faster release cycles, higher uptime and reducing Time to Market.

Lead Full Stack Software Engineer

Cooper Lighting Solutions | Atlanta, GA | Feb 2019 – Jan 2020

Technologies: Java 11, Spring Boot, Angular, MS Azure (Azure AD, Blob, Service Bus), AKS, Cosmos DB, Post Gre SQL, Firebase Cloud Messaging, JIRA, Confluence, BitBucket

- As an initiative Lead, collaborated with Product Management to refine user stories and prioritize feature delivery.
- Developed and maintained scalable backend systems using Java, Spring Boot and Angular for UI components.
- Integrate with MS Azure and used Blob Storage, Service Bus.
- Used Firebase Messaging Service (FCM) to push notifications to app.
- Led the design and implementation of RESTful APIs, enabling seamless integration with external systems and improving system interoperability.
- Managed migrating/building services during company's spinoff under a compressed schedule ensuring high quality and zero critical defects.
- Worked closely with QA and DevOps teams to improve the software development lifecycle, incorporating continuous integration and automated testing.
- Collaborated with cross-functional teams to troubleshoot and resolve software defects and system issues in production environments.
- Mentored junior developers in team, contributing to overall improvement in team productivity.

Lead Software Engineer

The Home Depot (Client) | Atlanta, GA | Nov 2017 – Feb 2019

Technologies: Java 8, Spring Boot, Hibernate, React JS, RESTful APIs, HTML-5, CSS3, Junit, DB2, Apache Tomcat-8, Git, IntelliJ IDEA, Webstorm, Atom, Pivotal Tracker

- Responsible for taking functional requirement from client, analyze the business flow, estimate timelines and generate reports on performance tuning.
- Developed a robust Java backend Staffing System using Spring Boot, Java/J2EE, Git. Used Hibernate framework & developed Criteria query API, HQL & native SQL to retrieve the data.
- Implemented intuitive, easy-to-navigate and aesthetically pleasing user interfaces using ReactJS, HTML-5 & Bootstrap.
- Used CSS preprocessors – SASS & LESS.
- Provided technical leadership and conducted code reviews to maintain high coding standards.
- Executed functional and integration testing and software delivery support.

Software Engineer

JMA Wireless | Chicago, IL | Mar 2017 – Nov 2017

Technologies: Java 8, Spring Boot, Hibernate, Angular 2, RESTful/SOAP WS, HTML-5, CSS3, Bootstrap, Junit, MS SQL Server 2008, Apache Tomcat-9, Git, IntelliJ IDEA, Visual Studio Code, Atom, JIRA, Confluence

- Worked on Spring Framework to develop the application using Spring MVC architecture, used Hibernate framework, designed and implemented RESTful APIs ensuring seamless integration with the frontend.
- Turn the mock-ups and designs into responsive website and cross browser testing across devices as desktop, mobiles and tablets with HTML5, Angular-2 and Bootstrap.
- Build data visualization using C3 charts library like stacked, bar, pie charts, used Font Awesome library and used Bootstrap Icons.

Software Engineer Team Lead

Accenture (Client: T-Mobile) | Gurgaon, India | Nov 2014 – Jan 2017

Technologies: Java 7, Spring, Hibernate, Angular JS, RESTful/SOAP WS, HTML-5, CSS3, Bootstrap, Apigee, Cortex Studio

- Work closely with product owner to deliver highly efficient, intuitive and reusable technical solution to meet/exceed business requirements.
- Worked with API Management tool Apigee & Consume RESTful services and extract the necessary data used in the module and used Java/J2EE, Hibernate, Spring Framework.
- Worked with Cortex Studio to work on requirement specific zooms and generate result set.
- Experience in AngularJS controllers, directives, components, factory and service resources, routings and events.

Senior Software Engineer

Tata Consultancy Services (Client: Humana) | Pune, India | Dec 2010 – Nov 2014

Technologies: Java/J2EE 1.6, JSP, JSF, HTML5, REST, Jersey, HTML5, CSS/CSS3, JSTL, Servlets, JavaScript, jQuery, Eclipse, Log4j, MSSQL Server 2005, UML, SVN

- Oversaw complete software development lifecycle for web-based applications. Used Java, JSP, JSF for development.
- Designed GUI using HTML5 and JSPs for end user interaction.
- Developed Responsive UI screens using Media Queries, CSS3.
- Prepared use cases, activity, sequence and ER diagrams for Software Requirements Specification and Application Design Document.

Education

Bachelor of Technology: Electronics & Communication Engineering

G.B Pant Engineering College, Uttarakhand, India | May 2010
