Senior Software Engineer (Python)

PROFESSIONAL SUMMARY

Innovative and performance-oriented Software Developer with 10+ years of experience building scalable applications and AI-powered systems using Python frameworks like Django, Flask, and FastAPI. Proven track record in designing robust RESTful APIs, asynchronous services, and multi-threaded architectures to reduce latency and improve performance. Skilled in AI/ML model development using TensorFlow, PyTorch, and Scikit-learn to deliver predictive analytics, automation, and intelligent features. Strong expertise in building microservices and cloud-native applications using Docker, Kubernetes, and AWS, achieving 99.99% uptime in production environments. Experienced in integrating third-party platforms (Stripe, Twilio, AWS S3), optimizing databases (PostgreSQL, MongoDB, Redis), and following best practices in TDD, clean architecture, and design patterns. Passionate about solving real-world problems with NLP, computer vision, and scalable data analytics solutions.

TECHNICAL SKILLS:

Languages & Frameworks:

Python (Django, Flask, FastAPI, Django Rest Framework, Jinja2), JavaScript (React.js, Vue.js, Node.js), TypeScript, HTML5, CSS3, Sass, Bash/Shell Scripting

AI/ML:

TensorFlow, PyTorch, Scikit-Learn, Keras, Transformers (Hugging Face), NLTK, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Statsmodels, XGBoost, LightGBM, Dask, spaCy, SHAP (Explainable AI)

Databases:

PostgreSQL, MySQL, MongoDB, Redis, SQLite, Google BigQuery, Snowflake, Cassandra

Frontend Tools:

React.js, Vue.js, Angular, Bootstrap, Tailwind CSS, Chart.js, D3.js

Cloud Platforms & Tools:

AWS (Lambda, EC2, S3, RDS, SageMaker, DynamoDB, API Gateway, CloudWatch, Elastic Beanstalk, CloudFormation), Google Cloud Platform (GCP AI, BigQuery, Cloud Functions), Microsoft Azure (Azure ML Studio, Blob Storage, Azure Functions)

DevOps & CI/CD Tools:

Docker, Kubernetes, Ansible, Terraform, GitHub Actions, Jenkins, CircleCI, TravisCI, Packer, Helm

Other Tools & Libraries:

Celery, RabbitMQ, RESTful APIs, GraphQL, WebSockets, OpenAPI/Swagger, BeautifulSoup, Scrapy, Asyncio, Regex, JSON/XML Parsers, Pytest, PyInstaller, Apache Spark, Apache Airflow, Hadoop HDFS, pandas-profiling

PROFESSIONAL EXPERIENCE:

The Home Depot— Austin, TX

Nov 2022-Jul 2025

Senior Software Engineer (Django, AI/ML)

- Architected Django web applications for 500K+ users daily, increasing content delivery speeds by 30% with database optimizations and Redis caching.
- Developed REST APIs with DRF and FastAPI, enhancing microservices' communication by 50% and API response times.
- Designed AI-powered recommendation systems with TensorFlow and PyTorch, driving a 20% boost in customer engagement.
- Built NLP features with Hugging Face and NLTK, achieving 95% accuracy in chatbots and search functionalities.
- Built several Single Page Applications (SPAs) using React.js, seamlessly integrating real-time analytics dashboards with custom APIs.
- Built multi-step workflow forms in React.js using Formik and Yup, streamlining user onboarding for 100K+ enterprise clients.
- Collaborated with design and UX teams via Figma and Storybook to deliver pixel-perfect, mobile-responsive UIs using React.js and TailwindCSS.
- Containerized applications with Docker and deployed on Kubernetes, scaling to handle 1M+ requests seamlessly.
- Wrote unit and integration tests with Pytest, achieving 98% test coverage across Python services.

Key Achievements:

- Reduced API response latency by 25% using FastAPI and asynchronous programming techniques.
- Deployed machine learning pipelines on AWS SageMaker, enhancing model deployment time by 30%.
- Delivered a Django-based e-commerce system with AI-driven product recommendations, driving 15% higher sales conversions in the first quarter.

Storable — Austin, TX

Apr 2018-Oct 2022

Senior Software Engineer (Flask / Data Analytics)

- Designed Flask-based dashboards to process 1M+ IoT records daily, delivering actionable insights.
- Built real-time financial forecasting pipelines with Scikit-Learn, saving 20+ hours/week on manual analysis.
- Developed Flask APIs for CRM integrations, streamlining 500K+ transactions daily with 99.9% uptime.
- Optimized SQL queries and indexing, cutting query execution time by 40%.
- Implemented TensorFlow-based fraud detection workflows, identifying anomalies in financial systems.
- Deployed Flask APIs with Docker on AWS ECS, reducing compute costs by 25% via auto-scaling.
- Delivered full-stack solutions by integrating React.js with Flask APIs for seamless functionality.
- Migrated CI/CD pipelines to GitHub Actions and Jenkins, reducing release time-to-market by 25%.

Key Achievements:

- Developed a multi-region AWS deployment strategy with 3-minute disaster recovery and minimal downtime.
- Optimized data aggregation pipelines, cutting streamlining time by 30% with Python multiprocessing.
- Automated REST API documentation with Swagger/OpenAPI, improving developer collaboration by 20%.
- Built an anomaly detection engine, preventing \$50K+ in monthly fraud losses.

Crum & Forster — Morristown, NJ

Jun 2014-Mar 2018

Software Engineer

- Managed cloud infrastructure on AWS and Azure, ensuring 99.9% availability with resource monitoring and backups.
- Designed predictive ML models with Sklearn and Pandas, cutting operational costs by 15%.
- Developed customer segmentation tools using clustering algorithms, driving 25% revenue growth.
- Automated ETL workflows with Python scripts, reducing data handling time from 8 hours to 30 minutes.
- Processed large datasets using Apache Spark, accelerating insights by 50%.
- Improved object detection model performance by 20% through dataset labeling and rehandling.

Key Achievements:

- Migrated monolithic Django systems to microservices with FastAPI, improving deployment speed by 60% and fault isolation.
- Designed serverless AI workflows with AWS Lambda, cutting operational costs by 20% and boosting scalability.
- Built fraud detection frameworks using Flask and PyTorch, reducing transaction risks by 50%.

EDUCATION:

DeVry University

B.Sc. in Computer Science

United States (2010-2014)
