

DHRUV PATEL

Norwalk, CT | (857) 999-6655 | dhruv.p@nextitjobs.com | [LinkedIn](#)

SUMMARY

Innovative and results-oriented Software Developer Around 5+ years of experience designing, adept at creating safe, fast systems by fusing cutting-edge frontend frameworks like React.js, Angular, and TypeScript with solid backend knowledge of Java, Spring Boot, Node.js, Django, and Flask. demonstrated ability to advance microservices design, workflow automation, and API integrations to increase system efficiency, scalability, and dependability. competent in developing cloud-based solutions using Docker, AWS, and Kubernetes, and has practical knowledge of CI/CD pipelines to expedite deployments and shorten delivery schedules. solid background in database design and optimization using PostgreSQL, MySQL, and MongoDB, guaranteeing performance and data integrity in high-volume settings. knowledgeable about leading UAT projects, working with cross-functional teams in Agile/Scrum environments, and producing solutions that support corporate objectives. Holds a Master's degree in Computer Science and passionate about applying engineering principles, problem-solving, and emerging technologies to deliver impactful business outcomes.

WORK EXPERIENCE

Humanitarians AI Full Stack Developer

Sep 2025 – Present
Boston, MA

- Developed and maintained robust and scalable software solutions using Python and frameworks like Django and Flask, reducing development time by 30% and enhancing system performance and reliability.
- Implemented RESTful APIs and optimized database schemas in PostgreSQL, improving data flow efficiency by 40% and data retrieval speeds by 35%.
- Leveraged Docker for containerization and integrated CI/CD pipelines using Jenkins and GitLab, reducing deployment times by 50% and ensuring consistent application deployment across environments.
- Designed and implemented scalable microservices using Java and Spring Boot, resulting in a 30% reduction in server response time and a 40% improvement in application performance.

Citi Senior Software Development Engineer

Jun 2024 – Apr 2025
New York, NY

- Facilitated the construction of Spring Boot microservices for real-time credit card fraud checks using Kafka Streams and Oracle, supporting over 1M transactions per hour and meeting strict latency SLAs.
- Contributed to the modernization of a legacy loan origination workflow by aligning Java 17 backend services with RESTful APIs and third-party credit integrations, achieving a 30% faster approval rate.
- Advanced Citi's Basel III regulatory compliance by shaping a Spring Batch-based data processing engine and PostgreSQL backend that removed 70% of manual effort in quarterly reporting.
- Drove deployment efficiency by implementing GitLab CI/CD with Docker and Kubernetes (OpenShift), cutting production release timelines from two weeks to three days with stable rollouts.
- Managed the secure integration of OAuth 2.0 and JWT-based user authentication within retail banking microservices via Spring Security, ensuring full PCI-DSS and GDPR compliance across platforms.

Zentek Infosoft Software Development Engineer

Mar 2019 – Dec 2022
Jaipur, IN

- Delivered a cloud-native SaaS platform leveraging Java, Spring Boot, React.js, and AWS Lambda, enabling scalable multi-tenant architecture and reducing deployment time by 30% using CI/CD pipelines in Jenkins.
- Architected microservices-based modules for a workforce management tool using Node.js, Docker, and Kubernetes, achieving 99.9% uptime and improving horizontal scalability on AWS EKS.
- Optimized ETL pipelines integrating transactional and CRM data into Snowflake via Python, Apache Airflow, and dbt, reducing query latency by 25% and supporting advanced analytics dashboards.
- Engineered an AI-driven sentiment analysis feature using Python and REST APIs, enhancing user engagement insights for a political campaign management product.
- Automated end-to-end testing workflows with Selenium, JUnit, and Postman, integrating into GitLab CI/CD pipelines and improving defect detection rate by 40% before production releases.
- Deployed secure and compliant infrastructure-as-code templates using Terraform and AWS CloudFormation, streamlining environment provisioning for development and production workloads.
- Participated in code reviews, sprint planning, retrospectives, and daily standups, enhancing team collaboration and project success.

PROJECTS

Multi-Service Counseling Appointment Platform

- Built a full-stack counseling appointment platform using Next.js, TypeScript, Node.js, and PostgreSQL, integrating ML-based recommendations (87% accuracy) to enable 1,000+ user bookings across multiple service categories and improve match relevance by 63%, driving a 30% increase in user engagement.

Kanbas LMS (Canvas Replica)

- Developed a scalable Canvas-inspired Learning Management System (LMS) using the MERN stack, incorporating 10+ core features including real-time discussion and grading via WebSockets and MongoDB, and deployed on AWS for high availability and performance.

SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Angular, Tailwind CSS, Bootstrap
Backend	Java, Node.js, Spring Boot, Express.js, Django, Flask
Databases	MySQL, PostgreSQL, MongoDB, Redis
APIs	RESTful APIs, GraphQL, WebSockets
Cloud & DevOps	AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Jenkins, CI/CD
Version Control	Git, GitHub, GitLab, Bitbucket
Testing	JUnit, Mockito, Selenium, Cypress, Postman
Other	Microservices Architecture, Kafka, RabbitMQ, Agile/Scrum

EDUCATION

Northeastern University	Jan 2023 – May 2025
Master of Science in Computer Science	Boston, MA
Gujarat Technological University	Aug 2017 – Aug 2021
Bachelor of Engineering in Information Technology	Ahmedabad, IN
