

DileepKumar Tutika

Java Full Stack Developer

dileep@careeremail.net (561) 639-3889 Florida, USA Github LinkedIn

Summary

Experienced Java Full Stack Developer with 4+ years of building scalable, high-performance applications using Java, Spring Boot, and microservices. Skilled in developing secure RESTful APIs and integrating AWS services like EC2, S3, and SQS. Proficient in CI/CD tools including Jenkins, GitHub Actions, and AWS CodePipeline. Strong advocate of Agile, TDD, and unit testing with 80-85%+ code coverage. Hands-on experience with front-end technologies like HTML, CSS, JavaScript, and React. Adept at translating complex business requirements into efficient, maintainable code. Passionate about continuous learning and improving system performance and developer workflow.

Technical Skills

Languages & Frameworks : Java, Java, Spring Boot, Spring MVC, Spring Data JPA, Ruby on Rails, JavaScript, TypeScript, RESTful APIs, GraphQL, Angular, React

Backend & Middleware : Microservices Architecture, Asynchronous Programming, Event-Driven Architecture, API Design & Integration, Custom Exception Handling, Kafka, AWS SQS, Redis

Frontend : React (dynamic validation, real-time data updates, reusable components), Angular

Database : Oracle SQL, PostgreSQL, MySQL, Query Optimization, Indexing, Data Modeling, Stored Procedures

Cloud Platforms & DevOps : AWS, Oracle Cloud ERP, Hybrid Cloud Architecture, CI/CD Pipelines, GitHub Actions, Jenkins, AWS CodePipeline, Docker

Testing & Quality Assurance : JUnit, Mockito, Integration Testing, A/B Testing, Test-Driven Development , Code Coverage

Monitoring & Observability : AWS CloudWatch, Datadog, Micrometer, Log Analysis, Infrastructure Monitoring, Performance Tuning

Version Control & Tools : Git, GitHub, Jira, Agile (Scrum), IntelliJ IDEA, Postman, Maven, Gradle

Professional Experience

Java Full Stack Developer, Barclays 04/2024 – Present | Remote, USA

- Built and maintained Java and Spring Boot-based microservices, integrating REST APIs, Kafka, and Redis for scalable, event-driven systems.
- Contributed to full-stack development using React and Ruby on Rails for internal dashboards, improving development speed for admin tools and feature testing.
- Deployed services on AWS (EC2, S3, SQS, CloudWatch) and implemented auto-scaling, achieving 99.99% uptime and improved infrastructure resilience.
- Automated CI/CD workflows using GitHub Actions and Jenkins, reducing deployment time by 30% and ensuring consistent release cycles.
- Implemented unit and integration testing using JUnit, Mockito, and test containers, achieving 85%+ coverage and boosting production reliability.
- Followed Agile (Scrum) practices using Jira, collaborating cross-functionally in sprint planning, demos, and retrospectives.
- Used Docker for containerization and worked with Kubernetes (EKS) for orchestration in AWS, streamlining deployment and scalability of microservices.

Java Backend Engineer, Backbase 11/2021 – 12/2022 | Hyderabad, India

- Developed microservices for digital banking platforms using Java, Spring Boot, and REST APIs, supporting high-volume, real-time financial transactions.
- Integrated Kafka and AWS SQS for asynchronous communication and event-driven processing, reducing service latency by 30%.
- Automated deployments with GitHub Actions, AWS CodePipeline, and containerization workflows, improving deployment reliability and reducing cycle time.
- Improved backend observability using Datadog (Micrometer) and AWS CloudWatch, reducing downtime and accelerating incident response.
- Wrote unit and integration tests with JUnit and Mockito, maintaining 80%+ test coverage and ensuring codebase stability across releases.
- Participated in Agile ceremonies (Sprint Planning, Daily Standups, Retrospectives) using Jira, improving team velocity and alignment.
- Utilized Docker for local development and testing; collaborated with DevOps teams integrating services into Kubernetes (EKS) clusters.

Software Engineer, Shipconsole Pvt. Ltd. 08/2019 – 10/2021 | Hyderabad, India

- Developed backend modules using Java, Spring Boot, and Oracle SQL for enterprise shipping integrations with logistics carriers and ERP systems.
- Built and deployed a rate loader tool integrated with Oracle Cloud ERP, automating exchange rate updates and reducing manual input errors.
- Designed a full-stack bug-tracking system using Java, Angular, and Redis, streamlining QA workflows and reducing bug resolution time.
- Implemented Okta Single Sign-On (SSO) and secure role-based access controls to enforce enterprise-grade authentication across platforms.
- Wrote unit and integration tests using JUnit and Mockito, ensuring system reliability and reducing post-deployment defects.
- Mentored junior developers on backend development best practices, code reviews, and efficient use of Git, improving overall team productivity.

Education

Master of Science in Computer Science, Florida Atlantic University 01/2023 – 12/2024 | Florida, USA
