PROFESSIONAL SUMMARY

Software Engineer driven by curiosity, ownership, and a strong focus on building resilient, scalable systems. Experienced in designing backend services, optimizing developer workflows, and improving system observability through clean infrastructure and automation. Known for taking initiative, diving deep into root causes, and delivering high-quality solutions that enhance reliability and user experience.

TECHNICAL SKILLS

Languages & Frameworks : Python, Java, C#, Go, Spring Boot, React.js, FastAPI, SQL
Big Data : Spark, Hive, HDFS, EMR, Pig
Cloud & Infrastructure : AWS (Lambda, EC2, S3, Glue, EMR, Step Functions), Docker, Kubernetes, Terraform
Databases & Messaging : Redis · Kafka · MySQL · PostgreSQL · MongoDB
DevOps & Observability Tools : GitHub Actions · Helm · SonarQube · Prometheus · Grafana · pytest

EXPERIENCE

- Software Engineering Intern** | *The Web Blinders* May 2024 – May 2025
 - Built a FastAPI-based platform for sharing notes and textbooks, scaling to 3000+ users across academic departments.
 - Designed and optimized REST APIs with Redis caching, reducing average response time by 35% during peak usage.
 - Deployed services using Docker and Terraform on AWS EC2, enabling reproducible, zero-downtime deployments.
 - Initiated internal infra reviews and introduced CI workflows, reducing code review cycle time by 40%.
- Software Engineer – Big Data** | *Cognizant Technology Solutions* Sep 2023 – Jan 2024
 - Engineered scalable ETL pipelines handling 10TB+ daily using Hadoop, Pig, and Spark on AWS EMR.
 - Migrated legacy jobs to Spark with improved fault tolerance and parallelism, increasing job reliability by 15%.
 - Led performance tuning initiatives that reduced job completion time by 13% and cluster lag by 18%.
 - Developed reusable ingestion modules and UDFs for parsing unstructured text formats.
 - Implemented real-time cluster monitoring with Prometheus and Grafana, enabling proactive incident response.
- Software Engineering Intern** | *Cognizant Technology Solutions* Mar 2023 – Jun 2023
 - Developed full-stack features using React.js and Spring Boot for internal dashboard and reporting tools.
 - Built backend APIs with MySQL/MongoDB and frontend components with Redux for real-time UI state.
 - Developed unit and browser test suites using JUnit, Mockito, and Puppeteer to improve CI stability.
 - Enhanced CI pipeline reliability by contributing to Jenkins automation and nightly build verification scripts.

PROJECTS

- BuildPulse: Intelligent CI Load Balancer** | *Go · Redis · Kafka · Docker · GitHub Actions · AWS Lambda*
 - Built a backend service to assign CI jobs across build agents using Redis queues and Kafka messaging.
 - Reduced average CI wait time by 40% via predictive load balancing and autoscaling logic.
 - Deployed Prometheus-Grafana dashboards to monitor system throughput, latency, and job failure trends.
- TrackStack: End-to-End Issue Tracker** | *Spring Boot · React.js · PostgreSQL · Docker · Terraform · AWS EC2*
 - Developed a full-stack issue tracking platform with RBAC, audit logging, and developer workflow integration.
 - Containerized services and deployed to EC2 with infrastructure-as-code via Terraform.
 - Streamlined internal bug resolution pipelines, reducing ticket resolution latency by 30%.
- SmartClass: Personalized Learning Path Recommender** | *Python · Scikit-learn · Pandas · SQLite · Streamlit*
 - Built a recommender system to personalize course paths based on quiz data and user engagement metrics.
 - Deployed with Streamlit for real-time interaction; used clustering and decision trees for content sequencing.
 - Enabled mentors to tailor sessions per cohort, improving course completion by 20%.

EDUCATION

University of North Carolina at Charlotte
TA for “Cloud & Computing Networks” — led labs, graded projects, mentored 60+ students.

MS in Computer Science | GPA: 4.0

Jan 2024 – May 2025

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Dec 2024

Coursera: Kubernetes for Developers

Jun 2022

ADDITIONAL INFORMATION

- * **Winner, Merchant Data Hackathon 2023:** Built a scalable Kotlin/AWS Lambda service.
- * **Mentor, Women in Tech:** Conducted weekly problem-solving workshops.
- * **Volunteer, Code for Kids:** Taught basic electronics and programming to middle schoolers.
