Sr Salesforce Developer/Administrator

Professional Summary:

- Around 13 years of professional IT experience and 9+ years of involvement in different phases of SDLC including analysis, design, development, implementation & enhancement of projects in Salesforce.com and experience covering RPA and RDA application automation development.
- Expert Level understanding of Salesforce.com CRM and its Development Life Cycle.
- Hands on experience on Sales force Lightning and Communities.
- Good development experience with Apex Language, Apex Trigger, Apex Scheduler, Batch Apex, Apex Class & Apex Web Service, Partner WSDL & Enterprise WSDL, Visual Force (Page, Component & Controllers).
- Experience in Integrating App Exchange Applications with Salesforce, Mass E-Mail Management, Application management using Force.com Plug-in & Eclipse IDE in Sandbox and Production Environments, Working with different aspects of Web Services (XML, WSDL, and SOAP).
- Experienced in implementation using Apex Controllers, Triggers, Web Services and Visual Force Pages, Components, Tabs, Custom Objects, Reports and Dashboards.
- Strong knowledge in App - Exchange Applications for integrating with Third Party Applications.
- Experienced with Lightning UI development and working on Lightning Process Builder.
- Used different data tools like Apex Data Loader, Excel Connector, Import Wizard, SFDC Data Export, Mass Delete.
- Expertise in development using Visual Force and Apex, SOQL, SOSL, WSDL, Web Services API and custom user interfaces using HTML and Apex tags.
- Extensive Knowledge in Design and Development of User Interfaces using HTML, DHTML, AJAX, XML, XSL.
- Extensively worked on CRM fusion to manage duplicates, mass edit and delete records, convert leads etc.
- Good experience and knowledge of Database Modelling.
- Excellent analytical, communication and inter-personal skills.
- RPA Developer expertise in UIPATH design and development Process.
- Well versed in the concepts of Documentation such as PDD and SDD, optimization of overall implementation, creating test cases and derive architectural design, developing custom DLL binary files in Visual Studio for use in UiPath Studio, and designing & documenting automated process solutions
- Sound knowledge of .Net Language, Database tool Oracle-SQL, Version control system SVN, Bit bucket, and Git, Cloud-based tools Log Insight & Guacamole, Automation tools UIPATH, and MS Excel & VBA.

EDUCATION:

- MCA from (Andhra University) with 8.4 CGPA

CERTIFICATIONS:

- Certified by Salesforce Administrator
- Certified by Salesforce platform Developer 1
- Certified UIArd Developer.

TECHNICAL SKILLS:

Salesforce Technologies	Apex Language, Apex Classes, Apex Triggers, SOQL, SOSL, Visualforce (Pages, Components & Controllers), Apex Web Services, APEX, Workflow & Approvals, Dashboards, reports, Analytic Snapshots, Custom Objects, Apex Trigger, Apex Scheduler, Batch Apex, Apex Class & Apex Web service, Partner WSDL & Enterprise WSDL.
Salesforce Tools	Eclipse, Force.com Eclipse IDE Plug-in, Force.com Explorer, Force.com Data Loader, Force.com Excel Connector, Force.com, Platform (Sandbox and Production), SOQL Explorer and Informatica Data Loader.
Languages	Java /J2EE, Struts, Servlets, JavaScript, JSP HTML, XML, SQL, COBOL, JCL, C, PL/1
App/Web Serves	Apache, Tomcat, WebLogic, WebSphere.
Databases	DB2, SQL Server 2008, PL/SQL, Oracle, IMS DB, VSAM
Operating Systems	Windows 95/98/2000/XP/2003, Solaris, Linux.

WORK EXPERIENCE:**Elevance HealthCare****Jun 2023 –Till Now****Role: Sr Salesforce Developer****Responsibilities:**

- Designed, developed and deployed Apex classes, Controllers, Extensions and Apex triggers in Visual force and Force.com for various functional needs of the application.
- Worked on Communities, developed a Customer portal using Lightning framework.
- Developed Visualforce pages. Created various Profiles, roles, and Page layouts and configured the permission based on the Organization hierarchy requirements.
- Worked on Service cloud to provide support to the client and Sales Cloud to manage and maintain the organization's sales territories using Enterprise Territory management.
- Worked on Leads, Accounts, Cases, Contacts Standard objects, search layouts, page layouts, Migration tool, App Customization, custom links and related links.
- Implemented Salesforce Automation (SFA) for Campaign Management, Lead Management, Opportunity Management. Written apex REST web service classes for inbound calls to salesforce.
- Created workflow rules to create email alerts, update fields, send outbound API messages to external partners.
- Implemented Approval processes to provide additional control over the content and the process used to approve them. Designed HTML Email templates for Auto-response to customers, created approval page layouts and tested using Sandbox.
- Worked with Lightning App Builder to build custom interfaces and lightning component actions to provide a secure way of building client-side custom functionality.
- Used SOQL and SOSL for data manipulation needs of the application using platform database objects.
- Built and integrated mobile optimized Visual Force Pages of Salesforce1 application and Lightning experience. Used Eclipse based Force.com IDE and Change sets to deploy Apex code.

- Maintained data cleanliness and accuracy by adding custom validation rules, custom formulas, custom tabs, reports and dashboards.
- Implemented escalation rules, automatic case generation and their escalation to call center representative, and generated email alerts for quick issue resolution.
- Responsible for all the activities related to configuring Data Loader, uploading data in CSV files into salesforce.com, checking for the correctness of the data.
- Created Roles, Role Hierarchies, sharing rules and implemented Object Level Field Security to manage critical information on the profile users. Managed field tracking and following records through Salesforce Chatter and enabled notifications and publisher actions.
- Extracted data from Salesforce.com application into large databases (Oracle 10g) for generating large data reports. Worked on Service Cloud full lifecycle implementation.
- Implemented web based case management, automatic - Web to case (on Case Object) to track and solve customer's issues. Developed estimates for the project and implemented Salesforce.com customizations and drove User Acceptance Testing (UAT).
- Worked closely with sales team and business analysts, trained internal business users to use applications, performed detailed analysis of business and user requirements, and designed the solution by customizing various standard objects of Salesforce.com (SFDC).
- Created various Reports (summary reports, matrix reports, dashboards, pie charts and graphics) and folders to assist managers to properly utilize Salesforce as a sales tool and configured test scenarios in Sandbox environment to implement QA testing.

TCS (Client: LBG)

May 2022 – May 2023

Sr. Salesforce Developer

Responsibilities:

- Created Tabs, record types, Organization wide default-settings, Sharing rules and queues and groups. Created custom objects and fields for contractual and transactional information.
- Developed APEX classes, Visualforce pages and APEX triggers to develop the custom functionality as per the requirement. Worked with Sales cloud, service cloud and marketing cloud.
- Developed custom Visual Force pages to automate Approval processes that used Email approvals and parallel Approval steps. Generated custom dashboards and reports to analyze clients and claims.
- Designed, built, test and deployed enhancements to Salesforce custom objects, UIs, workflows, Triggers, Alerts and Reports within Salesforce using Apex and Force.com.
- Written project specifications including technical, functional and solution design documents using UML.
- Created Visualforce pages to identify a region to be updated to enforce partial page refreshes and display the status of Ajax requests to display values depending on whether it is in progress or completed.
- Worked on various Salesforce.com standard objects like Case Management, accounts, Contacts, Content, Reports and Workplaces. Provide Tier-2 support level tasks and resolved issues for end users.
- Developed REST webservice calls to invoke third party web calls.
- Developed Validation Rules on various objects and created Assignment Rules on Lead object to assign the leads automatically to various group of users.
- Migrated meta data among various salesforce environments and other tools such as Data expert, etc. using Change sets. Worked with Dynamic Apex to access Objects and field describe information, execute dynamic SOQL, SOSL and DML queries.

- Worked on Data management including data integration from external data sources using API's, web services, importing and exporting large volumes of data. Worked with Lightning App Builder to build custom interfaces and lightning component actions.
- Setup activities and customized the apps to match the functional needs and built Custom applications to match the existing business needs with the required enhancements.
- Involved in writing test scripts for the encryption and decryption logic and interacting with the testing team to help them with Integration and UAT testing. Used Agile Methodology.
- Worked on Test methods to include the controllers and Trigger Handlers to ensure all the apex code has coverage and is being pushed to other sandboxes and production environments.
- Leveraged Project management standards including repeatable timeline, WBS, and SDLC milestones.

Legato Health technologies (Client: Anthem)
Senior Salesforce Developer

Jul 2018- May 2022

Responsibilities:

- Develop VisualForce pages, VisualForce Custom Controller Components, Advanced Search functionality, Custom Objects, Tabs, Tags and Components.
- Written numerous SOQL and SOSL queries using with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
- Experience with working on AppExchange platform.
- Developed Apex Triggers, Apex Classes and Test Methods using Sync/Async methods.
- Customized dashboards to provide daily forecasts and track opportunities, deal registrations and customer engagement.
- Maintained data cleanliness and accuracy by adding custom validation rules, custom formulas.
- Involved in various activities of the project, like information gathering, analyzing the information, documenting the functional and non-functional requirements.
- Written numerous SOQL and SOSL queries using Force.com explorer.
- Involved in the entire SDLC using agile methodologies.
- High End Process and Application Customization using Apex & Visualforce.
- Involved in authorizing Test strategy and Test plan.
- Customized the Dashboards to the track usage for productivity and performance of business centers and their sales teams.
- Created pick lists, dependent pick lists, lookups fields, junction objects, master detail relationships, validation and formula fields.
- Migrated data from Legacy Systems to Salesforce CRM using data loader.
- Designed solution and configured Salesforce.com Case, Solution, PRM & Customer portal Modules.
- Mainly worked with CASE Management in SFDC.
- Experienced in sales cloud by adding object, Fields, Tabs, Reports, and Dashboards and migrate data into Salesforce.
- Developed Visualforce page using the extension controller according to the clients' requirement.
- Developed the web front end layer using JSP, JavaScript for the registration application where different users, employees, contractors, and clients can login to their maintenance pages and manage their accounts.

Tesco

Nov 2016 to Mar2018

Role: Senior Software Developer/Administrator

Project Name: PA Process

Responsibilities:

- Designed, developed and deployed the Custom objects, Page layouts, Custom tabs, Components, Visual Force Pages, Apex classes & Triggers to suit to the needs of the application.
- Worked with functional leads to transform and develop new requirements into design, implementation.
- Working Knowledge on Sales Cloud, Service Cloud, Custom Cloud and Apex Programming on Force.com Platform.
- Defined the lookup relationship and master-detail relationship on the objects that helps in associating the record and defining a parent-child relationship in which the master object controls certain behaviors of the detail object respectively.
- Used Data Loader, Informatica cloud connector to insert, update and bulk import & export of data from Salesforce.com SObjects.
- Created Command Links and Buttons.
- Created different Chatter groups for different sales channels to make it easier for salespeople to stay on top of a plethora of offers and promotions, including everything from poker tournaments to slot tournaments all over the country
- Began using Chatter to collaborate around special events at casinos throughout the U.S.
- Loaded several communications templates and created dashboards so users could easily track performance metrics in real time
- Integrated with multiple systems, including a casino management system and a hotel management system
- A custom app for room reservations called 'Roomforce' that grew to handle 100,000 reservations per year.
- A human resources app to manage talent acquisition.
- Built the following custom apps on the Salesforce platform:
- Created various workflow rules
- Created custom reports and dashboards.
- Trained end users whenever new features introduced in Salesforce.
- Interacted with SFDC premium tech support team in regular basis.

Accenture (Client: Cisco)

Feb 2014 to Nov 2016

Project Name: GA Audit Process

Role: Software Engineer

Responsibilities:

- Worked with Healthcare Clients in Automating their claims workshop for Adjustment, Adjudication and fixing customer data in database processes using third-party information.
- Understanding Health-Care Payer Procedures and their implementation principals.
- Created a new infrastructure to automate the whole process, in order reduce and increase the efficiency with Encrypted data security.
- Created the DATABASE setup to trace the results of transactions performed by Bots.
- Used applications related to Spreadsheets, Email Automations & Audit of log files integrated with data analytics.
- Implemented UiPath Orchestrator for deployment, monitoring, and management of UiPath Robots automation activity.
- Create and integrate features for our enterprise software solution using UI Path RE Framework

- Worked with the Business Analysts in identifying and defining the requirements. Extensively worked on a debugging application for fixing bugs and Production support.

Wipro (Client: Vodafone)

Sep 2011 to Feb 2014

Project Name: Sales Marketing

Role: Software Engineer

Responsibilities:

- Implemented all the Basic, Desktop, web recordings using numerous activities and Flow charts using UiPath.
- Work experience in using different activities in UIPATH, mainly on Database, Web and Windows Applications, Excel, PDF etc.
- Worked on usage of different Screen Scraping methods (Full text, Native and OCR) in UiPath studio for extracting data.
- Document business requirements and user manual for the current solution application
- Effectively identify, debug, and resolve bug issues in UIPATH Studio using the debugger.
- Gather and track data on business processed before and after the automation, to measure the effectiveness of the new BOT, as well as gathering business data for further analysis.
- Develop steps to perform a Proof of Concept (PoC) and handle the data in database management, Email automation and Step-Logs for trace purposes.
- Developed the Test Case Documents for used to validate Robust RPA solution.
- Conducted UAT Testing procedures to assist in Developing & Delivering Robust RPA solution.
