

FANNY SUH

SENIOR DATABASE ADMINISTRATOR

Hyattsville, MD, USA | fanny.suh10@gmail.com | 202-766-9275

SUMMARY:

Senior Database Administrator with over 8 years of experience managing enterprise database environments with a focus on Software AG Adabas and Natural administration, Natural Security, and SQL Server ecosystems. Skilled in database performance tuning, backup and recovery, and implementing role-based access controls in regulated environments. Demonstrated success managing environment refreshes, disaster recovery planning, and data access tools such as CONNX for Adabas integration. Adept at troubleshooting complex database issues, ensuring SDLC compliance across dev/test/prod, and maintaining comprehensive documentation for audits and data governance.

WORK EXPERIENCE:

Open Systems Health Care

2025 - Present

Database Administrator

- Administer Adabas and Natural databases in production and non-production environments, ensuring system integrity and optimized performance.
- Configure and maintain Natural Security for user authentication, permissions, and role-based access control.
- Implement environment refreshes, database backup and restore operations, and support DR drills for critical systems.
- Conduct performance tuning and scripting using Natural utilities and SQL optimization techniques.
- Collaborate with cross-functional teams to manage SDLC changes, production deployments, and patch implementations.
- Develop and maintain system documentation, audit reports, and database configuration guides for compliance readiness.
- Utilize CONNX for Adabas data integration and support secure access between applications.

EMARK Security Services

2020 – 2025

Senior SQL Server DBA

- Installed, configured, and maintained Adabas, Natural, and SQL Server databases to support enterprise applications.
- Managed database security through Natural Security, role-based access models, and user provisioning for regulatory adherence.
- Led backup, restore, and environment refresh activities ensuring consistent availability across dev/test/prod environments.
- Implemented performance tuning, space management, and predictive maintenance to optimize Adabas and SQL Server systems.
- Collaborated with developers and system admins to ensure adherence to change control processes within the SDLC framework.
- Participated in audit reviews and documentation of data access, ensuring compliance with organizational and security standards.
- Supported and optimized Software AG tools such as Predict and EntireX for database modeling and DDM management.
- Provided mentoring to junior DBAs and contributed to process improvements for better data governance and operational resilience.

EDUCATION:

National Polytechnic Bamenda – Cameroon

2006–2008

- HND in Telecommunications and Networking, Minor in Computer Science

Kiawitech IT Academy

2018

- Database Administration

SOFTWARE & SKILLS:

SQL Server Installations | Performance Tuning and Security | HA/DR Strategies | Project Management | Analytical and Problem-Solving | Teamwork & Public Relations | Time Management | Leadership | Adaptability | Effective Communication | Critical Thinking
