

FILMON TESFAY

+1 (628)-688-2710 || Fairfield, Iowa 52556 || Filiyo1991@gmail.com || [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Java Developer with **6+ years of experience** designing, developing, and deploying **enterprise-scale distributed applications** across financial, SaaS, and global business environments. Proven success in **modernizing monolithic platforms to scalable microservices**, optimizing API performance by up to **40%**, and accelerating feature delivery by **25–35%** in Agile product teams. **Spring Boot, React, Node.js, Kubernetes, AWS, and CI/CD automation.** AWS Certified Cloud Practitioner and AWS Certified Developer – Associate.

PROFESSIONAL EXPERIENCE

Full Stack Java Developer, **Wells Fargo – New York, NY** | *Jun 2023 – Present*

- Designed **event-driven applications** using **Spring Boot, Kafka, and Java**, enabling real-time data streaming and reducing downstream application latency by **40%**.
- Authored an **internal support chatbot** using **OpenAI API + React**, automating **30%** of recurring ticket queries and cutting resolution time by **25%**.
- Delivered **6+ enterprise web apps** as part of a 10-member Agile team, accelerating feature delivery speed by **35%** using **React, Node.js, Spring Boot, and REST APIs**.
- Revamped **40+ secure RESTful APIs** with **JWT/Spring Security**, reducing API response times by **28%** and improving access control consistency.
- Enhanced UI for customer servicing portal using **React, Redux, Hooks**, lowering support call volume by **22%** through improved usability and workflow clarity.
- Tuned **PostgreSQL and MongoDB** queries and indexing strategies, reducing data retrieval times by **25%** across high-traffic systems.
- Integrated **Jenkins CI/CD pipelines with OpenShift**, cutting deployment cycle time by **20%** with automated smoke testing and approval gates.

Full Stack Java Developer | **Infosys Limited – Dallas, TX** | *Oct 2022 – May 2023*

- Designed, developed, and maintained **RESTful Java microservices** using **Spring Boot** and **Hibernate**, improving response times by **30%** and supporting seamless integration with frontend applications and third-party APIs.
- Engineered **scalable backend components** on **AWS EC2 and Elastic Beanstalk**, ensuring 99.9% service availability and optimized resource usage through load balancing and auto-scaling policies.
- Implemented **database integration** using **MySQL and PostgreSQL**, optimizing queries, indexing, and connection pooling that resulted in **25% faster data retrieval and processing performance**.
- Transformed **JUnit and Mockito** to develop and execute unit and integration tests, improving code reliability and achieving **over 85% test coverage** across critical modules.
- Applied **secure coding standards** following **OWASP best practices**, identifying and mitigating vulnerabilities during the development lifecycle to maintain compliance with internal security guidelines.
- Application logging and monitoring setup** using **ELK Stack and Prometheus**, providing real-time insights into application performance and reducing production incident resolution time by **40%**.

Full Stack Java Developer, **Liya Enterprise LTD – Asmara, Eritrea** | *Jan 2018 – Oct 2021*

Full Stack Java Developer - Senior (Oct 2020-Oct 2021)

Full Stack Java Developer - Junior (Jan 2018- Sep 2020)

- Developed enterprise applications used by **10,000+ daily users**, using **Java (Spring MVC, Hibernate), Angular, and REST APIs**.
- Built ETL pipelines and backend workflows in **MySQL/PostgreSQL**, improving data processing throughput by **35%** and ensuring consistency for financial reporting.
- Migrated legacy monolithic products to **microservices architecture**, reducing application downtime by **20%** and improving release agility.
- Implemented **OAuth2 + Spring Security** authentication, strengthening data protection and regulatory compliance.
- Automated deployments with **Jenkins + Docker**, cutting manual deployment effort by **50%** across all environments.

- Practiced **TDD (JUnit, Selenium)** and collaborated in **Agile Scrum**, achieving **95% sprint completion rate** and increasing overall product stability.

CORE SKILLS

- **Programming & Frameworks:** Java (Spring Boot, Spring MVC, Hibernate), JavaScript (React, Angular, Node.js), Python, TypeScript, HTML5, CSS3.
- **Cloud & DevOps:** AWS (EC2, S3, Aurora, IAM, Secrets Manager), Docker, Kubernetes, OpenShift, Terraform, Jenkins, GitHub Actions.
- **APIs & Architecture:** REST APIs, Microservices, Kafka-Based Event Streaming, Distributed Systems, OAuth2 / JWT Security.
- **Database & Data Engineering:** PostgreSQL, MySQL, SQL Server, Aurora, ETL Workflow Design, Query Optimization.
- **Testing & Quality:** JUnit, Mockito, Selenium, Playwright, TDD, Performance Testing.
- **Collaboration:** Agile Scrum, Jira, Confluence, Peer Mentoring, Cross-Functional Team Leadership.

EDUCATION & CERTIFICATIONS

Maharishi International University – Fairfield, IA	
Master of Science in Computer Science —	<i>In Progress (Expected Jun 2026)</i>
Eritrean Institute of Technology – Asmara, Eritrea	
Bachelor of Science in Computer Science —	<i>Aug 2015</i>
AWS Certified Developer – Associate
