| Seaford, New York (US Citizen) |

Profile

Senior Software Engineer with 8+ years of comprehensive experience in building robust, scalable web applications using Python, JavaScript, Django, Fast API, and Flask. Demonstrated expertise in architecting full-stack solutions that balance performance, maintainability, and exceptional user experience. Adept at tackling complex technical challenges with innovative, efficient solutions while fostering collaboration in fast-paced, agile environments. Passionate about continuous learning and leveraging cutting-edge technologies to deliver impactful software that drives business success.

SKILLS

- **Backend:** Python, Django, Flask, Fast API, Ruby on Rails, Node.js, DRF
- **Frontend:** HTML/CSS, JavaScript, TypeScript, React.js, Angular, jQuery, Vue.js,
- **Database:** PostgreSQL, MySQL, MongoDB, DynamoDB, SQLite, Redis, Elasticsearch
- **Cloud & DevOps:** AWS (S3, Lambda, EC2, RDS, ECS) Docker, Kubernetes, CI/CD (Jenkins, GitLab CI)
- **Machine Learning:** TensorFlow, PyTorch, NumPy, Pandas, OpenCV, NLTK
- **Version Control:** Git, GitHub
- **Project Management:** Agile (Scrum, Kanban), JIRA
- **Monitoring & Testing:** Datadog, New Relic, Pytest, Jest, Selenium

EXPERIENCE

Agile Ninja Consulting

January 2023 - Present

Senior Software Engineer

- Developed 5 web applications using Python, Django, and React, delivering high-performance solutions on time.
- Reduced infrastructure costs by 20% and increased application performance by 40% by migrating legacy services to AWS using Lambda, ECS, and RDS.
- Designed scalable backend APIs with Django and Flask, boosting system efficiency by 30%.
- Amplified indexing strategy, reducing slow queries by 60%, which enhanced backend performance during high-traffic scenarios.
- Executed
- Responsive features, ensuring a seamless user experience across 10+ device types, increasing mobile traffic by 20%.
- Provided one-on-one coaching, resulting in 3 junior engineers promoted to mid-level roles within a year.
- Introduced application performance, reducing response times by 15% through code optimization.
- Resolved critical cross-team technical challenges, ensuring reliable functionality and a 25% improvement in client satisfaction.

Techlogixsoft

December 2019 – December 2022

Software Engineer

- Improved pipeline efficiency, enabling the development team to focus more on feature development, resulting in a 25% increase in overall productivity.
- Applied indexing and query optimization techniques, resulting in a 50% decrease in slow-running queries system stability.
- Enhanced frontend components, improving load times by 30% and contributing to a faster, more fluid user experience, leading to a 15% increase in returning users.

- Established CI/CD pipelines, streamlining deployments and accelerating application delivery by 30%.
- decreased deployment times by 50% through enhanced modularity and Elevated code, making it easier to onboard new developers and decrease time spent on debugging.
- Built serverless backend solutions on AWS Lambda and API Gateway, reducing operational costs by 25%
- Simplified sprint planning and daily stand-ups, improving communication and ensuring alignment across teams, which directed to a 15% reduction in project timelines.
- lessened cycle time by 25% by introducing continuous integration and delivery (CI/CD) pipelines, enabling quicker testing and faster deployment.
- Made more efficient API communication, resulting in faster data exchange between frontend and backend, improving overall platform responsiveness by 25%.

Dartican

January 2017 – December 2019

Backend Engineer

- Acquired expertise in backend and frontend technologies, enabling the efficient resolution of 30+ technical issues and reducing feature delivery time by 20%.
- Fostered a collaborative development culture, enhancing team productivity by 25% through knowledge sharing and consistent review processes.
- Automated testing workflows, ensuring continuous integration and reducing manual testing time by 40%, contributing to quicker release cycles.

Education

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Projects

Bigger Pockets | <https://www.biggerpockets.com>

- Implemented key features, including community forums and investment calculators, which led to a 40% increase in user registrations and a 50% boost in returning users.
- Spearheaded the project to achieve over 2 million members.
- streamlined platform functionality by integrating new APIs and improving existing workflows, leading to a 25% reduction in user-reported issues and refined user satisfaction.

Oak Street Health | <https://www.oakstreethealth.com>

- Optimized mobile and desktop versions to enhance accessibility for older adults, leading to a 20% reduction in user drop-off rates during registration and activity tracking, resulting in upgraded user retention and engagement.

Circle | <https://www.circle.so/>

- Optimized backend performance, allowing for real-time discussions and streaming with zero latency for up to 10,000 simultaneous users.
- Better-quality backend API performance, reducing response times by 20%
