

Location

Jacksonville, FL

Phone

(904) 586-8656

Email

frankaslanjax@gmail.com

Core Competencies

Threat Analysis & Response, Vulnerability Management, Incident Response & Mitigation, Firewall & Network Security, Risk Assessment, Regulatory Compliance, Technical Documentation, Security Awareness Training

Technical Proficiencies

Splunk Enterprise Security, Splunk SOAR, IBM QRadar, SentinelOne, CrowdStrike Falcon, Proofpoint, Jira, Tenable.io, Nessus, Python, MySQL, OWASP 10, MITRE ATT&CK, Cyber Kill Chain, SANS, NIST, Wireshark PCAP Analysis

Certifications

CompTIA Security Analytics Professional (CSAP), CompTIA CySA+, CompTIA Security+, Splunk Core User, Fortinet Certified Associate (FCA), Armis Cyber Defense Core

Education

Master of Computer Science in Cybersecurity (Ongoing)
North American University, Houston, TX
Bachelor of Science in Physics
Marmara University, Istanbul, TR

Frank Aslan

Cybersecurity Analyst

Professional Summary

Certified cybersecurity professional with over 3+ years of hands-on experience in monitoring and protecting enterprise networks, detecting and neutralizing threats, and implementing robust security frameworks.

Demonstrates expertise in advanced threat detection methodologies, incident response, and vulnerability management. Adept at aligning security practices with industry standards to enhance organizational resilience. Strong communicator and collaborative team player committed to safeguarding digital assets.

Experience**September 2023 - Present**

Security Operations Center Analyst | CyberNow Labs | Sterling, VA

- Conducted in-depth analysis of network traffic using advanced monitoring tools to detect and mitigate potential security breaches, ensuring uninterrupted business operations.
- Monitored enterprise-level networks for suspicious activity using advanced SIEM tools, ensuring swift detection and mitigation of security incidents.
- Implemented EDR solutions like SentinelOne and CrowdStrike Falcon to enhance endpoint security and proactively defend against malware threats.
- Responded to cybersecurity incidents by analyzing log data, determining root causes, and implementing corrective actions to prevent recurrence."
- Developed and enforced security policies and procedures, ensuring compliance with NIST and ISO 27001 standards across all departments.
- Managed email security platforms such as Proofpoint to block phishing and spam attacks, ensuring the integrity of organizational communications.

August 2019 - September 2023

IT Security Assistant | River City Science Academy | Jacksonville, FL

- Leveraged SentinelOne EDR to proactively monitor endpoints, detect threats, and implement timely prevention measures to safeguard organizational assets.
- Performed detailed phishing email analysis to identify and neutralize threats, bolstering overall network security and user protection.
- Collaborated with cross-functional teams to design, develop, and implement robust security protocols, ensuring compliance with industry standards.
- Administered and optimized the Radix Learning Management System (LMS), streamlining user account management and resolving platform issues to enhance functionality.
- Integrated security tools and frameworks, such as OWASP and MITRE ATT&CK, into the organization's incident response strategies to enhance threat detection capabilities.
- Configured and maintained firewalls, IDS/IPS systems, and network monitoring tools, ensuring robust defense against external and internal threats.

August 1998 - August 2019

Assistant Director | FEM Educational Institute | Istanbul, TR

- Directed the successful implementation of digital appointment systems, streamlining scheduling processes and enhancing operational efficiency.
- Partnered with cross-functional teams to design and enforce security protocols, ensuring adherence to industry best practices and regulatory standards.
- Spearheaded the integration of SmartBoard technologies into educational curricula, enhancing learning experiences while maintaining robust system security measures.
- Developed comprehensive technical documentation and reports detailing incident response processes, threat analysis findings, and security improvement plans for stakeholders.
