

WORK EXPERIENCE

Amazon Web Services

Jun 2025 - Sep 2025

Software Development Engineer Intern

- Develop a **CDK pipeline** in **TypeScript** and leverage **Lambda and Step Functions** to deploy tens of thousands of AWS Glue table partitions, eliminating manual management and reducing errors
- Implemented automation scripts to clean unused AWS Glue tables and exported active table metadata into JSON for direct **CDK pipeline** integration, significantly reducing manual intervention time
- Restructured **Redshift Spectrum** testing by separating dynamic and static resources and enforcing strict permission controls, achieving a 100% regression pass rate

Morrison Express

Feb 2021 - Aug 2024

Software Engineer

- Engineered 15+ **Python Flask microservices** to replace on-premises legacy systems, improving development efficiency and enabling rapid iteration of new features
- Led a team of 3 engineers to build event-driven services using **AWS Lambda, SNS, and SQS**, integrating with **Step Functions** to reduce processing time by 40% and double system workload capacity
- Optimized **SQL** queries and refactored code for read-write separation, enabling **RDS** downgrading and cutting monthly budget by 12%
- Spearheaded the development of a **CI/CD pipeline** leveraging Jenkins and AWS for a new Data Warehouse, achieving high deployment success rate and reducing deployment time
- Implemented **MySQL** binlog replication to separate the OLAP for analytics, segregating reporting and application queries, while reducing CPU usage of the OLTP database by 40%
- Refactored **Java Spring Boot monolithic service** by implementing circuit breakers and **JVM** memory optimization, achieving a consistent 98% uptime

Gogoro

Apr 2020 - Jan 2021

Software Engineer

- Facilitated the backend team and collaborated with the solution team to build a scalable data platform leveraging **RESTful APIs** and **Java Spring Boot microservices**
- Improved API test automation by implementing **JUnit** tests with mocked dependencies, integrated into the CI/CD pipeline, reaching 90% test coverage

EDUCATION

Oregon State University

Sep 2024 - Expected Jun 2026

Master of Engineering, Computer Science

GPA: 4.0/4.0

- Coursework: Algorithms and Data Structures, Parallel Programming (**C++**), Operating Systems (**Linux**), Database Systems (**C++**), Machine Learning, High Performance Computer Architecture (OpenMP)

SKILLS

- **Programming Languages:** Python, Java, C#, TypeScript, C++
- **Web Frameworks:** Flask, FastAPI, Spring Boot, ASP.NET, React.js, Next.js
- **Databases:** MySQL, PostgreSQL, Microsoft SQL Server, Amazon DynamoDB, MongoDB
- **DevOps & Tools:** AWS, Redis, Docker, Jenkins, Ansible, Sentry, Git, Jira, Kubernetes, Apache Kafka

SELECTIVE PROJECTS

SCRIBE

Nov 2024

Hackathon at Oregon State University

- Developed an all-in-one web application using **Next.js**, **OpenAI API**, and **Web Speech API** to seamlessly convert lectures into text, enabling real-time transcription, note-taking, and content analysis

CERTIFICATIONS

AWS Certified Solutions Architect - Associate 

Mar 2024
