PROFESSIONAL EXPERIENCE

Lenovo – Morrisville, NC

Workday Finance Techno-Functional Consultant

(April 2023 – March 2024)

- Led the end-to-end implementation of Workday Accounting Centre, Banking & Settlement, Procurement, and Expenses modules to support Lenovo's global finance operations.
- Designed and configured journal entries, intercompany transactions, reconciliations, and allocations aligning with corporate accounting policies and GAAP standards.

- Built custom dashboards and composite reports for CFO, Controllers, and FP&A teams to monitor cash flow, operating expenses, and compliance KPIs.
- As a Workday integration Developer, I developed and migrated integrations with Oracle ERP and global banking systems using EIB, Core Connectors, and Workday Studio, ensuring seamless financial data exchange. Performed QA and unit testing to ensure data accuracy.
- Partnered with Treasury and AP teams to automate payment processing and reconciliation, reducing manual effort by 30%.
- Configured Supplier Accounts and Procurement workflows, enabling efficient Procure-to-Pay (P2P) operations.
- Supported Financial Close & Consolidation processes in Workday, ensuring on-time month-end and quarter-end reporting.
- Conducted user training sessions for Finance and Accounting teams, ensuring adoption of Workday features across 15+ global business units. Documented the training sessions and created user manuals to ensure knowledge transfer.
- Implemented **Workday Audit & Compliance reports** to meet global statutory reporting requirements across 10+ regions.
- Automated **intercompany settlement and reconciliation processes**, reducing close cycle time by 20%.
- Partnered with external vendors and internal IT to integrate **credit card and payment gateway systems** with Workday Financials.

Capital One – McLean, VA

Workday Finance Techno-Functional Consultant.

(January 2022 – March 2023)

- Supported the rollout of Workday General Ledger, Supplier Accounts, Customer Accounts, and Expenses modules across Capital One's enterprise finance organization.
- Designed and configured business processes for vendor invoices, customer billing, and expense approvals, reducing cycle times by 20%.
- Built Advanced and Matrix reports for Finance, Audit, and Risk teams covering expense compliance, SOX reporting, and supplier spend analysis.
- Managed data conversion and validation for suppliers, customers, and journal entries during migration from legacy systems.
- Configured domain and BP security policies to ensure role-based access and data confidentiality in financial transactions.
- Collaborated with Audit and Compliance teams to build regulatory reporting dashboards aligned with SOX and internal controls.
- Created and deployed financial integrations (bank files, payroll posting, credit card feeds) using APIs (REST and SOAP) to ensure accuracy of daily financial operations.
- Partnered with Business and IT stakeholders to deliver change management workshops, ensuring smooth adoption of new Workday Finance processes.
- Developed **Prism Analytics dashboards** for finance leadership to track spend, expense trends, and operational KPIs.
- Led **UAT workshops and training sessions** for Finance teams, ensuring adoption of Workday Financials across 12 departments.
- Supported **quarterly regulatory filings** by building Workday reports that reduced manual reconciliation effort by 30%.

T-Mobile, Seattle, USA

Workday HCM Techno-Functional Consultant

(September 2021- Dec 2022)

- Supported Workday Core HCM modules (Hire, Job Change, Termination, Compensation, Benefits).
- Designed and configured Workday business processes and supervisory organizations.
- Built advanced, composite, and matrix reports, and dashboards for Payroll, Absence, Recruiting, and Performance.
- Configured and tested Compensation including salary, allowance, bonus, and commission plans.
- Created and managed Role-Based and Job-Based Security Groups; implemented Domain and BP Security Policies.
- Utilized Calculated fields and developed custom reports using RaaS to provide insights into key

- HR metrics, improving decision-making by 10%.
- Resolved production issues, enhanced configurations, and ensured compliance.
- Migrated integrations using EIB and Workday Object Transporter, validated data, and executed test cycles.
- Delivered analytics on turnover, compensation ratios, and workforce planning to HR leadership.
- Trained and mentored client users on Workday functionalities.
- Configured **Absence Management and Payroll integrations** ensuring accuracy in time-off accruals and payroll processing.
- Delivered **custom Compensation and Performance dashboards** to HR executives, providing insights into pay equity and performance trends.
- Coordinated **end-user training and knowledge transfer sessions**, improving adoption and reducing support tickets by 25%.

Workday Compensation and Benefits Consultant

ADI Energy - Smithfield, RI

(June 2021- September 2021)

- Conduct discovery sessions with client to determine pain points and diagnose how Workday can provide value, and the implementation can achieve ROI.
- Configure the system, document work and walk through payroll business processes with customer
- Build and test Workday system; confirm with all necessary stake holders that all requirements are met
- Configured Workday Compensation packages and Workday benefits.
- Worked on development of critical reports on Compensation grade changes trend analysis.
- Worked on Mass Compensation changes and modifications for allowance plans and benefits.
- Created Compensation Grades to create a standard compensation range for a given job level or a job profile.
- Perform data loading; write HCM and Benefits reports ranging from Composite, Advanced, ad-hoc, etc.
- Influence and persuade new and existing customers
- Work with the business to develop specific requirements.
- Create and maintain integration design and interface mapping documents.
- Create unit test plans, unit test conditions and unit test integrations.
- Support solution and user acceptance testing.
- Deploy integration to production tenant.
- Liaison to vendors to gather Interface requirements and perform Interface testing.
- High service level expectations in support of the Workday Systems and the user community.

IBM Philippines, USAA

BI/Workday Integration Consultant

(January 2020- June 2021)

- Developed and supported **Workday integrations** (EIBs, Core Connectors, Workday Studio) across Core HCM, Time Tracking, and Recruiting modules.
- Designed and maintained data transformations and reporting solutions using XML and XSLTs to streamline HR and recruiting processes.
- Participated in **Workday release cycles**, testing integrations and functional configurations to ensure smooth production deployment.
- Collaborated with cross-functional teams (Core HCM, Compensation, Recruiting) to gather requirements and deliver scalable integration solutions.
- Automated **PII data masking processes** in lower tenants to ensure compliance and protect sensitive employee data.
- Built **custom inbound/outbound integrations** for Compensation Eligibility and Grade Profiles, reducing manual configuration effort.
- Partnered with business stakeholders to **standardize integration design documents** and improve cross-team delivery consistency.
