

Gilbert Salom

gilbert456@gmail.com :: 650.714.2771 :: gilbert.myportfolio.com

Summary: Extensive expertise in software development, including enterprise solutions, consumer products, defense, and fintech. Over eight years as a UX/Product Design Lead, proficient in Agile methodologies and Lean UX principles. Led modernization of complex legacy SaaS platform, optimizing interactions and developing scalable design systems.

Highlights: Earned Automated Intelligence for User Experience (AI for UX) Certificate through Stanford University, designed an internal setup tool achieving a 30% reduction in configuration time, start-up experience with successful SaaS portal launches across multiple countries for Telefónica and Saudi Telecom. Secured U.S. Department of Defense Secret Clearance Level.

Lead UI/UX Designer - Platform, Aravo Solutions

San Francisco, CA Jan 2021 - Jul 2024

- Led the modernization of a complex legacy SaaS platform, delivering a more intuitive user experience and streamlined navigation through stakeholder engagement and contextual research
- Translated requirements into actionable deliverables for the Risk Dashboard and setup Wizard, reducing configuration time by 30%, enhancing user satisfaction, and streamlining workflows
- Developed and maintained the Platform Design System for designers and developers to ensure consistency and scalability
- Championed user-centric design, informed by data analytics, and feedback from users and technical account managers
- Created proof-of-concept prototypes and presented designs to executives, building consensus across teams
- Optimized interactions with large datasets using AG Grid and Highcharts, enhancing workflow efficiency and usability
- Managed consultant workflows to meet deliverables and timelines effectively
- Created AI designation communicating trust, transparency, brand alignment and interactivity

Research Lead, Electronic Arts (project)

Redwood City, CA Oct 2020 - Dec 2020

- Led UX research and strategy for the Electronic Arts Developer Portal (EADP), defining a "North Star" vision to optimize the Developer Experience
- Collaborated across Product and Developer teams to drive discussions, activities, and planning, leveraging developer feedback and competitive analysis to inform decisions
- Applied comprehensive UX skills, including problem discovery, wireframing, heuristic evaluation, and gap analysis to identify improvements and align the experience with business goals

Senior Product Designer, Automation Anywhere Incorporated

San Jose, CA Sept 2019 - Jul 2020

- Led the design and launch of multiple enterprise bot marketplaces, ensuring consistency and usability through established design patterns, research insights, and style guide documentation
- Developed a design system for the enterprise bot store and supported the GA launch of the public bot marketplace, enhancing workflow efficiency and usability
- Introduced an industry-first bot security program, including product security classification and program details, and collaborated with cross-functional teams to define the vision and integration of a multi-product platform

Senior User Experience Designer, Apple (contract)

Sunnyvale, CA Mar 2019 - Jul 2019

- Led the comprehensive redesign of a legacy security product to enhance application speed and load balancing, addressed user pain points, and improve user satisfaction
- Collaborated with administrators, principal architect, product managers, and engineering teams to align technical requirements and user needs, ensuring seamless integration and streamlined workflows
- Designed and iterated on concepts, flow diagrams, and wireframes, fostering cross-functional alignment and feedback, and proposed optimized configurations

(continued)

Senior User Experience Designer, PayPal Incorporated (contract)

San Jose, CA Feb 2018 - Dec 2018

- Designed a Partner Onboarding experience, collaborating with Product, Content and Development teams, enhancing user experience, ensuring compliance, and actionable design directions – launched in 39 countries
- Partnered with Country Marketing and Research to define requirements, create testing scripts, and prototype solutions for FinCEN (Financial Crimes Enforcement Network) compliance and CIP implementation (Customer Identification Program)
- Presented usability findings to the Design organization and delivered final assets for engineering
- Proposed changes to the design systems board to ensure visual consistency and scalability across the onboarding experience
- Mentored new designers and led Agile backlog and planning sessions in Rally

Senior User Experience Designer, ItsOn Incorporated

Redwood City, CA Aug 2013 - Mar 2017

- Gained start-up experience with successful SaaS Portal launches across multiple countries for Telefónica and Saudi Telecom
- Designed a SaaS Portal enabling mobile operators to configure device behaviors and create consumer products
- Translated business requirements into wireframes for desktop and mobile devices in an Agile environment, ensuring alignment with development and streamlined implementation
- Conducted usability testing, refined designs, maintained design guides to ensure consistency and scalability

Senior Visual Designer, Wells Fargo Wholesale Services (contract)

San Francisco, CA Dec 2012 - Aug 2013

- Created visual designs for web and mobile products, ensuring concepts met product requirements
- Optimized Android tablet flows for research products
- Delivered pixel-perfect assets and interaction documents for front-end development

Senior Visual Designer, PayPal Incorporated (contract)

San Jose, CA Dec 2010 - Nov 2012

- Created mockups and pixel specifications, validated concepts with user testing, aligned business and legal requirements
- Validated standards-compliant patterns for consistency, ADA accessibility, and code efficiency, enhancing overall user experience
- Developed complaint wizard in LeanUX, improving user interaction and satisfaction

Freelance Designer: Barnes & Noble Digital Products, Cisco Systems, Edgile Inc

Bay Area, CA May 2009 - Dec 2010

- Consumer launch team of the NOOK Color™ for Barnes & Noble Digital Products
- Coordinated development with off-shore teams, ensuring timely delivery and quality of assets
- Created executive sales briefings for Chuck Robbins' use in Global Sales Experience (GSX 2009) and IPTV
- Developed web graphics for email campaigns and product initiatives

Lead Visual Designer, Lockheed Martin

San Jose, CA July 2007 - March 2009

- Developed satellite communication portal interactions and graphics using HTML, CSS, ActionScript, and Ext.js, ensuring seamless user experience and visual consistency
- Translated requirements into designs, creating low and high fidelity prototypes for proof of concept demonstrations, enhancing usability and stakeholder alignment
- Quickly grasped underlying framework and design implications, including Sun Portal, Ext.js, and AJAX, to deliver efficient and scalable solutions

BFA, University of San Francisco; Academy of Art University, Graphic Design

Figma, Sketch, Miro, OmniGraffle, Adobe Creative Suite, Microsoft Office, Adobe XD, InVision, Zeplin, Keynote, Rally and Jira. Familiar with Word Press, Highcharts, AG grid, Bootstrap, Angular, HTML, JavaScript, CSS, SQL. Coursework: Data Analytics, Programming Bootcamp and Automated Intelligence for User Experience Design Essentials through Stanford Online.
