

Gold Deborah Oluwadimu

IT SUPPORT SPECIALIST

Chicago, IL | 312.632.0310 | golddeborah63@gmail.com | [linkdein.com](https://www.linkedin.com/in/golddeborah63/)

Summary

Dedicated IT professional with a solid background in information technology, experienced in providing technical support and managing network systems. Skilled in diagnosing and resolving issues efficiently, enhancing system performance, and ensuring compliance with security protocols. Known for a strong commitment to improving user experiences and leveraging technology to solve complex problems. Eager to contribute expertise in a dynamic environment while continuing to grow in the field.

Experience

Plus Acuity, Lagos, NG | IT Support Specialist

Apr 2023 - Sept 2024

- Resolved over 95% of technical support requests within the first contact through in-person interactions, phone calls, and Teams communications, improving user satisfaction ratings.
- Monitored and resolved network systems, achieving 99.9% uptime over a year, which enhanced overall operational efficiency.
- Conducted training sessions for over 50 staff members on new software and systems, resulting in a 30% increase in user proficiency and a reduction in support requests.
- Conducted regular system audits that uncovered and addressed security vulnerabilities, leading to a 50% decrease in security incidents over a six-month period.
- Established a remote support protocol that enabled resolution to 70% of issues without on-site visits, significantly reducing travel time and costs.

Hacktify, Remote | Cybersecurity Intern

Feb 2024 – Mar 2024

- Performed vulnerability scans and penetration testing, identifying IDOR and clickjacking weaknesses while following ethical hacking guidelines.
- Collaborated with senior analysts to analyze security logs, enhancing incident response strategies and threat detection.
- Assisted in configuring security tools such as firewalls and IDS, contributing to the organization's overall security framework.
- Exploited vulnerabilities like HTML injection and XSS in simulated environments, demonstrating knowledge of web security threats.

Digital Autonomy Information Technology, NG | Network Engineer

Nov 2022 – Mar 2023

- Configured and maintained Cisco devices for enterprise networks, successfully completing projects at Mountain Top University and NDDC, which improved network performance by 40%.
- Designed and implemented network solutions for a facility serving 1,000 users, achieving a 99.9% uptime and enhancing connectivity across all departments.
- Conducted regular network performance assessments, leading to the identification and resolution of bottlenecks that improved data transfer speeds by 30%.
- Managed network inventory documentation, improving resource allocation accuracy by 25% and streamlining equipment tracking processes.

Mountain Top University, NG | IT Technician

Oct 2021 – Oct 2022

- Installed and configured over 50 hardware and software components, including printers and scanners, achieving a 100% integration success rate with existing systems.
- Solved system security issues by applying updates and patches, ensuring that 95% of devices were compliant with the latest security standards, thereby minimizing vulnerabilities.
- Facilitated Computer-Based Testing (CBT) for over 200 students, utilizing Learning Management Systems (LMS) to ensure a smooth examination process with a 98% satisfaction rate from participants.
- Conducted routine maintenance on over 100 devices, resulting in a 30% decrease in hardware failures and extending the lifespan of equipment.

Education

Caleb University, Lagos, NG

Sept 2021

B.Sc. Computer Science | GPA 4.60

Skills

- Customer Service Skill
- Troubleshooting and Problem Solving
- Operating Systems Knowledge: Proficiency in Windows, macOS, and Linux environments.
- Networking Basics: Understanding of TCP/IP, DNS, DHCP, and basic network troubleshooting.
- Remote Support Tools: Experience with TeamViewer, AnyDesk, or LogMeIn.
- Antivirus and Security Software: Experience with tools like Norton, McAfee, or Bitdefender.
- Network Configuration and Management: Proficiency in configuring routers, switches, and firewalls.
- Network Security
- Performance Monitoring
- Knowledge of Networking Protocols
- Network Monitoring Tools: Experience with tools like Wireshark, SolarWinds, or PRTG.
- Configuration Management Tools: Familiarity with Cisco IOS, Juniper Junos, or similar.
- Virtualization Software: Knowledge of VMware or Hyper-V for network simulation.
- Risk Assessment and Management: Ability to identify and mitigate security risks.
- Incident Response: Skills in responding to and managing security breaches.
- Knowledge of Security Frameworks: Familiarity with NIST, ISO 27001, or CIS benchmarks.
- Security Information and Event Management (SIEM): Experience with tools like Splunk, LogRhythm, or IBM QRadar.
- Firewalls and Intrusion Detection Systems: Knowledge of Cisco ASA, Palo Alto, or Snort.
- Encryption Tools: Experience with tools like BitLocker for data protection.
