

Gouthami Gongidi

Software Developer

Denton, TX | +1 (940) 465 1717 | gouthamigongidi06@gmail.com

SUMMARY

- Software Developer with around 3 years of hands-on experience in building high-performance web and enterprise applications, specializing in full-stack development with java and python technologies.
- Proficient in Java, Python and SQL, developing scalable backend solutions with frameworks like Spring Boot, Spring MVC, and Hibernate to enhance application efficiency.
- Hands-on experience in creating interactive and responsive front-end applications using React.js, Angular, and Vue.js, ensuring seamless user experiences.
- Skilled in designing and integrating RESTful APIs and microservices, improving data flow and system modularity for scalable applications.
- Knowledge of J2EE technologies, including Servlets, JSP, and JDBC, for developing secure and efficient web-based solutions.
- Expert in cloud computing with AWS, Azure, and GCP, optimizing application hosting, database management, and performance tuning with services like EC2, S3, RDS, and DynamoDB.
- Familiar with DevOps practices, leveraging tools like Docker, Kubernetes, Jenkins, and CI/CD pipelines to automate deployments and enhance system reliability.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Languages: Java, Python, SQL

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, React, Vue.JS, Node.JS, Angular

IDEs: NetBeans, IntelliJ IDEA, VS Code, Eclipse

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, TypeScript,

Bootstrap, jQuery, Ajax, JSON, XML

Cloud Tool/Application Server: AWS (VPC, EC2, S3, CloudFront, ELB), Azure, Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, MongoDB

Version Control/Other Tools: Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EDUCATION

Master of Science in Computer Science

University of North Texas

Dec 2024

Denton, TX

Bachelor of Science in Computer Science

Chaitanya Bharathi Institute of Technology

Apr 2022

Telangana, India

EXPERIENCE

Honeywell, USA | Software Developer

Aug 2024 - Present

- Designed and instigated scalable backend systems using Java and Spring Boot, optimizing application performance and ensuring seamless data processing in high-traffic environments.
- Industrialized feature-rich web applications with React and Angular, enhancing user experience and increasing front-end responsiveness by 30%.
- Integrated RESTful APIs and GraphQL services to streamline data communication between distributed systems, reducing API response times by 35%.
- Exploited PostgreSQL and MongoDB for efficient database management, implementing indexing strategies that improved query execution speeds by 40%.
- Designed and deployed microservices-based architectures, enabling modular development and improving fault isolation for enterprise applications.
- Automated cloud deployments using AWS services such as EC2, S3, etc., ensuring high availability and reducing infrastructure costs by 20%.

Mindtree, India | Software Developer

Jan 2021 - Dec 2022

- Designed, advanced, and deployed full-stack web applications, ensuring seamless user experiences and high-performance backend functionality in Agile environments.
- Optimized database interactions using Hibernate, reducing query execution time by 40% and enhancing application efficiency.
- Developed and integrated RESTful APIs and GraphQL services, enabling secure data exchange and reducing system response time by 35%.
- Executed cloud-based applications on AWS, leveraging services like Lambda, RDS, and DynamoDB to enhance system scalability and reliability.
- Optimized CI/CD pipelines using Docker and Kubernetes, reducing deployment time and ensuring automated testing for higher code reliability.
- Considered microservices-based architectures, reducing system dependencies and deployment times while improving fault tolerance and scalability.
- Conceptualized Java and Node.js to build high-performance applications, optimizing algorithms and workflows for improved processing speed.
- Automated CI/CD pipelines using Jenkins and GitLab CI, accelerating deployment cycles and ensuring code quality through continuous integration and automated testing.
