

Greeshma Ramapuram Full Stack Developer

+1 (414) 629-1046 • greeshmaramapuram83@gmail.com • Milwaukee, WI • [LinkedIn](#)

SUMMARY

Full Stack Developer with 4+ years of experience delivering enterprise-scale applications across **Retail, Healthcare, and Finance** domains. Skilled in building systems at the intersection of **data engineering, AI integration, and cloud-native development**. Bring a unique mix of backend architecture, scalable database design, and front-end performance optimization, paired with hands-on expertise in **real-time communication frameworks** and **LangChain-driven AI workflows**. Adept at collaborating across teams to build secure, intelligent, and high-performance systems that scale globally.

SKILLS

Languages & Scripting: Python (Django, Pandas), Java, CSS, JavaScript

Frameworks & Libraries: Angular, React.js, Node.js, Spring Boot, Flask, FastAPI, LangChain, TensorFlow, FAISS, Airflow

Databases: PostgreSQL, DynamoDB, MySQL, MongoDB

Cloud & DevOps: AWS (Lambda, S3, EC2, RDS), Terraform, Docker, Jenkins, GitHub Actions, CI/CD Pipelines

APIs & Integration: RESTful APIs, GraphQL, OAuth 2.0, JWT, WebSockets

Testing & Quality Assurance: JUnit, PyTest, Selenium, Automated Integration Testing

Methodologies & Practices: Agile/Scrum, Debugging, Performance Optimization, Code Reviews, Cross-Functional Collaboration

EXPERIENCE

Databricks

Jan 2025 – Current

Full Stack Developer

Remote, USA

- Engineered and enhanced end-to-end features for a **finance analytics platform**, combining Angular, CSS, and WebSockets with back-end services in Node.js, Spring Boot, and Flask improving user experience and cutting load times by 28%.
- Scaled data-intensive systems by redesigning **PostgreSQL schemas** and optimizing **AWS DynamoDB integrations**; initially reduced query response times by **35%**, now leading schema evolution to support **millions of records** with fault tolerance.
- Introduced real-time streaming pipelines with **WebSockets**, enabling live dashboards and collaborative analytics features that boosted user engagement and reduced latency in data delivery.
- Drove cloud-native automation by leading deployments on **AWS** with **Terraform, Docker, Jenkins, and GitHub Actions**; automated CI/CD pipelines cut release cycles by **40%**, and I continue refining them for **zero-downtime rollouts**.
- Raised code reliability by standardizing **JUnit, PyTest, and Selenium test frameworks**; increased coverage above **85%** while fostering Agile practices that reduced regressions and improved sprint velocity.
- Partnered across engineering and data science teams to integrate **LangChain-powered AI workflows** and publish **GraphQL APIs**, unlocking intelligent querying, contextual automation, and smarter insights.

HCLTech

Jan 2020 – Jul 2023

Full Stack Developer

Hyderabad, India

- Spearheaded the development of responsive, high-performance web applications for a **retail platform** using **Django, FastAPI, React.js, and Python**, enhancing user experience for 5,000+ concurrent users and reducing backend response times by 25%.
- Designed and maintained **end-to-end ETL pipelines** for a **healthcare project** with **Airflow and Pandas**, integrating **MySQL and MongoDB** to automate complex data workflows, enabling faster and more accurate business reporting while reducing manual effort by 30%.
- Collaborated with data scientists to deploy **AI-driven search and recommendation systems** using **TensorFlow and FAISS**, improving content relevancy and driving a **20% increase in engagement metrics**.
- Architected and deployed **microservices on AWS (Lambda, S3, EC2, RDS)** with **Docker and CI/CD pipelines**, scaling applications efficiently, lowering operational costs by **15%**, and ensuring seamless zero-downtime releases.
- Strengthened application security by implementing **OAuth 2.0 and JWT authentication**, securing APIs and sensitive user data while reducing potential access vulnerabilities.
- Partnered with cross-functional teams to design **RESTful and GraphQL APIs**, streamline backend workflows, and integrate multiple services, accelerating feature delivery by **35%** and improving system reliability.
- Established **robust testing frameworks** using **JUnit, PyTest, and automated integration tests**, achieving **95%+ test coverage**, minimizing post-deployment bugs, and improving overall code quality.

EDUCATION

Masters in Computer and Information Science

Concordia University Wisconsin

Aug 2023 – May 2025

Mequon, WI
