

Greg Septon

San Antonio, TX • 801.735.3073 • greg.septon@maka-rth.com • [linkedin.com/in/gregsepton](https://www.linkedin.com/in/gregsepton)

Summary

Skilled in all areas of software development including 10+ years of Python backend development and database design. Significant contributor to projects through all phases of development, with project sizes ranging from startup MVPs to Enterprise applications. Strong understanding of business operations and an experienced leader with excellent communication skills.

Skills

Python • RESTful APIs • Django • Flask • Pyramid • SQLAlchemy • PostgreSQL • AWS • Backend
Redis • Elasticsearch • Kubernetes • Docker • Git • DevOps • CI/CD • Javascript • Dart/Flutter • Unit Tests
Bash • Problem Solving • Systems Administration • Windows • Linux • Leadership • Teamwork • Agile

Experience

T2S Solutions (via Insight Global) | Remote (1yr Contract) Jan 2024 - Dec 2024

Senior Software Developer

- Expanded supported features in a federated AI/ML OpenAPI Python application utilizing Flask, Pandas, Dask, Elasticsearch, and Redis, all hosted in a Kubernetes cluster in Azure
- Assisted and mentored new team members with development environment setup and familiarization with existing codebase and development tools
- Tracked down and fixed complex, long standing bugs
- Led the switch to Redis, significantly improving the reliability and consistency of the platform
- Created tests for the established code base to promote better testing practices

Guru Technologies, LLC | Layton, UT/Remote

Apr 2021 - Nov 2023

Senior Software Developer

- Developed applications for various clients using Python, Django, PostgreSQL, AWS, and Docker, as well as a mix of Dart/Flutter, TypeScript/Angular, and TypeScript/React for front-ends
- Worked with clients and project managers to develop database schemas and RESTful APIs required to meet the needs of clients
- Engineered a custom integration with QuickBooks Desktop Enterprise using SOAP and qbXML
- Managed AWS resources including EC2 instances, S3 buckets, and RDS databases
- Streamlined app testing and deployment with GitLab CI/CD
- Mentored junior developers by teaching best practices, paired programming, and responding to requests for help with various tasks

MobilSense Technologies, Inc. | Alpine, UT

Dec 2014 - Apr 2021

Software Developer

- Used Agile practices and Test Driven Development to produce RESTful APIs using Python/Pyramid/SQLAlchemy to support a Javascript/AngularJS front-end
- Owned database interactions including SQL tuning that yielded up to 300% performance gains, improving enterprise client workflows
- Developed and implemented strategy for transition to new technology stack while maintaining legacy application
- Designed and implemented PostgreSQL database schemas to support new product features, including customer payment tracking and near real time cellular data usage tracking
- Created internal tooling using Bash and Python to simplify repetitive tasks

Volunteer Experience

Event Organizer for goneMOAB 2017-2020 (Leadership and Planning)
US Army Veteran 2001-2009 (Teamwork and Leadership)
Religious Missionary 2007-2009 (Leadership and Communication)

Education

Brigham Young University Marriott School of Management | Provo, UT
Bachelor of Science, Business Management; Entrepreneurship emphasis
