USA (OPEN TO RELOCATE)

SUMMARY

Full Stack Developer with over 3+ years of hands-on experience designing, developing, and deploying scalable web and AI-driven applications. Proven expertise in building full-stack solutions using Java (Spring Boot), Python (Flask), React.js, and MySQL, with a strong focus on backend development, API integration, and cloud deployment. Recent work includes building an AI content generation tool using LangChain and LLMs, integrating semantic search with FAISS, and deploying image classification models with OpenCV and CNNs.

Sacred Heart University <i>Master of Science in Computer & Information Science</i>	USA <i>May 2025</i>
Visvesvaraya Technological University <i>Bachelor of Engineering in Computer Science</i>	INDIA <i>May 2023</i>

EXPERIENCE

Full Stack Developer <i>Softweb Solutions</i>	Oct 2024 to Present <i>CT, USA</i>
- Containerized full application stack using Docker and deployed to AWS EC2 instances; configured environment variables, automated startup scripts, and ensured model checkpoint loading at runtime, improving deployment reliability for field testing and demos. - Refactored a monolithic Python ML codebase into modular packages with setup scripts and automated test suites (pytest), increasing test coverage from 35% to 80% and reducing bugs during deployment phases. - Built and deployed an image classification system for real-time bird species detection using OpenCV, CNN models, and webcam integration; achieved 92%+ model accuracy and created a lightweight UI for non-technical users. - Developed and maintained Flask-based backend services to expose ML model endpoints, supported by Swagger documentation and robust input validation for secure and scalable API usage across multiple clients. - Integrated FAISS vector database for storing document embeddings and enabling semantic search functionality; improved response relevance and reduced retrieval latency by over 40% during QA-style queries.	
Full Stack Developer <i>PixelPlex</i>	May 2022 to Dec 2023 <i>INDIA</i>
- Built and deployed 4+ full-stack web applications using Java (Spring Boot), React.js, and MySQL, focusing on modular architecture, clean code practices, and reusable components to reduce development time on future projects. - Developed and maintained 15+ RESTful APIs to support frontend functionality, handle complex data operations, and ensure smooth communication between services with proper error handling and logging. - Reduced page load time by 30% through component optimization in React.js, implemented code-splitting and lazy loading, and minimized unnecessary re-renders for enhanced user experience. - Wrote and optimized complex SQL queries, stored procedures, and indexing strategies that improved data retrieval speed by 25%, supporting dashboards and reporting modules. - Worked closely with a 6-member Agile team, participating in sprint planning, daily stand-ups, and retrospectives, while delivering features and bug fixes within 2-week sprints under tight deadlines.	

PROJECTS

AI Content Generation Tool Python, LangChain, FAISS, LLMs 2024
AI content generation platform using Python, LangChain, and OpenAI LLMs, enabling dynamic text generation for various formats; integrated FAISS for semantic search across knowledge sources, improving contextual accuracy and response relevance by 40%.
Bird Species Classification System Python, Neural Networks, Flask, OpenCV 2023
Built a real-time bird species classification system using Python, OpenCV, and custom-trained neural networks; integrated the model into a Flask web app with webcam support, achieving over 92% prediction accuracy across 50+ bird classes.

SKILLS

Programming Languages: Java (Spring Boot, Multithreading, Exception Handling), Python (Flask, AI/ML scripting), C++ (OOP, STL, Memory Management), SQL (Advanced Querying, Optimization)

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3

Backend Development: Spring Boot (Microservices, REST APIs), Flask (AI APIs), Hibernate/JPA, MVC Architecture, Authentication & Authorization

Databases & Data Management: MySQL, PostgreSQL, JDBC, ORM, SQL Server, FAISS (Vector DB), Database Design & Query Optimization

AI/ML & Data Science Tools: LangChain, OpenCV, Neural Networks, LLMs (Large Language Models), AI Pipelines, Image Classification, FAISS for Vector Similarity Search

DevOps & Version Control: Git, GitHub, CI/CD Fundamentals, Cloud Deployment (Basic), Shell Scripting (Bash)

Testing & Debugging: Postman, Unit Testing (JUnit, Mockito), API Testing, Debugging in Production Environments

Tools & IDEs: IntelliJ IDEA, VS Code, Jupyter Notebook, Maven, Gradle

Development Methodologies: Agile (Scrum, Sprint Planning, Daily Standups), SDLC Best Practices, Code Reviews, Team Collaboration

DEVELOPMENT

Java Development Certification | Udemy | 2023

- Advanced Spring Boot, Exception Handling, Multithreading, Production Best Practice

Full Stack Development Program | Tap Academy | 2022

- Complete SDLC training: Java, React.js, MySQL, Agile Methodologies, Team Collaboration

SQL & Problem Solving | HackerRank | 2022

- Advanced SQL Query Optimization, Database Design, Algorithmic Problem Solving
