

Hanisha Patel

Email: hanishap0309@gmail.com

Phone: (346)-298-5054

SUMMARY:

- Over **5 years of experience** in designing, developing, and deploying web applications using **Python**, with expertise in **Django, Flask**, and **FastAPI** frameworks.
- Strong full-stack development background, including **front-end technologies** like **HTML5, CSS3, JavaScript, AngularJS, Bootstrap**, and **jQuery**.
- Skilled in creating and integrating **RESTful APIs**, with a solid understanding of **MVC architecture** and web application patterns.
- Proficient in **object-oriented programming (OOP)**, **multithreading**, and **asynchronous programming** in Python.
- Experienced with **web scraping** using **BeautifulSoup, Requests**, and **Urllib**, and automating data extraction pipelines.
- Hands-on experience in **ETL development** and **data processing** using **Pandas, NumPy**, and **Apache Airflow**.
- Built and deployed scalable applications using **AWS services** such as **EC2, Lambda, S3, RDS, EBS, VPC**, and **CloudWatch**.
- Proficient in working with **relational and NoSQL databases**, including **MySQL, PostgreSQL, MongoDB**, and **Oracle DB**.
- Experienced in writing complex **SQL queries, stored procedures**, and **PL/SQL functions** for high-performance data operations.
- Created full-stack applications with integrated **Python, Django, MySQL**, and **Linux** environments.
- Adept in **containerization** with **Docker** and orchestration using **Kubernetes** for deploying microservices-based systems.
- Developed and maintained **CI/CD pipelines** using **Jenkins, GitHub Actions**, and **GitLab CI**.
- Proficient in **version control** tools like **Git, GitHub**, and **SVN**, ensuring streamlined collaboration and code integrity.
- Strong understanding of **PEP8 standards**, committed to writing **clean, maintainable, and well-documented code**.
- Implemented **automated testing** using **PyTest, unittest**, and contributed to **TDD/BDD** development practices.
- Familiar with **Agile/Scrum methodologies**; participated in **daily stand-ups, sprint planning**, and **retrospectives** using **JIRA**.
- Experienced in **debugging, troubleshooting**, and issue tracking through Agile boards and JIRA dashboards.
- Collaborated with **cross-functional teams**, including frontend, QA, DevOps, and product stakeholders to deliver end-to-end solutions.
- Involved in requirement gathering, writing **technical specifications**, and transforming business needs into scalable software design.
- Strong analytical and problem-solving skills with a track record of **delivering reliable, performant solutions** in production environments.

TECHNICAL SKILLS:

- **Programming Languages:** Python, JavaScript, HTML5, CSS3, SQL, XML, JSON, Bash/Shell.
- **Frameworks & Libraries:** Django, Flask, CherryPy, AngularJS, Bootstrap, jQuery, AJAX, PyQt, PyTest, NumPy, Pandas, SciPy, Matplotlib, BeautifulSoup, Urllib, Requests, SQLAlchemy.
- **Web Technologies:** RESTful API, SOAP, MVC Architecture, Web Scraping, Responsive Web Design, Jinja2 Templating.
- **Databases:** MySQL, MongoDB, Oracle DB, SQLite.
- **Data Handling & Processing:** PySpark CSV/Excel File Processing, Data Cleaning, Data Visualization.
- **Tools & Platforms:** Git, GitHub, SVN, JIRA, Jenkins, Pylint, Linux, Windows.
- **Cloud & DevOps:** Amazon Web Services (AWS) – EC2, S3, EBS, VPC, CloudWatch, ELB.
- **Methodologies:** Agile (Scrum), Test-Driven Development (TDD), SDLC.
- **Version Control & CI/CD:** Git, SVN, Jenkins.
- **Operating Systems:** Linux (Ubuntu, CentOS), Windows.

EDUCATION DETAILS:

- **Bachelor's in Computer Engineering, India** Aug 2017- June 2021
- **Master of Science in Computer Science, USA** Aug 2021 – May 2023

PROFESSIONAL EXPERIENCE:

Client: Amazon, TX

Sept 2023 - Present

Role: Sr. Python Developer

Responsibilities:

- Developed microservices using FastAPI and Flask for real-time data processing.
- Automated data ingestion pipelines using PySpark, integrating with MySQL and MongoDB.
- Created ETL jobs in Python to extract, transform, and load data into relational databases.
- Built and maintained web applications using Django with MVC architecture and OOP principles.
- Developed file cleaning utilities with Python libraries to streamline and sanitize large datasets.
- Proficient in Python, Jupyter, and the scientific computing stack (NumPy, SciPy, Pandas, Matplotlib).
- Contributed to front-end development using CSS, AngularJS, Bootstrap, and jQuery UI.
- Designed and integrated RESTful APIs with OAuth2 and JWT authentication.
- Deployed containerized applications using Docker and automated builds via GitHub Actions.
- Implemented cloud deployments on AWS EC2, RDS, and S3, ensuring high availability.
- Refactored legacy Django applications to use asynchronous patterns, improving performance by 35%.
- Utilized Git and JIRA in an Agile/Scrum environment to coordinate with cross-functional teams.

Environment: Python 3.11, FastAPI, Flask, PySpark, MySQL, MongoDB, Docker, GitHub Actions, AWS, REST API

Client: First Citizens Bank, DE

Oct 2021 – Aug 2023

Role: Jr. Python Developer

Responsibilities:

- Designed and developed responsive UI using HTML5, XHTML, CSS3, JavaScript, jQuery, AJAX, and Bootstrap for optimized page layouts.
- Developed and integrated RESTful APIs using Django and SQLAlchemy data models, with unit testing via PyTest.
- Built dynamic views and templates with Django templating language, implementing MVC architecture for scalable web applications.
- Wrote and optimized MySQL queries using Python-MySQL connector and MySQLdb package.
- Developed web scraping scripts using Python with Requests, Urllib, and BeautifulSoup for data parsing.
- Implemented backend services using Python frameworks (CherryPy, Django) and SQLAlchemy ORM.
- Processed and analyzed data from CSV and Excel formats using Python.
- Designed and configured MongoDB environments with shards and replica sets for Dev/Test and Production.
- Worked with PySpark to analyze SQL scripts and design optimized data processing solutions.
- Developed a Python-based GUI application for Freight Tracking and processing.
- Created rich, interactive front-end components using CSS3, HTML5, JavaScript, and jQuery.
- Integrated Git for version control and followed Agile/Scrum methodology, participating in daily stand-ups and sprint planning.

Environment: Python, Django, MySQL, HTML, jQuery, CSS, JavaScript, SOAP, Restful API, Oracle DB, JDBC, Git, Linux, AngularJS

Client: MetLife, India

July 2020 – Aug 2021

Role: Python Developer

Responsibilities:

- Developed views and templates using Python and Django templating engine to create user-friendly, responsive interfaces.
- Built a customer complaints application using Django, implementing Python-based business logic and database integration.
- Collaborated with clients to gather requirements, prepare solution proposals, and create technical specifications for the GCDU project.

- Developed web applications using Django and Flask following MVC architecture principles.
- Worked with JavaScript MVC frameworks such as AngularJS to build dynamic, interactive front-end components.
- Utilized Python OpenStack APIs for cloud-based integrations.
- Performed web scraping using BeautifulSoup to extract and prepare data for analytics and visualization.
- Designed and implemented full-stack applications using Python, Django, MySQL, and Linux.
- Created PyQt-based GUIs to display and manage patient and policy information, enabling add, update, and delete operations.
- Designed and developed web pages using HTML5, XHTML, CSS3, jQuery, and JavaScript, employing table-less CSS design for flexible layouts.

Environment: Python, Django, HTML5, CSS3, JSP, XML, TDD, SQL, MYSQL, and Windows.
