

Sr. Network Engineer

Professional Summary:

- 7+ years of experience in Networking and Security, including hands-on experience in providing network support, installation and analysis for a broad range of LAN / WAN communication systems.
- Experience with designing, deploying and troubleshooting LAN, WAN, Frame-Relay, and Ether-channel.
- Experience in Configuring & implementing VLAN, VTP, LAN switching, STP and 802.x authentication in access layer switches.
- Switching tasks include VTP, ISL/802.1q, IPSec & GRE Tunneling, VLANs, Ether Channel, Trunking, Port Security, STP & RSTP.
- Experience securing and managing remote access using various VPN technologies like IPSec, SSL, and GRE.
- Experienced in handling and installing Palo Alto Firewalls.
- Configure all Palo Alto Networks Firewall models (PA-2k, PA-3k, PA-5k etc.) as well as a centralized managementsystem (Panorama) to manage large scale firewall deployments.
- Includes security policies, framework, DR/BC procedures and testing development documents.
- Practical knowledge about TCP/IP, DHCP, DNS, SMTP, POP3, RIPv1, RIPv2, OSPF, IGRP, EIGRP, BGP RoutingProtocol Static, default and dynamic.
- Configuration and troubleshooting L3 switches with VLAN, STP, SPAN, ETHERCHANNEL, HSRP, VRRP and GLBP.
- Experience with converting Checkpoint VPN rules over to the Cisco ASA solution. Migration with both Checkpoint and Cisco ASA VPN experience.
- Monitoring Traffic and Connections in Checkpoint and ASA Firewall.
- Worked extensively in Configuring, Monitoring and Troubleshooting Cisco's ASA 5500/PIX security appliance, Failover DMZ zoning & configuring VLANs/routing/NAT with the firewalls as per the design.
- Configuring Checkpoint Firewall in IPSO, Secure Platform and GAIA platforms.
- Configuring, Administering and troubleshooting the Checkpoint and ASA firewall.
- Using Smart Update, User Management and Authentication in Checkpoint Firewall.
- Thorough understanding of VPN technologies like IPSec, GRE tunneling, MPLS for remote access security.
- Fabric Path, Fiber Channel over Ethernet, and Virtual Port Channel (VPC)
- Experience deploying BIG-IP F5LTM Load Balancers for load balancing and traffic management of business application.
- Worked on F5 LTM, GTM series like 6400, 6800, 8800 for the corporate applications and their availability.

Technical Summary:

Cisco Platforms	Nexus 9K, 7K, 5K, 2K & 1K, Cisco routers (7600,7200, 3900, 3600, 2800, 2600, 2500, 1800 series) & Cisco Catalyst switches (6500, 4900,4500,6807 series) NX-OS, IOS-XR, Cisco ASA, Cisco ACI
Juniper Platforms	SRX, MX, EX Series Routers and Switches EX4600/9200, QFX 10002/QFX5100
Networking Concepts	Access-lists, Routing, Switching, Subnetting, Designing, CSU/DSU, IPSec, VLAN, VDS, VPN, WEP, WAP, MPLS, VoIP, Bluetooth, Wi-Fi, NetScaler
Firewall	Palo alto, ASA, Firewall (5505/5510), Checkpoint, Cisco ASA, Fortinet-201e & 301e
Network Tools	Solar Winds, VMware, SNMP, Cisco Works, Wireshark, HIPPA
Load Balancers	Cisco ACE, F5 Networks (Big-IP)
WAN technologies	MPLS, leased lines & exposure to PPP, DS1, DS3, OC3, T1 /T3 & SONET
LAN technologies	Ethernet, Fast Ethernet, Gigabit Ethernet, & 10 Gigabit Ethernet, Port channel, VLANs, VTP, STP, RSTP, 802.1Q
Security Protocols	IKE, IPsec, SSL-VPN
Networking Protocols	OSPF, EIGRP, BGP, STP, RSTP, VLANs, VTP, PAGP, LACP, MPLS, HSRP, VRRP, GLBP, TACACS+, Radius, AAA, IPv4 and IPv6, BGP, OSPF

Professional Experience:

Sr. Network Engineer

ANSYS (Remote), PA

Jan 2022 - Current

Responsibilities:

- Configured Object Grouping, Protocol Handling and Code up gradation on Palo Alto Firewalls.
- Configuring rules and Maintaining Palo Alto Firewalls & Analysis of firewall logs using various tools.
- Work on Checkpoint Platform including Provider Smart Domain Manager. Worked on configuring, managing and supporting Checkpoint Gateways.
- Worked on F5's Traffic Management Operating System (TMOS) ensuring applications are fast, secure and available.
- Created well-defined requirements documentation and process for F5 LTM, GTM, ASM, APM deployment
- Participated in project scoping, estimating, delivery
- Worked with F5 Support and open and managed all cases
- Configured Network VLAN, Routes, Interfaces and Trunks on the F5 devices to integrate with Cisco routers and switches
- Protocol Level network troubleshooting (Wireshark, TCP dump, Splunk, MRTG/ PRTG)
- Working knowledge of frame relay, MPLS services, OSPF, BGP and EIGRP routing protocols, NAT, sub-netting, also including DNS, WINS, LDAP, DHCP, http, HTML, HTTPS, TCP/IP, UDP, SNMP, OSPF, RIP, IPSEC, PPTP, VLAN, STP (Spanning tree Protocol), RTSP& Multicasting protocols.
- Involved with the Systems team to Install, configure, & maintain AD, DNS, DHCP on Windows 2000 Server, also configured an FTP server; Installed configured & maintained MS Exchange Server.
- Experience with DNS, DHCP, VPNs, Spanning Tree Protocol, and Virtual LANS.
- Planning, designing and Configuration of various Policy Configurations, Profile Authorizations, End device Profiling, User Identities, Cisco ISE and AD mapping with various attributes and levels of authorizations and Network Access.
- Deployment of nationwide corporate upgrade: migrating from legacy equipment to Cisco Meraki indoor/outdoor wide area mesh networks (Cisco's largest Meraki rollout to date).
- Deployed and configured devices using Meraki dashboard.
- Worked extensively on lab build for POC comprising of Cisco Catalyst Switch 6500s, 4500s, 3750, Nexus 7000s, and Cisco ISE 3300 Appliances and 1.0.4 Cisco ISE software on VMware's.
- Performed upgrade process for Cisco ISE software from version 1.0.4 to 1.1 ADE-OS, patch management and data backup management.
- Configured SSL Remote Access VPN with the F5 APM to handle over 1500 users.
- Managed and troubleshoot NET Cloud, Cradle Point and Aruba access points wireless devices on Citrix and Airwave. Aruba VPN, customer public and private wireless networks. Aruba mobility and Clear pass training.
- Working on the project of F5 LTM, GTM and ASM code upgrade project, doing a couple of them every week.
- Successfully installed Palo Alto PA-3060 firewalls to protect Data Center and provided L3 support for
- Installation, Administration, configuration and troubleshooting of Fortinet and checkpoint Firewalls
- Involved in the Migration of checkpoint to Fortinet Firewalls.
- Assisting end user operations staff with technical support for Fortinet products
- Cisco ASA and FWSM, Fortinet FortiGate; F5 AFM, A10 WAF, IDS/IPS systems, and general knowledge of security features and protocols
- Implemented Positive Enforcement Model with the help of Palo Alto Networks.
- Responsible for setting up the infrastructure environment with many Cisco & Palo Alto appliances apart from various other equipment.
- Working on the project of F5 LTM, GTM and ASM code upgrade project, doing a couple of them every week.
- Developed python scripts to generate custom reports and FTP/Email.
- Responsible design, deployment operation of a Security Incident and Event Management solution based on Splunk.
- Researched, designed, and replaced aging Checkpoint firewall architecture with new next generation Palo Alto appliances serving as firewalls and URL and application inspection.
- Palo Alto design and installation (Application and URL filtering, Threat Prevention, Data Filtering).
- Configured and maintained IPSEC and SSL VPNs on Palo Alto Firewalls.
- Implementing and configuring F5 LTMs for VIP's and Virtual servers as per application and business requirements.
- Experience in working with Cisco 5500-X Firepower and Cisco Sourcefire IPS & FireEye
- Implemented Zone Based Firewalling and Security Rules on the Palo Alto Firewall.
- Exposure to wildfire is a feature of Palo Alto.
- Designed and implemented IT security policies and networked backup systems.
- Configured route redistribution between OSPF and EIGRP in a multi-area OSPF network.
- Implemented Hot Standby Router Protocol (HSRP) by tuning parameters like preemption.

Network Engineer**Radial, PA****Jan 2019 – Nov 2021****Responsibilities:**

- Configured the Cisco router as IP Firewall.
- Maintenance of ERP and troubleshooting of ERP. Installed & configured PIX 520, 525, 535 series firewalls, configured standard & extended access-lists & policy- based filters.
- Configured ASA 5510 appliance and VPN. Migrations included and are not limited to Cisco to Cisco and Cisco to Checkpoint and Checkpoint to Checkpoint.
- Migration with both Checkpoint and Cisco ASA VPN experience
- Experience in management of Checkpoint VSX environment and using VSX with Multi-Domain Security Management
- Experience with Infoblox DNS appliances.
- Involved in troubleshooting network traffic and its diagnosis using tools like Wireshark, TCP dump.
- Maintain domain controllers, DHCP, DNS, active directory, IIS, file share, MS Exchange
- Experience in creating multiple policies and pushing them in to Checkpoint Firewall (Gateways) and hands on experience in managing the Checkpoint Management Server with SPLAT operating system
- Experience on working with checkpoint next-generation firewall on various modules such as SMART View Tracker, SMART View Monitor, SMART Update, SMART Log, SMART Event.
- Configuring Checkpoint and ASA for NAT (Static PAT/Manual NAT) to enable remote access for sites by doing Port redirection and configuring various VPNs like IPsec Site to Site, SSL VPN
- Working on the project of F5 LTM and GTM code upgrade project, doing a couple of them every week.
- Configure Juniper QFX 5100 switches for managed colocation customers.
- Worked on F5 GTM, configuring Wide IPs and pools to load balance the client traffic between the two data centers.
- Configuring, supporting, and maintaining routers, switches, network appliances, firewalls, concentrators, and other communication devices.
- Providing support for advanced level and on-call support for large variety of networks, systems, and infrastructures.
- Troubleshooting network systems and performance, and remediating issues professionally and concisely.
- Evaluating project fit and design, utilizing best practices and vendor comparison techniques to provide customer with best business solution.
- Working on the project of F5 LTM, GTM and ASM code upgrade.
- Tuned BGP internal and external peers with manipulation of attributes such as weight, local preference.
- Daily monitoring of network traffic using sniffers (Wireshark) and access logs to troubleshoot and identify network issues.
- Worked with vendors and Engineering team to test new hardware and procedures.
- Consulted with engineering team to resolve tickets and troubleshoot L3/L2 problems.
- Monitored LAN/WAN network activity utilizing CA/Spectrum monitoring tools.

Network Engineer**ORIL, Miami, FL****Jun 2017 – Dec 2018****Responsibilities:**

- Installation and Configuration of Cisco Catalyst switches 6500, 3750 & 3550 series and configured routing protocol OSPF, EIGRP, BGP with Access Control lists implemented as per Network Design Document and followed the change process as per IT policy It also includes the configuration of port channel between core switches and server distribution switches.
- Configures Nexus 7010 including NX-OS virtual port channels, Nexus port Profiles, Nexus port profiles, Nexus version 4.2, 5.0, Nexus VPC peer link.
- Involved in configuring and implementing of composite network models consists of cisco 7600, 7200, 3800, 9000, CSR-1 series routers and cisco 2950, 3500, 5000, 6500 series switches.
- Involved in L2/L3 switching technology administration including creating and maintaining VLANs, port security, trunking, STP, RSTP, LAN security.
- Extensive implementation of firewall rules on juniper SRX 3600, SRX 650, and SRX 220 on a regular basis using space as well as CLI when needed.
- Designed multi-site ACI SDN networking solution for cloud environment
- Maintain redundancy on cisco 2600, 2800, and 3600 routers with HSRP and VRRP.
- Configuration of Access List ACL (STD, Ext, Named) to allow users all over the company to access different applications and block others.
- Responsible for Checkpoint and Cisco-ASA-firewall administration across global networks.
- Configured IPX/SPX, HDLC, PPP, TCP/IP, BGP, EIGRP, RIP, & HSRP.

- Supporting EIGRP and BGP based PwC network by resolving level 2 &3 problems of internal teams & external customers of all locations.
- Coordinated with LAN/WAN engineers the development and implements security policy.
- Involved in the removal of EIGRP from all devices and making OSPF the primary routing protocol.
- Replaced outdated Cisco switches and routers in existing Data center and installed new Cisco switches and routers including migration of 2500 to 2600 series router

Network Administrator

Maxim Healthcare Services, MD

Apr 2016 – May 2017

Responsibilities:

- Responsible for Internal and external accounts and, managing LAN/WAN and checking for Security Settings of the networking devices (Cisco Router, switches) co-coordinating with the system/Network administrator during any major changes and implementation.
- Designed network connectivity and network security, between various offices and data centers. Installed and configured routers including 1800, 2600 along with Cisco switches including 3750 and 6500.
- Responsible for Configuring SITE_TO_SITE VPN on VPN Concentrators series between Head office and Branch office.
- LAN - all aspects of WAN operations including Network Monitoring DNS, DHCP, IPAM, Firewalls, etc.
- In-depth expertise in the implementation of analysis, optimization, troubleshooting and documentation of LAN/WAN networking systems.
- Assist the certification team and perform configuration of LAN\WAN technologies such as Ethernet, Fast Ethernet, and Gigabit Ethernet.
- Configuring and maintaining file sharing services using SMB, FTP, WebDAV, and HTTP/HTTPS protocols Server, and SharePoint.
- Basic to advanced L2/L3 switching implementation using VLAN(s), QoS, Port Security, and STP.
- Implementing 3750 Stackable switches using Cisco Stack Wise technology. Experience to review and evaluate current and future design issues as required maintaining network integrity, efficient data flow.

EDUCATION:

Bachelors Of Information Technology | BVM, Anand, India | 2016
