

Harikiran Pallepati

SOFTWARE ENGINEER

MD, USA | (518) 207-4366 | harikiranpallepati00@gmail.com | [LinkedIn](#)

SUMMARY

- Java Full Stack Developer with 4+ years of hands-on experience in designing, developing, and deploying applications.
- Proficient in Java, SQL, Spring Framework (Spring Boot, Spring MVC), and various front-end technologies like React JS and Angular.
- Skilled in database management with a proven track record of working with relational databases (MySQL, PostgreSQL) and NoSQL databases (MongoDB).
- Designed and implemented RESTful APIs using Java, ensuring efficient communication between different components of a software system.
- Experienced in using a wide range of development tools, including IDEs like IntelliJ IDEA and NetBeans, version control with Git/GitHub, and CI/CD pipelines with Jenkins.
- Good understanding of Java8 new features like Lambda Expression, Java Stream API, and Java Time API.
- Familiarity with cloud computing platforms (AWS Cloud), containerization with Docker, and orchestration with Kubernetes.

SKILLS

Programming Languages:	Core Java, C, C++, SQL
Frameworks:	Struts, Hibernate, Spring Boot, Spring Batch, Spring Security, Spring AOP, Spring Core, Spring IOC, Angular 12, jQuery, Node.js, React.js, Express.js, Angular
Web Technologies:	HTML, HTML5, CSS/CSS3, AJAX, jQuery, Bootstrap, XML, JSON, UI Material, SASS, Typescript, ES6, Redux, React Hooks, REST API, RESTful API
Java/J2EE Technologies:	Servlets, Spring, EJB, JPA, JTA, JDBC, JSP, JSTL, Webservices, Microservices, Spring MVC, Hibernate, ORM
Database:	Oracle SQL, MySQL, MongoDB, PostgreSQL, PL/SQL, DynamoDB
Cloud Platforms:	Amazon Web Services
IDEs:	Visual Studio Code, Eclipse IDE, IntelliJ IDEA, Spring Tool Suite (STS)
Web/Application Servers:	Oracle WebLogic, IBM WebSphere, Apache Tomcat, JBoss
Testing Tools:	JUnit, Mockito, Selenium
Build/ Other Tools:	Maven, Gradle, ANT, Jenkins, Docker, Kubernetes, SOAP/REST API, Postman, Jira, SonarQube, Kafka, Jupyter
Methodologies:	SDLC, Agile, Waterfall, SCRUM

EDUCATION

Master of Science in Data Science – University of Maryland Baltimore County, USA

Bachelor of Technology in Computer Science – JNTU, Hyderabad, India

WORK EXPERIENCE

Java Full Stack Developer | Citi, MD

Aug 2023 – Present

- Spearheaded the optimization of Citi's online banking platform to improve transaction processing speed and scalability. Implemented performance improvements, resulting in a **30% reduction in transaction processing time** and **enhanced system scalability** to handle increased user load.
- Designed and developed **RESTful APIs** and **microservices** using **Java 8** and **Spring Boot** to decouple the monolithic architecture into more modular, maintainable services. Applied **design patterns** like Singleton, Factory, and Observer to improve the maintainability and scalability of the backend services.
- Utilized **Amazon S3** for secure, cost-effective storage of user data and logs, integrating S3 buckets for handling large file uploads and backups while ensuring compliance with data retention policies.

- Developed responsive and user-friendly interfaces using **Angular 11**, leveraging **TypeScript**, **RxJS**, and **Angular Material** to build dynamic, high-performance web applications. Ensured a seamless user experience with optimized routing and state management techniques.
- Utilized **Oracle Database** for backend data storage and management, implementing optimized SQL queries and **database indexing** to improve data retrieval performance. Ensured data integrity and optimized **transaction handling** to support high-frequency banking operations.
- Integrated backend microservices with the frontend using **REST APIs** to ensure a smooth and consistent user experience. Implemented **OAuth 2.0** and **JWT authentication** for secure user authentication and session management.
- Conducted code reviews and implemented **performance optimizations**, resulting in a **20% reduction in system downtime**. Optimized critical code paths and database queries, reducing server load and improving system availability.
- Implemented **Apache Kafka** for real-time data streaming and event-driven architecture, ensuring seamless communication between microservices. Configured **Kafka topics**, **producers**, and **consumers** to enable efficient data flow, enhancing platform responsiveness.
- Adopted **Agile methodologies**, participating in daily stand-ups, sprint planning, and retrospectives, resulting in a **25% improvement** in project delivery timelines and ensuring continuous process optimization.

Java Full Stack Developer | **Cognizant, India**

July 2019 – Aug 2022

- Designed and developed **microservices** using **Spring Boot** and **Spring Cloud** for building highly scalable, maintainable backend systems. Utilized **Spring Cloud Config** and **Eureka** for service discovery and configuration management in distributed systems.
- Built responsive and mobile-friendly web applications with **HTML5**, **CSS3**, and **JavaScript**, ensuring compatibility across browsers and devices for an optimized user experience.
- Optimized database performance through **query optimization**, **indexing**, and **sharding** for **MySQL** and **MongoDB**, reducing query execution times by **30%** and ensuring high throughput for large-scale applications.
- Integrated third-party services, such as **payment gateways**, **email services**, and **analytics platforms**, by consuming **SOAP/REST APIs**. This enabled enhanced functionalities, such as real-time payment processing and user behavior tracking.
- Developed robust backend services using **Java 8**, leveraging features such as **Lambda Expressions**, **Streams API**, and **Optional** to write clean, maintainable, and efficient code.
- Orchestrated **CRUD operations** on **MongoDB** for efficient data management.
- Created dynamic, user-friendly interfaces using **React** with **CSS3**. Applied best practices for **lazy loading**, **tree-shaking**, and **code splitting** to improve frontend performance, reducing page load times by **30%**.
- Integrated CI build tools such as **Jenkins** and **TeamCity** with the codebase to enable continuous integration and continuous delivery (**CI/CD**). Utilized **ANT** and **Maven** for monitoring code builds, ensuring automated testing and deployment processes, and maintaining high code quality and performance standards.
- Conducted proof-of-concept for various technical requirements, implementing **Multithreading concepts**.
- Designed and implemented efficient message flow solutions using **IBM MQ** and **RESTful web services**. Utilized RESTful web services for seamless integration and communication between components.
- Combined **Redis** caching into the backend to store frequently accessed data, reducing response times and database load by **up to 40%**, significantly improving application performance.
- Utilized **JUnit** for **unit testing** to ensure code reliability and functionality, employing annotations and assertions for comprehensive test coverage.
- Managed deployment processes and server operations on **Linux** and used **Jira** for tracking project progress and coordinating tasks, ensuring efficient and organized software development and deployment workflows.
- Employed **Mockito** for creating mock objects to simulate dependencies like database access, external API calls, and other services, enabling isolated unit testing for individual components.
- Developed new **SDKs** for seamless interaction with other components, utilizing **JSON schema** for consistent data exchange and integration across systems, and documented APIs using **Swagger** for clear and accessible interface definitions.

CERTIFICATION

- **Java SE 8 Programmer I**

February 2021
