SUMMARY

Software Engineer with 5 years of experience in software development, test automation, and ML, specializing in IoT and cloud technologies. Proficient in Java, Python, AWS, and building efficient test automation frameworks using tools like Selenium, TestNG, and Jenkins and streamlining CI/CD pipelines. Led projects that enhanced team efficiency and achieved 90% test accuracy. Certified in AWS Solution Architect and DevOps, with a focus on delivering high-quality, impactful solutions.

EDUCATION

The University of Texas at Dallas, Texas

Master of Science, Information Technology and Management

May 2024

BITS Pilani Goa Campus, India

Bachelor of Engineering (Hons), Computer Science

Aug 2020

SKILLS

Programming Languages: Java, Python, JavaScript, HTML5, CSS3, R, SPSS

Test Automation/Frameworks: Selenium, TestNG, JUnit, Spring Boot

API Testing: Postman, RESTful APIs

Performance Testing & Tools: JMeter, IoT, Jupyter Notebook, Anacoda, Jira

CI/CD & DevOps: Jenkins, GitHub, Maven, Docker, Kubernetes

Cloud & Infrastructure: AWS, Microsoft Azure, Snowflake, GCP, BrowserStack

Database Management: SQL, NoSQL, MongoDB, DynamoDB

Version Control: GitHub, Perforce

Servlet Containers & Scripting: Ansible, Flask, Tomcat

Machine Learning: TensorFlow, PyTorch, Scikit-learn, NLTK, ARIMA, RNN, LSTMs

WORK EXPERIENCE

Copart, Texas, USA

Software Development Engineer Intern

Jan 2024 - Dec 2024

- Collaborated with **cross-functional** teams to design and develop a scalable Seller Relationship Management using **Angular** and **Spring Boot**, delivering it within 2 months and increasing seller engagement by 15% .
- Enhanced existing practice by developing a friendly user UI using **HTML5**, **CSS3** and **JavaScript** for the team to streamline test execution using Java and **Tomcat** and reports the test coverage via email.
- Detected and developed test automation cases using **Java**, **Maven**, **TestNG** and **Selenium**, setting up and managing **CI/CD** pipelines using **Jenkins** and GitHub, resulting in 90% test accuracy and overall efficiency.

University of Texas at Dallas, Texas, USA

Graduate Teaching Assistant

Aug 2023 - Dec 2023

- Mentored 200+ students in subjects **Internet of Things** and Cloud Computing Fundamentals (**Azure & AWS**) through office hours and one-on-one communication, resulting in improved student understanding and performance.
- Created lesson plans, proctored tests and evaluated assignments according to university standards.

Webware.io, Goa, India

Senior Software Developer

Sep 2020 - Aug 2022

- Proven experience as a Software Engineer, collaborating with **agile** teams to accelerate test automation strategy with a reduction in 60% of the time and enhancing delivery velocity across diverse applications and multiple technology stack layers which in turn increased company's business value and efficiency.

UST Global, Chennai, India

Software Development Intern

Jul 2019 - Dec 2019

- Contributed to three projects involving Machine Learning, Data Extraction, and Serverless Computing, utilizing skills in **Python**, **Java**, and **AWS**.
- Serverless Computing:** Provided back-end functionalities for a mobile application using AWS, which helped relocate homeless or lost individuals to the families or concerned organizations using biographic parameters.
- Utilized **AWS DynamoDB** for database management, modified **AWS Lambda** functions to perform **CRUD** operations, stored Lambda functions in **Amazon S3**, and integrated them with **AWS API Gateway** for seamless execution.
- Machine Learning and User Interface:** Built a real-time Vendor Prediction software for a furniture client, using Machine Learning (**Flask**, **Sklearn**, **Pandas**, and **Matplotlib**) to analyze transaction data (excel sheet) and predict the best vendor

based on price, quantity, and delivery delay with an accuracy of 88% while also building and integrating a user-friendly UI for client access using HTML5, CSS3 and JS.

- **Automation:** Developed a tool that extracted data from PDF invoices and transformed it into Excel, reducing the processing time from a week to about 5 minutes for a team of four using Python libraries, **Jupyter Notebook**.

West Bengal e-Governance, Kolkata, India

Data Analyst Intern

May 2018 - Jul 2018

- Delivered a project using **Python** and **ML** techniques which played a key role in predicting future e-transaction counts, enabling the organization to improve and maintain service plans effectively.
- Developed a web scraping program using **Beautiful Soup** and Python to collect data from ETAAL, analyzed it using **IBM SPSS**, and implemented Bass' Model of Diffusion of Innovations for improved predictions, including **ARIMA** models, to forecast future e-transaction counts accurately.

PROJECTS

IoT in Healthcare Industry, Internet of Things

Aug 2022 - Dec 2022

- Implemented IoT technology in a dental clinic to enhance patient care, using sensors for health monitoring, touchless check-ins, and automated oxygen intake management. Used **AWS IoT** services for real-time data analysis, cloud-based storage, and **HIPAA**-compliant security, resulting in improved operational efficiency by 10%, cost savings, and higher patient satisfaction by 60%.

RL model for the CartPole-v1 gym using Reinforcement Learning Problem, Machine Learning

Dec 2020

- Built a **Reinforcement** learning model that will balance the pole on a cart running on flat terrain with a noisy set parameters like action and sensors using **TensorFlow**, **OpenAI Gym** Toolkit.

CERTIFICATIONS

- **AWS Solution Architect** (Associate)
- **Full Stack Web Development** (HP)
- **Mern Stack** (Udemy)
- **Introduction to DevOps** (IBM)
- **Cumulocity IoT Platform** (Software AG)

ASSOCIATIONS & LEADERSHIP EXPERIENCE

IoT Club, UT Dallas, Member

Jan 2023 - May 2024

AWS Club, UT Dallas, Core Member

Aug 2023 - May 2024

Department of Finance, BITS- Pilani, Core Member

Aug 2018 - May 2020
