

Harsha Perasani

Memphis, USA | harsha.perasani@jobhuntus.com | +1 (901) 799-3679 | [LinkedIn](#)

Professional Summary

Passionate **Full Stack Developer** with 4 years of experience building **scalable, high-performance applications** across **cloud, data, and AI** domains. Skilled in **React.js, Node.js, Java (Spring Boot)**, and **AWS**, with expertise in **microservices, CI/CD**, and **container orchestration**. Proven success in delivering **enterprise-grade solutions** that enhance **scalability**, accelerate **releases**, and optimize **performance**. Strong background in **Databricks Lakehouse, real-time data pipelines**, and **ML integration**. Adept at leading **Agile teams**, driving **innovation**, and delivering measurable **business impact** through **technology excellence**.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, SQL, Shell/Bash

Frameworks & Libraries: React.js, Angular, Node.js (Express.js), Spring Boot, Redux, Hibernate (JPA), PyTorch, spaCy, scispaCy

Databases & Data Systems: PostgreSQL, Oracle ERP, AWS RDS, Delta Lake, Databricks SQL

Cloud Platforms & Services: AWS (ECS, EC2, S3, RDS, Glue, CloudWatch, Lambda), Databricks (ML Runtime, MLflow, Unity Catalog, Delta Live Tables), Apache Kafka

DevOps & CI/CD Tools: Jenkins, GitHub Actions, GitLab CI/CD, Databricks Workflows, Docker, Kubernetes (EKS), Airflow

Data Engineering & Analytics: Apache Spark, Spark Structured Streaming, Delta Live Tables, Power BI, ETL Orchestration & Optimization

Security & Compliance: OAuth 2.0, JWT, OWASP Standards, HIPAA Compliance, PII/PHI Redaction

Machine Learning & AI: ML Model Training, Versioning & Deployment (MLflow), ASR Integration, NLP based Medical Entity Extraction, ICD-10 Mapping

Testing & Quality Engineering: Appium, Robotium, UI Automator, JIRA

Architecture & Methodologies: Microservices Architecture, RESTful & GraphQL APIs, Event-driven Systems, Agile/Scrum, Code Reviews, Sprint Planning

Professional Experience

Full Stack Developer

Teknocrux | NY, USA | June 2025 – Present

- Architected and developed scalable full-stack web applications using **React.js, Node.js (Express.js)**, and **Java (Spring Boot)** within a microservices architecture, enhancing platform scalability and accelerating feature delivery.
- Built responsive user interfaces with **React.js, Angular, Redux**, and **TypeScript**, improving client engagement by 20% across multiple devices.
- Designed and optimized APIs (**RESTful** and **GraphQL**) integrating **Oracle ERP, PostgreSQL**, and partner systems, reducing data retrieval latency by 25%.
- Implemented containerized microservices using **Docker** and **Kubernetes**, ensuring seamless deployment on **AWS ECS** and **EC2** environments.
- Developed automated CI/CD pipelines with **Jenkins, GitHub Actions**, and **GitLab CI/CD**, cutting deployment time by 40% and improving release reliability.
- Leveraged AWS services (**ECS, RDS, S3, CloudWatch, Glue**) to ensure 99.9% uptime, optimize cost efficiency, and maintain reliable cloud performance.
- Optimized backend performance through **Hibernate (JPA)** tuning and **database indexing**, achieving 15–25% faster query execution.
- Implemented secure authentication using **OAuth 2.0, JWT**, and **OWASP**-compliant practices to ensure data privacy and API security.
- Developed event-driven features using **Kafka** and **AWS Glue**, enabling real-time analytics and data pipelines processing 500GB+ daily.
- Led Agile development processes, facilitating sprint planning, retrospectives, and code reviews—delivering 15+ successful releases and improving sprint velocity by 10%.

Software Developer

Databricks | USA | April 2022 – May 2023

- Designed and implemented multiple **AWS-based Databricks Lakehouse solutions** for retail, telecom, and enterprise clients, integrating **real-time and batch data pipelines** for analytics and machine learning.
- Built **real-time data ingestion pipelines** using **Spark Structured Streaming** and **Delta Live Tables**, consolidating sales, inventory, and transaction data from AWS sources—reducing reporting latency from **24 hours to under 10 minutes**.
- Developed an **end-to-end ML pipeline** for a telecom client using **Databricks ML Runtime + MLflow**, enabling automated model training, versioning, and REST API-based deployment—improving model AUC from **0.82 → 0.91** and increasing retention by **8%**.
- Created a **data quality and governance framework** leveraging **Delta Live Tables Expectations** and **Unity Catalog**, implementing validation rules, schema drift checks, and Slack alerts—reducing data anomalies by **95%**.
- Automated **ETL orchestration and CI/CD** using **Databricks Workflows, Airflow, and GitHub Actions**, cutting manual operational effort by **80%**.
- Optimized **Delta Lake performance** with **Z-ordering, partitioning, and caching**, reducing AWS compute costs by **25%** and improving query performance.
- Designed **Power BI dashboards connected to Databricks SQL**, enabling near real-time insights for business stakeholders.
- Collaborated with **data engineers, ML scientists, and analytics teams** to build **scalable Lakehouse pipelines** within the AWS ecosystem, ensuring data reliability and compliance.

Software Engineer

Indium | Bangalore, India | June 2019 – August 2021

- Contributed to multiple **AI-driven and Quality Engineering projects** across **Healthcare and Gaming** domains, focusing on automation, data processing, and system integration.
- Assisted in developing an **AI-NLU speech automation system** that converted doctor–patient conversations into structured medical summaries for **EHR and insurance claims automation**.
- Implemented **audio preprocessing modules** (noise reduction, decryption, format conversion) using **Python (FFmpeg, Librosa, SciPy)** and supported **ASR model integration** using **PyTorch**.
- Developed **speaker diarization and NLP pipelines** (spaCy, scispaCy) for extracting medical entities (diagnoses, vitals, medications) and mapping them to **ICD-10 codes**.
- Tested and validated **PII/PHI redaction workflows** ensuring **HIPAA compliance** and participated in **FHIR/HL7-based EHR integration**.
- Collaborated on a **microservice-based AWS architecture** (S3, Lambda) enabling 20× faster patient summary generation and improved claim accuracy.
- Participated in **QA automation and analytics validation** for global gaming projects, creating and executing automated test scripts using **Appium, Robotium, and UI Automator**.
- Integrated automated tests with **Jenkins CI/CD pipelines**, performed **functional and compatibility testing** across 250+ mobile and desktop devices, and maintained issue tracking via **JIRA**.
- Validated **game analytics telemetry** (retention, churn, ARPU metrics) and ensured error-free releases for 10+ titles with **zero launch delays**.
- Worked in **Agile development sprints**, collaborating with cross-functional teams, contributing to sprint demos, and supporting documentation of test coverage and outcomes.

Education

University of Memphis | Memphis, Tennessee | Aug 2021 – May 2023

Master of Science in Data Science

GITAM University | Visakhapatnam, Andhra Pradesh, India | Jul 2017 – Jun 2021

Bachelor of Technology in Computer Science and Engineering

Certification

- AWS Certified Developer – Associate
- Spring Certified Professional (VMware)
- Databricks Certified Data Engineer Associate

- Oracle Certified Java Professional
