SUMMARY

Senior software engineer with more than 15 years of experience in all fields of the software development process. Focused on defining architecture specifications and leading the development of innovative solutions, with a strong emphasis on Java. Highly experienced with business requirements, data structures, database design, web services, algorithm analysis, performance optimization and technical debugging.

PROFESSIONAL EXPERIENCE

GEOCOM S.A. – On-site

Software Architect

Montevideo, Uruguay

Oct 2022 – Present

- Microservices-based architecture and development of integration with mobile recharge services and digital wallets, consuming APIs such as [Claro](#), [Antel](#), and [TuApp](#) for [Tata's](#) solution.
- Architected 15+ microservices solutions for mobile recharge services, bill payments, and gift cards, integrating APIs for [MTCenter](#), Immex, and [RedEfectiva](#) for [YZA Pharmacies'](#) solution.
- Architected 10+ microservices solutions for mobile recharge and bill payment services, integrating APIs from [Disashop](#), [Moviired](#), [InComm](#), and [PuntoRed](#) for [OXXO International's](#) solution.
- Reduced deployment times by 80% by implementing CI/CD pipelines with Jenkins, Docker, and Kubernetes.
- Refactored the Conciliator product, adding integrations with 5+ payment methods and achieving 95% test coverage via unit/integration tests.
- Designed and developed [Bepsa's](#) Integrator product using Spring WebFlux, delivering a REST API for POS, administration, and cash management.
- Refactoring the integration with Mercado Pago for QR payments, involving migration from Spring Boot 2.7.1 to Spring Boot 3.4.1, as well as code improvements and cleanup, supporting the changes with integration tests.
- Architecture and development of the QR payment integration consuming the [Transbank API](#), [MachPay's API](#) and Banco Estado's API in Chile.

GEOCOM S.A – On-site

Senior Full Stack Developer

Montevideo, Uruguay

Feb 2017 – Oct 2022

- Led a team of 5 developers in the development of Geopos Express, a multi-tenant microservices platform for Point of Sale (POS) systems. This centralized end-to-end business operations, resulting in a 20% reduction in operational costs for clients.
- Led GeoStation fuel management system, integrating DUCSA controllers for two gas stations.
- Built Angular-based frontend for [Tienda Inglesa's](#) self-checkout system, reducing customer wait times by 15%.
- I was part of the implementation of a teleconsultation system developed during the COVID pandemic, which was integrated into GeoSalud and used by [CASMU](#).
- Architected [Farmashop](#) (Magento E-commerce) for Uruguay's largest pharmacy group, increasing online sales by 60% through loyalty and logistics modules.

ADWEB SOLUTIONS – Remote

Software Developer

Guadalajara, Mexico

May 2011 – Feb 2017

- Implementation of multiple Ecommerce projects, such as product catalogs.
- Implementation of custom developments.

- I participated as an architect and developer of an educational platform, an LMS called Alfaomega.
- I served as the technical lead in the development of a platform for creating Learning Objects following the SCORM standard.

EDUCATION

UNIVERSITY OF COMPUTER SCIENCES (UCI)
B.S. in Computer Science

Havana, Cuba
Aug 2004 – Jul 2009

KEY ACHIEVEMENTS

Modernized 4+ legacy systems to microservices, reducing latency by 30% and scaling to 100K+ users.
Pioneered QR payment solutions across Latin America, processing \$20M+ in transactions annually.
Championed DevOps practices (CI/CD, IaC) to cut deployment errors by 80% and operational costs by 35%.

SKILLS

Backend: Java, Spring Boot, Spring Cloud, Spring WebFlux, Spring Integration, Spring Batch, Testcontainers, Junit, Mockito
Frontend: React, Gatsby, HTML/CSS
Databases: MongoDB, PostgreSQL, MariaDB, Oracle, Redis, Neo4j
DevOps: Docker, Kubernetes, Jenkins, Terraform, Ansible, Git
