

Hima Reddy Burri

Austin, TX | (813)842-5806 | himareddy.burri1@gmail.com | www.linkedin.com/in/himareddy-burri

SUMMARY

- IT professional with over 10 years of experience in **big data**, **data analysis**, and **machine learning** across diverse industries, including **insurance**, **real estate**, **machinery**, **retail**, and **pharmaceuticals**.
- Proficient in **end-to-end data science workflows**, including data mining, exploratory data analysis (EDA), machine learning algorithm development (supervised and unsupervised) as well as deploying models to production environments to deliver actionable insights.
- Proficient in **R Programming** using several CRAN packages and data visualization.
- Strong hands-on experience with **Python programming** including statistical libraries such as NumPy, Pandas, Matplotlib, *Scikit-learn* and Seaborn.
- Experience and good understanding of Hadoop architecture and various components such as **NiFi**, **Hive**, **HBase**, **Sqoop**, **Spark**, **Oozie**.
- Proficient in deploying scalable **Flask** applications using **Docker**, ensuring seamless containerized environments for efficient development, testing, and production workflows
- Experience working with Cloud platforms like **Amazon Web Services (AWS)** and **Microsoft Azure**
- Experienced in designing complex data pipelines and **ETL** processes for reporting and data Warehousing.
- Expertise in data visualization, ad-hoc reporting, building, and designing actionable dashboards with **R Shiny**, **Tableau** and **Power BI** to support data driven decision making.
- Proficient with version control systems, specifically **GitHub/Git**.
- Extensive experience working in **Agile-Scrum** and Test-Driven Development environments
- Quick to adopt new technologies, with excellent **interpersonal** and **project management** skills.
- Recognized for **teamwork**, delivering high-quality results under tight deadlines, and managing priorities.
- Demonstrated ability to prioritize tasks effectively as a **team player** with a **results-driven mindset**.
- Committed to continuous learning and innovation in data science, with a focus on cutting-edge ML algorithms and AI-driven analytics for business optimization.

TECHNICAL SKILLS

Programming Languages	Python, R, SQL, VBA
BI & Visualization Tools	Tableau, Microsoft Power BI, R Shiny
Databases	PostgreSQL, IBM Netezza, Microsoft SQL Server
Cloud Computing Platforms	AWS (Redshift, S3, EC2, SageMaker), Microsoft Azure (Synapse, ML studio)
Big Data Technologies	Hadoop, HBase, Hive, Sqoop, Spark, Oozie, NiFi
Data Science Tools & Frameworks	TensorFlow, PyTorch, Keras, scikit-learn, MLflow
MLOps & Model Deployment	Docker, Kubernetes, MLflow, FastAPI, TensorFlow, Flask

EDUCATION

Master of Science in Business Analytics & Information Systems	GPA 4.00
<i>University of South Florida, Tampa, Florida</i>	Aug 2015- Dec 2016
Bachelor of Technology, Computer Science Engineering	GPA 3.85
<i>Amrita University, India</i>	June 2010-May 2014

PROFESSIONAL EXPERIENCE

Senior Data Scientist, Mountain West Farm Bureau Insurance, Laramie, WY	Apr 2022 to present
- Developed ML models for Damage Risk Scoring and Route Risk Assessment, boosting risk-scoring accuracy by 15% and cutting claims by \$2M annually. - Built and automated scalable data pipelines for integrating multi-source data (policy, geospatial, weather, and claims) to support dynamic risk scoring, ensuring seamless data quality and operational efficiency. - Automated pipelines from 5+ data sources (customer, policy, weather, geospatial, claims), slashing ingestion errors by 40% and processing time by 60%. - Implemented advanced hyperparameter tuning, elevating model AUC by 10% and minimizing overfitting across multiple coverage lines - Deployed containerized ML services on Azure, achieving 99.9% uptime and cutting inference latency by 40%. - Collaborated with a 15-member cross-functional team, reducing underpricing incidents by 10% through real-time model insights. - Built four real-time Tableau dashboards for risk, pricing, and claims, trimming manual reporting by 30% and lowering claims frequency by 15%.	
Technology stack: <i>Python (Scikit-learn, Pandas, NumPy), Tableau, Flask, Docker, Azure (Synapse, Databricks, MLOps), GitHub</i>	

Data Scientist III, Second Avenue, Chicago, IL**Oct 2018 to Mar 2022**

- Developed several real estate intelligence features like Comparative Market Analysis (CMA), Automated Valuation Models (AVM) etc. in the web platform leveraging advanced statistical modeling, machine learning, and data mining techniques
- Successfully built models to predict customer behavior and contributed to increase in lead count by 27% and reduction in the marketing costs by 35%
- Involved in data collection, data cleaning, data transformation and data analysis processes
- Built several ETL processes and data pipelines for storing the real estate data collected by web scrappers
- Developed complex SQL queries and R scripts to mine data from Multiple Listing Service (MLS) database to identify competitive markets for real estate investments
- Utilized data visualization tools like Microsoft Power BI to develop different kinds of dashboards and presented the discovered trends and analysis to the higher management
- Proactively Identified problems and performed root cause analysis/diagnosis leading to significant business impact

Technology stack: R, Microsoft Power BI, ArcGIS/QGIS, PostGIS, Git, AWS (S3, Redshift, ECR, ECS), Databricks**Data Scientist, John Deere, Waterloo, IA****Apr 2017 to Oct 2018**

- Involved in the entire solution architecture and design for data migration and data processing in Hadoop
- Developed Self-service data science rules, predictive algorithms and other customized machine learning methods using R and Python
- Developed Sqoop scripts to import data from disparate RDBMS into Hive
- Developed Map Reduce and Spark scripts for cleansing data and transformation of the raw data into meaningful business information and uploaded it into HBase
- Solved various performance problems in Hive, HBase and Scoop with deep understanding on joins, groups and aggregations getting converted into MapReduce
- Developed R Shiny Applications and Tableau Reports according to the business requirements
- Performed deployment in multiple environments, testing and monitoring the jobs
- Performed code build and release activities with proper version controlling using GitHub

Technology stack: Hadoop environment (Apache NiFi, Spark, Hive, HBase, Oozie), Python, Jupyter Notebook, Tableau, IBM Netezza, GitHub Enterprise 2.14**Data Analyst III, AbbVie, Chicago, IL****Aug 2016 to Apr 2017**

- Developed analytical solutions to improve pharmaceutical product sales performance and marketing efficiency
- Built predictive models to answer business questions and to uncover hidden marketing opportunities
- Performed in-depth data analysis using various python libraries and communicated insights to the product sales and marketing teams which helped the teams in taking key decisions.
- Estimated the cost of future marketing operations using research analytics and data modelling techniques by establishing standard costs and operational costs
- Guided cost analysis process by providing trends and forecasts; explaining processes and techniques and recommending actions
- Improved product sales performance by analyzing results, monitoring variances, identifying trends, and recommending actions to management
- Created interactive dashboards and visualizations of customer reports and revenue statistics using Tableau

Technology stack: Python, Oracle Database 11g, Crystal Reports, Tableau**Systems Engineer, Infosys Limited****Jan 2014 to Jul 2015**

- Developed dynamic reports and dashboards using SSRS, incorporating multiple data sources to support daily operations and client needs.
- Designed interactive features like drilldowns, trends, and parameters in SSRS for enhanced data visualization.
- Automated data workflows with SSIS, integrating Excel, flat files, and CSVs for efficient reporting.
- Streamlined recurring hourly, daily, and monthly reports using SSIS, reducing manual effort.
- Cleaned and transformed data with SSIS, enabling seamless integration for unified reporting solutions.

Technology stack: Microsoft SQL Server, SSIS, SSRS, Excel, VBA**ACHIEVEMENTS**

- Winner of **Smart Co-Creation Series Hackathon 2017** conducted by John Deere Global IT team.
- Received **gold medal** for being aggregate topper and consistent academic excellence.
- **Most Valuable player** of the team award in Infosys Limited for fiscal year 2014.
