Software Engineer in Test

Proven Software Engineer in Test with 15+ years of experience in automation, API testing, and cloud infrastructure. Deep expertise in UI/Mobile automation, API testing, and integration testing, with a strong grasp of SDLC and TDD methodologies. Skilled in designing scalable test frameworks, improving automation coverage, and enhancing CI/CD pipelines. Passionate about learning new technologies, including AI and machine learning.

Key Skills

Automation: Playwright, Selenium, Appium | **API Testing:** Rest Assured, Postman, Axios
Programming: Python, TypeScript, Node.js, Java | **Cloud & CI/CD:** AWS, Kubernetes, Docker
Testing Frameworks: JUnit, TestNG, Mocha, Chai | **Performance Testing:** k6, Artillery

Professional Experience

Caesars Entertainment – *Remote*

Senior Software Automation Engineer (09/2020 – 01/2025)

- Developed **100+ BDD test cases** using **Playwright + Node.js + React**, achieving **70% automation coverage** and facilitating a **TDD transition**.
 - Created a **Python** based framework for complex **Integration Testing**
 - Built a scalable **Appium + WDIO + BrowserStack** framework, increasing **mobile test automation coverage to 90%**.
 - Enhanced **API testing** with **JUnit + Rest Assured**, designing reusable helper functions and improving test reliability.
 - Configured **GitLab CI/CD pipelines, Kubernetes clusters, and AWS services (Lambda, S3, EC2, DynamoDB)** to streamline test execution.
 - Conducted **load testing** using **k6**, ensuring product stability under heavy traffic.
 - Implemented **custom UI navigation automation** using **BFS/DFS algorithms**.
-

EPAM / HCL Technologies – New York, NY

Senior Test Engineer (10/2015 – 08/2020)

- Designed a **Selenium WebDriver + TestNG** framework, enhancing UI test automation for internal tools.
 - Led maintenance of **Playwright + TypeScript** automation for an Angular-based application.
 - Developed an **iFrame traversal solution using BFS algorithms**, improving test stability.
 - Created an **accessibility testing solution** using **JAWS + JavaScript + HTML**, ensuring WCAG compliance.
 - Expanded **API test coverage** with **Postman + Rest Assured** for critical backend services.
-

ICC Lowe – Parsippany, NJ

QA Automation Engineer (11/2013 – 09/2015)

- Built a **Selenium WebDriver + Java** UI automation framework from scratch.
- Developed a **screenshot-based validation framework** for internal web applications.
- Automated native & hybrid mobile testing with **Appium, Xcode, and Android Studio**.
- Wrote **complex SQL queries** for data validation and backend testing.

Earlier experience upon request

Technical Skills

- **Automation:** Selenium WebDriver, Playwright, WDIO, Appium
 - **API Testing:** Rest Assured, Postman, Axios
 - **Programming:** Python, JavaScript, TypeScript, Node.js, Java, Kotlin, Swift
 - **Cloud & CI/CD:** AWS (Lambda, S3, EC2, DynamoDB), Kubernetes, Docker, GitLab CI/CD, Jenkins
 - **Testing Frameworks:** JUnit, TestNG, Mocha, Chai, Cucumber, PyTest
 - **Performance & Monitoring:** k6, Artillery.io, LoadRunner, Splunk, DataDog
 - **Databases:** SQL, Cassandra, MongoDB
 - **Messaging & Infrastructure:** Kafka, Azure Service Bus
 - **Algorithms & Data Structures:** BFS/DFS, String & Matrix Processing
-

Education & Certifications

- **Bachelor's Degree in Travel Management**, State University, Moscow, Russia
- **Docker certification by LinkedIn** - 2025
