

Ishwar Girase

Data Scientist | Machine Learning Engineer

+1 5513445033 | ishwar.g@myjobsmails.com | Oakwood Blvd, New Jersey | LinkedIn | GitHub

SUMMARY

- Dynamic Data Scientist with 5 years of experience specializing in data warehousing, extraction, and modeling, leveraging tools like Python, SQL, AWS, Power BI, and machine learning algorithms for efficient data processing and deriving actionable insights.
- Expertise in developing and optimizing machine learning algorithms, including regression, classification, and time series models, boosting prediction accuracy and improving business outcomes, enabling more informed decision-making and strategic growth.
- Strong background in statistical modeling and analysis, utilizing Python, R, and advanced techniques to extract actionable insights from complex datasets, driving data-driven decision-making and enhancing problem-solving capabilities across various domains.
- Proven track record in collaborating with cross-functional teams to implement data-driven solutions, enhancing decision-making, optimizing operational efficiencies, and delivering measurable, impactful results across a wide range of industries, business sectors.

EXPERIENCE

Unum, USA | Data Scientist

Feb 2024 - Current

- Created and fine-tuned **machine learning algorithms** with **Scikit-learn**, such as **Logistic Regression**, **Random Forest**, and **XGBoost**, improving prediction accuracy by 9 % significantly enhancing model performance and boosting forecasting reliability.
- Used **Python** and **SQL** to manage large datasets and conduct complex statistical analysis, providing data-driven insights that enabled more informed decision-making and optimized processes across different business units and operations.
- Analyzed both **structured** and **unstructured data**, improving **data processing workflows** and translating complex insights into clear, actionable findings, resulting in a **30% improvement in decision-making efficiency** across multiple departments.
- Utilized advanced **machine learning models**, **SQL joins**, and **window functions** to address business-specific financial challenges, enhancing predictive capabilities and **operational efficiencies** through **complex queries** and **data manipulation techniques**.
- Deployed **machine learning models** to **cloud environments** using **AWS SageMaker** with **CI/CD pipelines**, integrating production-ready code into real-time applications and ensuring smooth execution for continuous performance improvements.
- Worked on **financial models**, conducting detailed analysis with **Tableau** to visualize trends, patterns, helping to inform strategic decisions in **finance projects** and significantly improving the accuracy of business **forecasting** and decision-making processes.
- Collaborated with **cross-functional teams** to present findings, communicated technical concepts to both **technical** and **non-technical stakeholders**, demonstrating exceptional communication and problem-solving skills while driving project success.

Infinite Infolab, India | Machine Learning Engineer

Mar 2019 - Jul 2022

- Leveraged **Power BI** to develop interactive dashboards that visualized real-time model results, allowing stakeholders to easily validate insights and ensure alignment with business objectives prior to full-scale deployment.
- Collaborated with **data engineers** to design and optimize **ETL processes**, leveraging **SQL** to extract, clean, and transform data for analysis, ensuring efficient data flow, improved data quality, and streamlined processes for data-driven decision-making.
- Utilized **NLP techniques** and **NLTK (Natural Language Toolkit)** for text preprocessing, feature extraction, and text mining tasks, transforming unstructured data into structured datasets, enabling more effective analysis and actionable insights across projects.
- Built and validated machine learning models, including **Logistic Regression**, **Decision Trees**, and **Neural Networks**, to predict key business outcomes such as **customer churn** and **product recommendations**, driving strategic decisions and business growth.
- Applied **time series analysis** techniques to analyze sequential data, identify trends, and implement both supervised and unsupervised learning algorithms, improving forecasting accuracy and uncovering hidden patterns in the data.
- Managed and optimized **data workflows** in **Amazon Redshift**, utilizing its **data warehousing capabilities** to efficiently process and analyze large datasets, improving **query performance** and significantly reducing **data processing times** across operations.
- Deployed and managed **cloud-based infrastructure** on **AWS**, including **EC2 instances**, **S3 buckets**, **RDS databases**, and **Lambda functions**, ensuring system **scalability**, **high availability**, and enhanced **performance** across the environment.

TECHNICAL SKILLS

Language: Python, R, SQL, Shell Scripting

IDEs: Visual Studio Code, PyCharm, Jupyter Notebook, Google Colab

Statistical Methods: Hypothesis Testing, ANOVA, Time Series, A/B Testing

Machine Learning: Regression analysis, Bayesian Method, Decision Tree, Random Forests, Neural Network, Sentiment Analysis, K- Means Clustering, KNN, Classification, SVM, Natural Language Processing (NLP), LLM, CNN, XGBoost

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn, PyTorch, TensorFlow, Keras, Spark, Seaborn

Visualization Tools / Database: Tableau, Power BI, Microsoft Excel, MySQL, SQL Server, Oracle, MongoDB, MariaDB

Cloud Technologies: AWS, Azure

Software/Other Skills: Jira, Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-solving, Decision-Making, EDA, Communication Skills, Databricks, Data Visualization, Predictive Analytics, Pattern Recognition, Data Integrity, Quantitative Data, Data Science, Statistics, Statistical Analysis, Data Analytics, Data Modeling, Big Query, Snowflake, SDLC, Agile, Waterfall, Figma

Operating System: Windows, Linux

CERTIFICATION

AWS Cloud Practitioner

Applied Machine Learning by University of Texas at Dallas

Python for Data Science and AI Development by IBM

EDUCATION

University of Texas at Dallas, Dallas, TX

Aug 2022 – May 2024

Master's of Science in Business Analytics – Machine Learning

Dr Babasaheb Ambedkar Technological University India

Aug 2017 – Jun 2021

Bachelor's of Technology in Computer Engineering
