PROFESSIONAL SUMMARY

Senior DevOps Engineer with 9 years of experience designing and implementing scalable cloud solutions, CI/CD pipelines, and automation strategies. Proven ability to reduce deployment time by 70%, optimize system performance by 30%, and automate operational tasks for a 40% increase in team productivity. Adept at evaluating and integrating new technologies to reduce infrastructure costs by 25% while ensuring high availability and security compliance.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Azure, Google Cloud
 - **Containerization & Orchestration:** Docker, Kubernetes, Helm, Istio
 - **Infrastructure as Code (IaC):** Terraform, CloudFormation, ARM Templates
 - **CI/CD Tools:** Jenkins, GitHub Actions, ArgoCD, Harness CI/CD
 - **Configuration Management:** Ansible, Puppet, Chef
 - **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, Datadog, New Relic, Splunk
 - **Security & Compliance:** Palo Alto Networks, Keeper Security, Trivy, Wiz
 - **Scripting Languages:** Python, Bash, PowerShell
 - **Version Control:** Git, SVN
 - **Agile Methodologies:** Scrum, Kanban
 - **Collaboration & Leadership:** Team Mentoring, Cross-Functional Coordination
-

PROFESSIONAL EXPERIENCE

Mastercard | DevOps Engineer

November 2021 – Present

- Automated infrastructure provisioning using **Terraform** for AWS and Azure, managing ECS, EKS, EC2, VPCs, and other resources.
- Led the adoption of **GitOps workflows using ArgoCD**, improving deployment reliability and increasing team productivity.
- Designed and implemented **cloud disaster recovery strategies**, ensuring high availability and resilience.
- Integrated **monitoring tools (Prometheus, Grafana, Datadog, Splunk)** to improve cloud performance insights and security.

- Spearheaded security best practices, working with compliance teams to integrate **automated security scanning (Trivy, Wiz)** into pipelines.
- Reduced deployment time by **70%** and infrastructure costs by **25%** through **CI/CD optimizations** and **auto-scaling strategies**.

Campbells | Cloud DevOps Engineer

July 2017 – October 2021

- Enhanced global cloud infrastructure, optimizing **Jenkins CI/CD pipelines** and managing deployments with **EKS & AKS**.
- Spearheaded Infrastructure as Code (IaC) implementation using **Terraform and CloudFormation** for automated provisioning.
- Developed and managed security automation pipelines, ensuring compliance with **enterprise security standards**.
- Conducted **vulnerability assessments** and implemented **continuous monitoring** using **Trivy and Wiz**.
- Improved system efficiency by reducing **deployment time by 50%** and increasing **application performance by 20%**.

Yellow Pepper | DevOps Engineer

September 2016 – June 2017

- Led a team of **10 engineers** in developing an **observability strategy**, integrating **Prometheus, Grafana, and OpenTelemetry**, reducing MTTR by **60%**.
- Orchestrated migration of legacy applications to **cloud-native microservices architecture (Kubernetes, Istio)**, increasing scalability by **300%**.
- Implemented **GitOps workflows**, reducing deployment time by **75%** and increasing release frequency to **daily**.
- Designed and deployed **automated CI/CD pipelines (Jenkins, GitLab CI)**, reducing release cycles from **bi-weekly to daily**.
- Optimized cloud infrastructure costs by **25%** through **serverless technologies** and **auto-scaling policies**.

EDUCATION

Imo State University, Nigeria
Bachelor of Science (BSc) in Computer Science

CERTIFICATIONS

- **AWS Solutions Architect – Associate**
