Recent Projects

- ♦ Application Migrations, Data Centre Builds, Infrastructure Upgrades, Network Security.
- ♦ WMS, Firewall Implementations, Dell Compellent (SAN) Upgrade, Disaster Recovery.
- ♦ Distributed Order Management Software upgrade.
- ♦ Life Cycle Management and Hardware Discovery (ServiceNow)
- ♦ Warehouse Network Upgrades (Firewalls, Routers, Switches and Wi-Fi AP's).
- ♦ SDWAN Implementation for the enterprise.
- ♦ M365 migration within Exchange Hybrid environment.
- ♦ Application Validations Middle Office and Back Office and migration to MS Azure.
- ♦ Data Center migrations and Creating Disaster Recovery Site (DR).
- ♦ Network/Server Upgrades and Cloud Migrations (AWS)
- ♦ Cloud Application Deployments on MS Azure.

Professional Experience

Canadian Tire; Toronto (Feb 2021—Aug 2024)

Sr. Project Manager—Infrastructure

Project Management | Budget Planning | DC Builds | Life Cycle | Application Migrations | SDWAN

Top-performing Senior PM Delivered multiple complex projects including Data Center Migrations, Database migrations to Cloud, Data Centre Builds, deploying new infrastructure by coordinating multiple vendors for cabling, ISP, network devices, physical security(ISO-27001) etc. Maintained strong vendor relationships, developed RFQ/SOW and implemented strategic negotiations for improved services for supply chain program.

- Managed successful delivery of Complex DOM Upgrade project, Application Validations and UAT.
- Managed implementation of SDWAN for organization with 500+ different sites enabled.
- Application migrations to AWS including PostgreSQL in high complexity environment.
- Procured and Implemented Palo Alto firewalls at multiple DC's where no firewall security existed.
- Managed upgrades for Disaster Recovery site and tested failover to DR site.
- Manage quotes from multiple cabling and electrical vendors, negotiated on material costs and warranties.
- Distributed RAID log and project status dashboard with KPI's to all stakeholders on weekly basis.
- Managed Wi-Fi upgrades at DC's with over 400 Access Points installed.
- Tools used: Jira, ServiceNow, Planview, MS Project, MS Visio, MS Excel, MS PowerPoint etc.

TCS; Toronto (Sep 2019— Dec 2020)

Project Manager

M365 Migration | S4/HANA Migration | SDWAN | Infrastructure Upgrades | Change Management

Designed and developed IT strategy to migrate 3500 users to M365. Directly supervised a team of 15

JAGATJIT SINGH

647 325 6480 ♦ pm.iagsingh@gmail.com

Network and System Admins. Built Project Schedule(WBS) and committed to Critical Path.

- Managed SAP ECC to S4/HANA Migration, ensured compliance to client's SAP Project Methodology,
- Evaluation and Analysis of Project health, remediation and escalations.
- Planned upgrades by drafting risk assessments and acted as business continuity manager.
- Managed asset discovery for end-of-life network equipment, upgrades and decommission.
- Managed upgrades of end-of-life switches and firewalls at different sites. Also upgraded wireless access points for better coverage. Removed old devices from CMDB by following organization standards.
- Designed and implemented SDWAN solution from initiation to closing by upgrading Edge routers at various sites.

BNP PARIBAS; Montreal, New Jersey (Jul 2018—Jul 2019)

Infrastructure Project Manager

Server Upgrades & Migrations| Windows Upgrade | App Validations | Vendor Management

Managed End of Life Upgrade project for Global Markets and Capital Platforms for Server2012 and Windows7. Successfully negotiated equipment delivery timelines with vendors and implemented thin client solution which led to substantial cost-savings.

- Managed migrations of over 200 servers/applications to Azure with SQL Databases.
- Developed and validated test cases with QA for App testing (Windows10 and Server 2016)
- Managed application package tests in non-Prod environment within EUC department. Tracked dependencies and set accountability for all stakeholders.
- Successfully migrated 5000+ Windows7 machines to Windows10 within time and budget against complex priorities. Also managed user migrations to VDI using Wyse Terminals.
- Managed failed application remediation and global application testing with geographically dispersed teams (New York, London, Paris, Singapore and Mumbai).

Fujitsu; Toronto (Feb 2015—May 2018)

IT Project Manager

Infra Upgrades| Cyber Security & IAM | Software Deployments| Data Centre Migrations

Successfully delivered projects with small to medium complexity with budgets up to \$1M with clients in Public Sector, Finance and Healthcare. Used Agile Project Fundamentals and Scrum meetings to focus on delivering highest value items first with better risk management.

- Managed EHR application deployment and end to end migration of SQL databases for eHealth Saskatchewan to Fujitsu data center for hosted services.
- Planned and managed creation of disaster recovery site (backup/DR site) for Crown Investment Corp.
- Managed IAM (identity and access management) support to business and technical teams in the design of standardized products and customized solutions.
- Implemented new switches, routers, servers within DR site and supported the client 24x7 and maintaining 99% uptime as per SLAs.
- Managed cyber security program for implementing Nessus Vulnerability scanner and TrendMicro deep security for Regina Airport Authority(RAA).
- Managed start to finish of complete infrastructure upgrade for RAA. Upgrading Windows Servers, Exchange servers, Firewalls, print servers, DNS, DHCP in 24x7 critical environment.

School District of Mystery Lake; Thompson (Feb 2013—Jan 2015)

Project Manager and Technical Infrastructure Lead

Server Migrations | AD & IAM | Switch and Firewall Upgrades | Communications Management

Hands-on delivery of Windows server upgrades from Server 2008R2 and Server 2003 to Server 2012 in private DC and developed plans to implement new Wireless Radios in the district. Defined goals, schedule, scope / deliverables, and budget up to \$500K.

- Managed 6 Tier I data centers and 1 Tier II data center for the district. Responsible for all server operations, firewalls, backups, power supplies (UPS) etc.
- Developed plans to implement security policies, VLANs and to enhance web application security, implementing audit compliance, and administering security policies for network and systems.
