Overview

I am a recent Graduate from North Carolina A&T State University . Currently, I am a Network Engineer at Connectivity Technology Solutions. As a network engineer with 5+ years of experience, I am dedicated to designing, implementing, and maintaining robust and secure networks that meet the needs of businesses in a variety of industries. What sets me apart is my ability to think strategically and troubleshoot complex problems with efficiency and creativity. I am passionate about staying up to date with the latest technologies and trends in networking, and I am committed to continuous learning and professional growth.

Experience

NETWORK ENGINEER II | CONNECTIVITY TECH SOLUTIONS | APRIL 2024 – PRESENT

- Deploy and configure network hardware, including routers, switches, firewalls, and wireless access points.
- Monitor network performance, troubleshoot issues, and optimize for maximum efficiency and reliability.
- Implement and maintain network security measures
- Collaborate with cross-functional teams to understand business requirements and integrate network solutions
- Communicate effectively with partners, tenants, and team members to ensure successful project delivery.
- Create and maintain comprehensive documentation related to network configurations, processes, and procedures.
- Manage Palo Alto firewall, Fortinet firewalls, Extreme Networks, and Cisco Systems
- Manage software integrations with Palo Alto, Extreme Networks, and other systems
- Manage WLAN implementations in multiple locations
- Managing the EDR capability of the organization including deployment of endpoint, resolution of Tier 1 and Tier 2 alerts, and reporting
- Completing and assisting with cybersecurity risk assessments of various enterprise and product-level applications, systems, and business processes
- Assisting with and drafting policies, procedures, and documentation to support the security program
- Regularly testing and monitoring security controls for effectiveness
- Assisting with vulnerability management, including review of the environment for vulnerabilities present, assessing the severity of the vulnerability in the environment, and working with IT and development teams to resolve the issue
- Researching and remaining up-to-date on key cybersecurity threats and vulnerabilities
Communicating and evangelizing security throughout the organization

NETWORK ENGINEER | BANKERS LIFE | OCTOBER 2023 – APRIL 2024

- Work with the network architectural function to support strategy and finalize low-level design.
- Prepare technical articles to be used in the operational area.
- Keeping informed of developments in network technologies and infrastructure.
- Provide technical guideline for the network environment (WAN, WLAN and LAN) and other TCP / IP network protocols (Firewall, proxy, smtp, DNS, DHCP, ethernet)

- Information security and security protocols (SSL/TLS, VPN, RADIUS, LDAP, VLAN , Multifactor Authentication)
- Assure Correct sizing, implementation, configuration, and monitoring of the network infrastructure.

NETWORK ENGINEER | DUKE ENERGY | FEBRUARY 2019 – OCTOBER 2023

- Oversee and support connectivity of all on-premises, cloud, and enterprise SaaS applications, working within other network product/platforms team and in partnership with service delivery organization
- Participate in day-to-day operations and troubleshooting efforts
- Act as a subject matter expert in network design, solution engineering, managing and overseeing the implementation and delivery of redundant, secure, and high performing network systems, infrastructure and related technologies.
- Review and establish documentation and procedural standards and ensure these standards are being met and documentation is being maintained.
- Experience with Cloud technologies including cloud-based firewalls, proxies and related technologies
- Deep expertise with LAN/WAN/SDN connected infrastructures including deep understanding of VXLANs, NATs and tunneling protocols
- Experience with automation of network devices (routers, switches, protocol mediation devices) using Ansible, Python, and other automation scripting tools.
- Knowledge in the areas of fault monitoring, capacity management, configuration management, and performance management
- Experience with complex routing and switching topologies in a Cisco environment, including ASR, Catalyst, and Nexus (NX-OS) equipment, using features such as ACI, OTV, OSPF, and BGP
- Experience with network management and monitoring tools such as Cisco DNA, Cisco Prime, SolarWinds
- Work with the Network Architecture team to implement solutions by participating in strategy discussions, providing feedback to designs, and suggesting opportunities for continuous improvement through day-to-day involvement in operations
- Monitor and manage the device lifecycle, including firmware maintenance, of all routers, switches, and wireless infrastructure

INFORMATION TECHNOLOGY INTERN | DUKE ENERGY | MAY 2018 – AUGUST 2018

- Provisioned Cisco devices for call centers, data centers and power generation facilities (NERC CIP).
- Deployed Cisco routers and distribution switches at new facilities following regional subnetting and IPv4 and IPv6 standards. Device models include Cisco ISR 4K and Catalyst 8K series.
- Configured switches, routers, and wireless APs
- Provisioned switches and routers in regulated (NERC CIP) and unregulated environments through the CLI using SecureCRT, Putty and Cisco DNA Center.
- Led small to large projects involving the expansion of Carolina's regional network.
- Managed wireless devices such as Cisco 9120 and 9130 wireless APs through the wireless Controllers.
- Defined scope of work through MOPs, Remedy tickets, Visio, and other documentation for field technician's guidance.
- Worked independently in an agile engineering environment on project-based work orders and assignments.
- Monitored network upgrades in management systems such as Bluecat, Solarwinds, Remedy, Cisco ISE, Sharepoint and JIRA

- Provided the highest level of network infrastructure reliability by following regional standards and minimizing SDE (service disruption events).

Education

B.S. IN INFORMATION TECHNOLOGY | NORTH CAROLINA A&T STATE UNIVERSITY

Skills & Abilities

- Accounting & Budgeting
- Proficient with POS systems
- Excellent interpersonal and communication skills
- Poised under pressure
- Experienced in most restaurant positions
- Fun and energetic
