

JASON MA

SENIOR SOFTWARE ENGINEER

213-723-1578 | jason1806515@gmail.com | Allen, TX

SUMMARY

Results-driven Senior Software Engineer with over 14+ years of experience in designing, developing, and deploying high-quality software solutions. Extensive expertise in Java and a strong track record of working with diverse tech stacks to build scalable and efficient applications. Adept at optimizing performance, and driving technical excellence, with full-stack development experience using modern JavaScript frameworks.

WORK EXPERIENCE

Senior Software Engineer, Taivara

Apr 2022 -

- Designed and developed **healthcare applications** and **enterprise e-commerce platforms**, focusing on patient records, analytics, order management, and payment processing.
- Architected and implemented distributed microservices using **Spring Boot**, **Kafka**, and **Docker**, improving system reliability and scalability.
- Designed **RESTful APIs** and optimized database interactions using **JPA/Hibernate**.
- Adopted **containerization** and **orchestration** with **Kubernetes**, streamlining deployments and improving resource utilization.
- Integrated **AWS services** (S3, Lambda, RDS) into cloud-based applications, enhancing availability and fault tolerance.
- Developed UI components using **React**, **Angular** and **Thymeleaf** for full-stack applications.
- Conducted in-depth **code reviews** and mentored junior engineers, fostering best practices in clean code and **SOLID principles**.
- Implemented **unit testing** and **integration testing**, ensuring software reliability and maintainability.

Senior Application Developer, Ingenious Results

May 2016 – Mar 2022

- Developed **retail** and **logistics applications**, including warehouse management, supply chain optimization, and inventory tracking systems.
- Built **healthcare solutions** focused on patient data management and compliance.
- Migrated monolithic applications to a **microservices** architecture, improving maintainability and deployment flexibility.
- Implemented **asynchronous messaging** using **RabbitMQ** and **Kafka**, enhancing system responsiveness and fault tolerance.
- Integrated third-party APIs and services, ensuring seamless interoperability and security compliance.
- Designed and optimized **SQL queries**, leveraging **PostgreSQL** and **MongoDB** to enhance database efficiency.
- Developed and maintained UI components with **React**, **Vue.js**, **JSF**, **Thymeleaf**, and **JavaScript**, ensuring seamless frontend-backend integration.

Software Developer, Sentara Healthcare

Aug 2010 – May 2016

- Developed and maintained **healthcare applications**, focusing on electronic medical records (EMR), patient portals, and insurance claim processing.
- Designed and developed **Java EE** applications using **Servlets**, **JSP**, and **JDBC**, ensuring adherence to healthcare compliance standards.
- Developed CRUD operations for **patient data management** using **JDBC** and **SQL**.
- Maintained and optimized **legacy Java applications**, improving performance and reducing technical debt.
- Worked with **HTML**, **CSS**, and **JavaScript** for front-end enhancements in healthcare applications.
- Assisted in debugging and resolving production issues, gaining hands-on experience in troubleshooting and system monitoring.

EDUCATION

Bachelor’s Degree in Computer Science | Carnegie Mellon University

SKILLS

Languages	Java (Expert), JavaScript (ES6+), TypeScript, Python, PHP, SQL
Backend	Spring Boot, Hibernate, RESTful APIs, Microservices, Kubernetes, Docker
Frontend	React, Angular, Vue.js, JavaServer Faces (JSF), Thymeleaf, Vaadin, JSP, HTML, CSS
Databases	PostgreSQL, MySQL, MongoDB
Cloud & DevOps	AWS, Azure, CI/CD (Jenkins, GitHub Actions), Terraform
Tools & Platforms	Git, Maven, Gradle, IntelliJ IDEA, JIRA, Agile/Scrum
Testing	Unit Testing, Test-Driven Development (TDD), JUnit, Mockito, Selenium
Other	System Architecture, Performance Optimization, Code Reviews
