

ANIL

FULL STACK JAVA DEVELOPER

Contact: +1 (940)209-0561 | Mail: aniljava4504@gmail.com

PROFESSIONAL SUMMARY:

- Over 5+ years of professional experience in comprehensive analysis, design, coding, testing in Java/J2EE development and developed various Web Applications and Enterprise applications using Java/J2EE platform.
- Experience in Designing, Architecture and Development of large-scale micro-services with competency in handling real time data driven application which involves the need to perform batch operations and messaging.
- Experience in working on Cloud Technologies like AWS, AZURE, GCP etc and proficient in working on streaming and messaging frameworks like Apache Kafka, RabbitMQ, ActiveMQ etc.
- Involved in different phases of Software Development Life Cycle (SDLC) like analysis, design, development, and testing.
- Hands-on experience with modern-day technology stacks like Java, Spring Boot, Event-Driven architecture with Kafka & micro services development, and public cloud technologies like AWS (ECS, EC2, S3 Bucket, RDS, Lambda, Cloud Watch, SNS).
- Extensive experience in design, development, and implementation of Microservices using Spring Boot and Angular 2.0 frameworks.
- Developed web tier components of web stores using Spring Web MVC framework that leverages Model View Controller (MVC) architecture.
- Good experience in setup and configuring continuous build processes using Maven, Ant, and Gradle.
- Experience in implementing persistence layers using Spring JPA, Hibernate, My Batis etc. for web-applications.
- Experience in implementing micro-services architecture using frameworks like REST Api's, Spring Boot etc.
- Experience in understanding and implementation of latest Java features and releases like Lambdas, Optional, Functional Interfaces, Stream API, Time API, Improvements on Collections, and concurrency.
- Designed and developed user-friendly GUI interface and web pages using HTML, HTML5, CSS3, LESS, SASS, Angular 8, 12 (TypeScript), jQuery, Nodejs and JavaScript.
- Fair experience in implementing Java, J2EE Design Patterns and Architecture Patterns.
- Experience with Ant/Maven for project build/test/deployment, Log4j and SLF4j for error logging and debugging, JUnit for unit and integration testing.
- Experience with Version Control Systems like Git, CVS, SVN (Subversion) and accrue.
- Experienced in deploying Web Application and configuring data source to IBM WebSphere, JBoss and servers like Tomcat.
- Experience in Agile Software Development using AGILE methodology including SCRUM.
- Expertise in automating test cases with Selenium Web Driver, Cucumber for web applications on both mobile and desktop, Junit for Java, and Jasmine/Karma for angular applications.

TECHNICAL SKILLS:

- Languages: Java, SQL/PL SQL, JavaScript, TypeScript
- Frameworks: Spring Boot, Spring MVC, Hibernate, JPA, MyBatis, JUnit, Jasmine
- Databases: Oracle, MySQL, SQL Server, MongoDB, DynamoDB
- Cloud/Tools: AWS, Azure, GCP, Maven, Git, SVN, IntelliJ, Eclipse, Postman
- Web Technologies: HTML5, CSS3, Angular (8/12), Node.js, jQuery
- Messaging/Servers: Kafka, RabbitMQ, ActiveMQ, Tomcat, JBoss, WebSphere
- Testing/Methodologies: Selenium, Cucumber, Agile (Scrum), Waterfall

EDUCATION DETAILS:

- Master's in advanced data Analytics from University of North Texas, Denton, TX, USA, May 2024.
- Bachelors in Math & Statistics from Vishwa Vishwani Business School, India, Apr 2020.

PROFESSIONAL EXPERIENCE

Client: Charter Communications -Spectrum, USA

Mar 2024 – Present

Sr. Java Full Stack Developer

Responsibilities:

- Involved in all phases of SDLC including requirements gathering, design, development, testing, and deployment.
- Worked in Agile methodology, participated in daily scrums, and provided status updates to stakeholders.
- Developed and deployed Microservices using Spring Boot, Node.js, Express, Docker, Jenkins, and AWS (EC2, ECS, OpenShift).
- Designed and developed UI components using React.js, Redux, AngularJS/Angular, HTML5, CSS3, JavaScript, TypeScript, jQuery, and Bootstrap.
- Built SPAs (Single Page Applications) in React, created reusable components, and applied Redux, Router, Animations, and Flux concepts.
- Implemented RESTful APIs, backend services with Spring Boot and Node.js, and integrated with MongoDB using Mongoose connector.
- Applied MVC and Dependency Injection with Spring Boot MVC; integrated persistence with Hibernate, JPA, and JDBC.
- Developed AWS solutions including CloudFormation templates, Auto Scaling, S3/Glacier storage, and migration of applications to AWS with cloud security.
- Implemented asynchronous processing using Apache Kafka producers/consumers and Elasticsearch for data indexing and search.
- Followed TDD practices, writing unit tests with JUnit, Mockito, PowerMock, Jasmine, Karma, and Mocha.
- Used design patterns (Singleton, Factory, Builder, Prototype) and SOA concepts with JAX-RS, JAX-WS, and JAXB.
- Conducted code reviews, prepared documentation, and created design diagrams, API specifications, and error descriptions.
- Used GitLab for version control, JIRA for issue tracking, and Jenkins pipelines for CI/CD automation.

Environment: Java 8/11, J2EE, Spring Boot, Spring MVC, Hibernate, JDBC, REST, Microservices, AWS, Docker, Kubernetes, Apache Kafka, Elasticsearch, React.js, Redux, Angular, Node.js, Oracle, MongoDB, CI/CD, GitLab, Jenkins, JIRA.

Client: Ameriprise Financial Services, LLC

May 2023 – Feb 2024

Sr. Java Full Stack Developer

Responsibilities:

- Worked in Agile/Scrum teams, participating in sprint planning, daily stand-ups, and TDD practices to deliver enterprise applications.
- Designed and implemented multi-tier architectures with J2EE patterns, Spring Boot, Spring MVC, and Microservices, ensuring scalability and maintainability.
- Built REST APIs and secured them using Spring Security (OAuth2), while also developing and consuming SOAP-based services with JAX-WS and JAX-RS.
- Integrated Spring Data JPA, Hibernate, and HikariCP for efficient database transactions with Oracle, MySQL, SQL Server, Cassandra, and DynamoDB.
- Developed responsive front-end applications using Angular 13/14, Vue.js, AngularJS, Bootstrap, HTML5, CSS3, JavaScript (ES6), and TypeScript.
- Created reusable Angular/React components and services, implementing routing, data binding, validation, and SPA features.
- Automated CI/CD pipelines using Jenkins, Git, Maven/Gradle, and OpenShift; deployed applications on AWS and Azure cloud environments.
- Implemented asynchronous messaging and event-driven architecture using Apache Kafka, RabbitMQ, and ActiveMQ.
- Designed and managed database schemas and worked closely with DevOps to monitor logs, performance, and application health using Splunk and Kafka.

- Wrote unit and integration tests using JUnit, Mockito, Selenium, Cucumber, Jasmine, and Karma to ensure code quality.
- Leveraged design patterns (Singleton, Factory, Builder, Prototype) to improve code reusability and maintainability.
- Developed dynamic and responsive UI/UX features with Angular animations, AJAX, and form validation techniques.
- Conducted code reviews, prepared API documentation with Swagger/OpenAPI, and collaborated with cross-functional teams to resolve issues.
- Automated builds and deployments, reducing manual effort and ensuring faster delivery cycles.

Environment: Java 11, J2EE, Spring Boot, Spring MVC, Hibernate, REST, SOAP, Angular 13/14, Vue.js, AngularJS, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Oracle, MySQL, Cassandra, DynamoDB, Node.js, Kafka, RabbitMQ, ActiveMQ, Jenkins, Git, OpenShift, AWS, Azure, Selenium, Cucumber, JUnit, Splunk, JIRA.

Client: Ezetap, India

May 2019 – July 2022

Role: Java/J2EE Developer

Responsibilities:

- Participated in the initial analysis and design phase, developing specifications including Use Cases, Class Diagrams, Sequence Diagrams, and Activity Diagrams.
- Implemented React JS Controllers for managing view data in the client's UI. Designed and developed the front-end using HTML, CSS, ES6, jQuery, React JS, and Redux, ensuring browser accessibility and compatibility.
- Published and consumed Web Services using SOAP and WSDL, deploying them on the WebLogic server. I also worked on RESTful web services for enhanced system integration.
- Developed services using microservices architecture with Spring Boot, facilitating interactions through REST.
- Gained proficiency in cloud-based DevOps practices, particularly using Terraform and OpenShift.
- Developed a User Experience Model complete with screens and navigation maps. Created Sequence, Collaboration, and Activity diagrams utilizing UML.
- Developed user interfaces for the policy owner module using JSPs, Struts Tag Library, and the Tiles framework.
- Created necessary Data Access Objects (DAOs) for the policy owner module to handle database interactions effectively.
- Built the application on MVC architecture, with JSP, CSS, HTML, and DHTML as the presentation layer and Struts framework as the business layer.
- Developed SPAs by consuming RESTful Web Services, enhancing the application's interactivity and responsiveness.
- Performed client-side and server-side validations using Struts. Configured Struts Validator for action form beans validation.
- Transitioned from a monolithic application running on JBoss to a suite of microservices using Spring Boot and Node.js.
- Developed web pages using JSP and Struts tags and implemented the application using Struts MVC. This involved creating action classes for the Struts framework and configuring Struts configuration files.
- Utilized JavaScript for client-side validation to enhance user interaction and data integrity.
- Crafted SQL queries and procedures for the MS SQL Server database to manage data effectively.
- Implemented Java classes corresponding to Struts Actions, playing a critical role in the back-end development of the application.

Environment: Java, J2EE, Spring Boot, Struts, JSP, Servlets, ReactJS, Redux, HTML5, CSS3, ES6, JavaScript, jQuery, DHTML, SOAP, REST, WSDL, WebLogic, JBoss, Node.js, Terraform, OpenShift, UML, MS SQL Server.
