Executive Summary

QA Automation Engineer with 7+ years of building automation frameworks and test development experience, specializing in Java, JavaScript, Selenium, Appium, RestAssured, ReadyAPI, PostMan, and SQL. Skilled in cross-platform automation frameworks with solid background in test design and computer science, delivering scalable quality solutions across streaming, mobile, and enterprise platforms.

Core Competencies

Programming Languages: Java, Groovy, JavaScript, SQL

Test Engineering: Selenium, Appium, Playwright, TestNG, JUnit, ReadyAPI, Postman, Charles Proxy, RestAssured, Page Object Model, Flow Model Pattern, System Design Patterns

Continuous Integration/Deployment: Jenkins, GitHub Actions, GitHub, CI/CD Pipelines, Shift Left Testing

Platforms & Tools: Web, Android Mobile, Android TV, iOS, Apple TV, Roku, AWS, IntelliJ, Eclipse, Android Debug Bridge, JIRA, TestRail

Analytics & Data: Adobe Experience Platform, Customer Journey Analytics, SQL Query Service, Data Validation, Streaming Analytics

Soft Skills: Proactive Communication, Attention to Detail, Cross-functional Collaboration, Mentoring, Talent Acquisition, Agile Methodologies

Automation Specialties: UI Automation, API Automation, Analytics Testing, Framework System Design, Multi-platform Testing

Professional Experience

Senior Analytics QA Engineer -- Analytics Automation

September 2021 - June 2025

Paramount | Remote

Led comprehensive QA for analytics systems across Paramount Plus, managing Web, Android Mobile, Android TV, iOS, Apple TV, Roku, Sky TV platforms. Promoted to lead automation engineering,

architecting scalable frameworks and managing global team across international markets.

- Performed manual and automated testing for analytics tracking beacons on streaming media platform Paramount Plus across many platforms, with a focus on Web, Android TV, Android Mobile, and iOS
- Architected automation frameworks for analytics QA on streaming app Paramount Plus using Java, Selenium, Appium, TestNG, Maven, JUnit reducing manual testing by 60%
- Leveraged CoPilot AI to expedite automated test case development and framework creation, building hundreds of reliable test cases, mostly on Web and Android Mobile platforms
- Cut test execution times by 57% through multi-thread execution implementation
- Improved Android platform quality confidence by 25-30% via build verification testing
- Implemented CI/CD pipelines using Jenkins and GitHub Actions with Shift Left approach
- Utilized SQL and Adobe Experience Platform Query Service to build complex data validation queries, ensuring analytics data integrity across streaming events and user behavior tracking
- Utilized Adobe Experience Platform (AEP) and Customer Journey Analytics (CJA) to create complex dashboards that visualized streaming data and provided insight into user engagement and performance metrics

Senior Test Engineer -- Insurance and Airline Domains

January 2018 - August 2021

Coforge | Honolulu, HI and Columbus, GA (Contract)

Led comprehensive QA for critical insurance and airline applications ensuring regulatory compliance.

- Performed manual and automated testing for both UI and API sides
- Developed automated test suites using Selenium/Appium reducing regression testing costs by 60%
- Developed automation framework and automated test cases for release of Native Mobile app for Airline industry
- Performed API testing using Postman/ReadyAPI validating transaction processing systems
- Led UAT coordination with stakeholders validating workflows and regulatory compliance

Education & Certifications

Bachelor of Science in Applied Computer Science, Minor in Global General Business

Troy University | 2017

Professional Certifications

- JSE Certified Entry-Level JavaScript Programmer (October 2025)
- ISTQB Foundation Level (April 2024)
- AWS Cloud Practitioner (May 2024)
- Oracle Java SE 8 (December 2020)
- CMAP Certified Mobile Tester Foundation Level (January 2019)
