

Juan F. Polanco Morales

Brooklyn, NY | 732-397-1654 | juan@webappn.com | <https://www.linkedin.com/in/juanpolanco1/>

PROFESSIONAL SUMMARY:

- Full Stack Java Developer with 3+ Years of hands-on experience building and deploying secure, data-driven web applications across retail, e-commerce, and enterprise cloud environments.
- Skilled in designing dynamic, responsive frontends using Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, and Bootstrap, focusing on clean UI, reusability, and performance.
- Experienced in backend engineering with Java, Spring Boot, Hibernate, RESTful APIs, and Microservices, delivering scalable business logic and seamless integration across layers.
- Well-versed with relational and NoSQL databases such as SQL Server, MongoDB, MySQL, and IBM DB2, handling schema design, stored procedures, and data optimization.
- Strong exposure to cloud platforms and DevOps tools, including AWS, Azure Cloud Services, Pivotal Cloud Foundry, Jenkins, Docker, and Git, ensuring smooth CI/CD automation and deployment.
- Familiar with production monitoring, troubleshooting, and alerting through Splunk, New Relic, ServiceNow, PagerDuty, and SAS, ensuring application reliability and uptime in live environments.

TECHNICAL SKILLS:

- **Languages:** Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, JSON
- **Frontend Development:** Angular, Bootstrap, CSS, jQuery, AJAX, Responsive Design
- **Backend Development:** Java, Spring Boot, Spring MVC, Hibernate, JSP, Servlets, JDBC, RESTful APIs, Microservices, RabbitMQ
- **Databases:** SQL Server, MongoDB, MySQL, IBM DB2, Oracle
- **Cloud Platforms:** AWS (EC2, S3), Azure Cloud Services, Pivotal Cloud Foundry (PCF)
- **DevOps & CI/CD:** Jenkins, Docker, Git, GitHub Actions, Maven, CI/CD Pipelines
- **Monitoring & Logging:** Splunk, New Relic, ServiceNow, PagerDuty, SAS
- **Testing & QA:** JUnit, Postman, Unit and Integration Testing
- **Tools & IDEs:** IntelliJ IDEA, Eclipse, VS Code, Postman, Jira, Confluence
- **Development Practices:** Agile Scrum, SDLC, TDD, Version Control, Code Reviews, Pair Programming

EDUCATION:

- Bachelor of Science in Computer Engineering | New Jersey Institute of Technology – Newark, NJ | May 2017

PROFESSIONAL EXPERIENCE:

GAP Inc. – San Francisco, CA

Full Stack Java Developer

Jan 2022 – Present

- Worked as part of the inventory application development team supporting multiple web platforms across regions. Built and optimized web applications that helped streamline order processing, product management, and distribution.
- Developed interactive and responsive Angular components integrated with Java Spring Boot APIs for live product catalogs and sizing systems for merchandise organization directed towards distribution centers.
- Designed and implemented RESTful APIs using Spring Boot to manage product details, and user authentication modules to allow specific access for each brand under the Gap umbrella.
- Improved backend performance by optimizing Hibernate entities, fine-tuning SQL Server queries, and applying indexing strategies.
- Implemented RabbitMQ to manage asynchronous communication between microservices, ensuring real-time order and inventory updates.
- Deployed applications to Azure App Services, while leveraging Pivotal Cloud Foundry (PCF) for staging environments.
- Configured and maintained CI/CD pipelines with Jenkins and Docker, automating builds, tests, and deployments.
- Monitored system health and performance using Splunk and New Relic, integrating alerts with ServiceNow and PagerDuty.

- Collaborated with UX designers and business analysts in Agile sprints to align technical solutions with business-user requirements.
- Conducted unit and integration testing using JUnit and Postman, ensuring smooth release cycles and high-quality deliverables.

Environment: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Java, Spring Boot, Hibernate, RESTful APIs, Microservices, RabbitMQ, SQL Server, MongoDB, IBM DB2, Azure App Services, Pivotal Cloud Foundry, Jenkins, Docker, Git, Maven, Postman, JUnit, Splunk, New Relic, ServiceNow, PagerDuty, SAS, Agile Scrum

PROGRAMS & TRAINING:

Full Stack Java Developer Bootcamp – DevMountain Technologies | Oct 2019 – Feb 2021:

Completed a comprehensive bootcamp program focused on full-stack application development using Java, Spring Boot, Angular, and SQL. Gained practical knowledge of modern web technologies through project-based learning and team collaborations. The training emphasized object-oriented programming, REST API creation, cloud deployments (AWS, Azure), and frontend development with HTML, CSS, JavaScript, and Bootstrap. Learned to apply Agile practices, CI/CD using Jenkins, and Git-based collaboration while building real-world project prototypes for e-commerce and data management applications.
