

Junaid Mohammad | Full Stack Developer

junaid@myjobinbox.com | +1 (341) 900-6223 | Sunnyvale, CA | [LinkedIn](#) | [GitHub](#)

Summary

Experienced Full Stack Developer with 4+ years of expertise in designing, developing, and maintaining scalable web applications and cloud-native solutions. Proficient in both frontend and backend technologies, skilled at building secure, high-performance APIs and responsive user interfaces. Adept at collaborating with cross-functional teams to deliver reliable, data-driven features while ensuring compliance with industry standards. Strong focus on optimizing application performance, implementing CI/CD pipelines, and integrating emerging technologies to drive innovation and enhance user experience.

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, HTML5, CSS3, SQL
- **Frameworks & Libraries:** Spring Boot, React, Node.js, Express.js, Bootstrap
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud & DevOps:** AWS, Microsoft Azure, Azure DevOps, Jenkins, Docker, Kubernetes, Terraform
- **API & Security:** RESTful APIs, GraphQL, JWT Authentication, OAuth, Role-Based Access Control (RBAC), GDPR, SOC 2 compliance, CORS
- **Testing & CI/CD:** JUnit, Mockito, Selenium, Automated Testing, Continuous Integration/Continuous Deployment, Cypress
- **Frontend Tools & Practices:** Responsive Design, Cross-Browser Compatibility, Webpack, Babel, ESLint
- **Backend Practices:** Microservices architecture, Asynchronous Processing, Event-driven Architecture, Performance Optimization
- **Monitoring & Analytics:** Observability, Telemetry, A/B Testing, Application Performance Monitoring (APM) tools
- **Version Control & Collaboration:** Git, GitHub, GitLab, Agile Methodologies, Code Reviews
- **Machine Learning Integration:** Embedding ML models for fraud detection, financial classification, predictive analytics, user behavior analysis

Professional Experience

Full Stack Developer, Stripe

02/2024 – Present | Remote, USA

- Build and maintain full stack applications that integrate financial data services with modern web interfaces, enabling users to access secure, real-time insights while inserting machine learning to drive automation, personalization, and predictive intelligence.
- Collaborate with cross-functional teams, including machine learning engineers, designers, and product managers, to develop features that integrate AI models into production systems, focusing on fraud detection, financial classification, and user behavior analysis.
- Design and optimize cloud-native microservices, leveraging tools like Docker, Kubernetes, and AWS to support scalable, resilient infrastructure that enables real-time AI-driven data processing and high-throughput API traffic.
- Implement secure and compliant APIs, handling sensitive financial data while adhering to industry regulations such as GDPR and SOC 2, and ensuring responsible data handling for downstream machine learning applications.
- Develop intuitive, responsive front-end applications using technologies like React and TypeScript, incorporating AI-powered visualizations, analytics, and user feedback tools to support personal finance, lending, and banking use cases.
- Monitor and improve application and ML model performance, using observability tools, A/B testing, and telemetry data to ensure reliability, low latency, and high accuracy in user-facing features and backend services.
- Contribute to a high-impact engineering culture, engaging in code reviews, technical discussions, and internal knowledge-sharing initiatives, while staying current with emerging trends in financial technology, full stack development, and applied machine learning.

Associate Full Stack Developer, *Xinthe Technologies*

01/2020 – 08/2022 | Remote, India

- Architected and implemented a highly scalable CRM system for sales operations leveraging Java, Spring Boot, and MySQL, complemented by a responsive frontend using HTML5, CSS3, and vanilla JavaScript, resulting in streamlined sales workflows.
- Designed and developed robust, secure RESTful APIs capable of handling concurrent requests with a 30% reduction in response latency through optimized backend logic and asynchronous processing.
- Enhanced database efficiency by implementing advanced indexing strategies and query optimization, achieving sub-200ms query latency across datasets exceeding records.
- Worked on A/B testing initiatives on UI/UX components, driving a 20% boost in user engagement and improving overall customer satisfaction metrics.
- Established a comprehensive automated testing framework using JUnit and Mockito, attaining 90% code coverage and significantly reducing production defects by 40%.
- Integrated industry-standard security measures including JWT-based authentication and Role-Based Access Control, ensuring secure and compliant access management.
- Spearheaded the development and maintenance of CI/CD pipelines with Jenkins, accelerating deployment cycles by 50% and enabling rapid feature releases.
- Orchestrated seamless deployment and management of the CRM application on Microsoft Azure via Azure DevOps, ensuring high availability with uptime and robust disaster recovery protocols.

Projects

AI-Powered Fraud Detection Platform

- Developed scalable microservices with Java Spring Boot and Node.js, integrating ML models for real-time fraud detection, deployed on AWS with Docker and Kubernetes for high availability.
- Built secure React dashboards with JWT authentication and role-based access, providing fraud analysts with actionable insights while ensuring GDPR compliance.

Personal Finance Management Web App with Predictive Insights

- Created a full stack React and Spring Boot app integrating ML-driven personalized financial recommendations and predictive analytics.
- Optimized REST APIs for performance, implemented CI/CD pipelines with Jenkins and Azure DevOps, and improved user engagement through A/B testing.

Education

Master of Science in Computer Science

William Jessup University

10/2022 – 08/2024 | San Jose, California, USA
