

Jyothika Vempatapu

SOFTWARE ENGINEER

Tampa, FL | jyothika@careerattainment.com | +1 (813) 777 3325 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in developing scalable, high-performance applications. Proficient in Java, Python, C++, JavaScript/TypeScript, Go, and frameworks including Spring Boot, Hibernate, FastAPI, Flask, Node.js, React.js. Experienced in API design, microservices, cloud integration (AWS), CI/CD, and database optimization. Skilled in improving system performance, reducing defects, and delivering reliable software in Agile environments.

TECHNICAL SKILLS

Programming Languages:	Java, Python, JavaScript/TypeScript, C++, SQL, Go
Frameworks & Libraries:	Spring Boot, Hibernate, FastAPI, Flask, Node.js, React.js, Express.js
Backend Development:	RESTful & GraphQL API Design, Microservices Architecture, Asynchronous Programming, Multithreading, Caching (Redis, Memcached), Message Queues (Kafka, RabbitMQ)
Frontend Development:	HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI Design, State Management (Redux)
Database Systems:	MySQL, PostgreSQL, MongoDB, Cassandra, Redis, Oracle DB
Cloud & DevOps:	AWS (EC2, Lambda, S3, RDS, ECS), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD Pipelines
System Design & Architecture:	Scalable System Design, Load Balancing, Caching Strategies, Design Patterns (SOLID, MVC)
Testing & Quality Assurance:	JUnit, Mockito, PyTest, Selenium, Postman, Test-Driven Development (TDD), Code Reviews
Security & Authentication:	OAuth2, JWT, SSL/TLS, API Security, Role-Based Access Control (RBAC), OWASP Top 10 Practices
Version Control & Collaboration:	Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Agile (Scrum/Kanban)
Additional Tools & Technologies:	Linux/Unix, Bash Scripting, Nginx, ELK Stack, Prometheus, Grafana, API Documentation (Swagger/OpenAPI)

PROFESSIONAL EXPERIENCE

Software Engineer | HCL Tech, USA | Jul 2025 – Present

- Designed and developed scalable Java and Python applications, increasing enterprise user capacity by 20%, improving system throughput and reliability.
- Delivered 90% of sprint features on schedule by actively collaborating with Agile teams across 4+ complex cross-functional projects, accelerating time-to-market.
- Conducted thorough code reviews and integrated automated testing pipelines, reducing production defects by 16% year-over-year and improving code maintainability.
- Optimized application performance, reducing page load times by 25% through targeted database query tuning and algorithm enhancements, elevating user experience.
- Integrated AWS cloud services and implemented cloud infrastructure best practices, achieving 99.9% uptime for critical client-facing applications.
- Authored technical documentation and user guides, shortening new engineer onboarding time by 30% and facilitating faster team ramp-up.
- Diagnosed and resolved 50+ critical high-priority incidents, ensuring timely SLA compliance and minimal system downtime in mission-critical environments.
- Monitored real-time application metrics and proactively addressed 10+ bottlenecks, significantly improving system stability and reducing user complaints.

Software Engineer Intern | Coforge, USA | Jan 2025 – Jun 2025

- Assisted in the development and testing of microservices and REST APIs, contributing to a 10% improvement in system reliability and deployment stability.
- Automated QA workflows using Selenium and PyTest tools, increasing test coverage for core modules by 20%, and expediting regression testing.
- Supported Agile sprint cycles by collaborating with product owners and developers, helping the team achieve 95% on-time task completion across 2 key internal projects.
- Enhanced version control practices in Git, reducing code merge conflicts by 30% and improving branch management efficiency.
- Conducted security audits on new code, identifying and mitigating 5+ high-risk vulnerabilities prior to production release, supporting secure software delivery.

Software Engineer | TCS, India | Feb 2021 – Jul 2023

- Developed and maintained Java-based backend solutions for 12+ BFSI and retail projects, delivering systems with 98% uptime and high transaction throughput.
- Analyzed and translated business requirements into scalable technical designs, enabling successful delivery and launch of 5+ major product features meeting client needs.
- Refactored legacy modules, reducing processing time by 18%, enhancing system responsiveness, and contributing to measurable user satisfaction improvement.
- Led integration of multiple third-party APIs, shortening partner delivery cycles by 12% and improving overall system interoperability.
- Coordinated comprehensive system and unit testing phases, achieving a 97% pre-release bug resolution rate, ensuring high-quality deployments.
- Automated build and deployment pipelines using Jenkins CI/CD, reducing manual deployment time by 40% and improving release consistency.

EDUCATION

Master of Science: Cybersecurity | University of South Florida, USA | Aug 2023 – May 2025

Bachelor of Technology: Computer Science | Velagapudi Ramakrishna Siddhartha Eng. College, India | Aug 2019 – May 2023

CERTIFICATIONS

- CompTIA Security+ (ce) | Issued Mar 2025
- Cisco Certified Network Associate (CCNA) – Cisco
- PCAP: Certified Associate in Python Programming – Cisco Networking Ac
