Work Experience:

Name of organization: Sanctity International USA

Feb 2025 – Till Now

Project Name: Banking Domain

Client: Capital One

Role: Salesforce Developer

Project Description:

Working as a Salesforce Developer on the Banking Domain project for Capital One, focusing on implementing and customizing Salesforce solutions for enhanced banking operations. Responsibilities included designing and developing custom Lightning components, integrating third-party systems, optimizing workflows, and leveraging Apex and Visualforce to deliver solutions that improved user experience, automation, and efficiency in banking services.

Roles & Responsibilities:

- Developed and customized Salesforce Lightning Components and Visualforce pages to enhance user experience and meet specific banking needs.
- Write Apex classes, triggers, and batch processes to automate and streamline banking workflows.
- Ensured data integrity by implementing data validation, triggers, and batch Apex processes for data synchronization between Salesforce and Capital One's internal systems.
- Optimized data migration strategies and led efforts to migrate legacy banking data to Salesforce, ensuring minimal disruption to banking operations.
- Created and maintained custom reports and dashboards to provide actionable insights into banking performance, customer interactions, and operational efficiency.
- Developed real-time financial and transaction reporting to help management make data-driven decisions in the banking domain.

Name of organization: Salesforce Hyderabad
