SUMMARY

Accomplished full-stack developer with a proven track record of delivering innovative and scalable solutions across industries such as e-commerce, hospitality, IoT, and enterprise systems. With expertise in React.js, Node.js, Vue, JavaScript, TypeScript and modern cloud technologies, I specialize in designing intuitive user experiences, developing robust backend systems, and integrating secure APIs.

I excel in collaborating with cross-functional teams, adhering to agile practices, and mentoring junior developers to elevate team performance.

Known for a focus on performance optimization, accessibility, and security, I consistently deliver solutions that align with both user needs and business objectives.

SKILLS

React · Redux · Next · React Native · Vue · Nuxt · Angular · JavaScript · TypeScript · Node · Express · NestJS · RESTful API · GraphQL · MySQL · PostgreSQL · MongoDB · Firebase · Redis · Jest · Mocha · Cypress · Playwright · AWS · Azure · GCP · Docker · Jenkins · Kubernetes · Agile · Git

STRENGTHS

- **Quick Learner**
- **Strong Problem Solving**
- **Highly Organized and Self-Disciplined**
- **Effective Communicator**
- **Detail-Oriented and Precision-Focused**

EDUCATION

California State University, Stanislaus

Bachelor's Degree in Computer Science

09/2012 - 05/2016

Kao Moua

Senior Full Stack Engineer

EXPERIENCE

Brookstone

Merrimack, NH

Senior Software Engineer

05/2022 - 12/2024

- Collaborated with a cross-functional team to design and develop a comprehensive e-commerce platform tailored for Brookstone's unique product catalog, focusing on an intuitive user experience that allowed customers to easily explore and purchase products.
- Built interactive and dynamic product pages using React.js, integrating live search, filtering, and categorization features to streamline product discovery for customers.
- Developed robust backend systems in Node.js, including microservices to handle critical tasks such as payment processing, order management, and user authentication, ensuring seamless operations.
- Integrated third-party APIs to provide features like real-time inventory tracking, shipping status updates, and promotional notifications, enhancing the shopping experience for customers.
- Worked closely with UX/UI designers to ensure that web interfaces were mobile-responsive and accessible, adhering to WCAG standards to accommodate users with different needs.
- Conducted rigorous testing and debugging to maintain high application stability and collaborated with the DevOps team to deploy applications using CI/CD pipelines.

Metova

Benton, AR

Full Stack Engineer

04/2019 - 02/2022

- Played a key role in the development of custom software solutions for diverse industries, leveraging modern frameworks and tools to meet client-specific needs, including healthcare, retail, hospitality, and IoT applications.
- Designed and implemented scalable RESTful APIs using TypeScript and Express.js, enabling real-time communication and data synchronization between IoT devices and cloud platforms.
- Led the modernization of legacy software systems by migrating codebases to modern frameworks and enhancing their performance and maintainability, ensuring long-term scalability for clients.
- Spearheaded the development of a PWA for a client, enabling seamless offline functionality and improved user engagement through faster load times.
- Acted as a key advocate for agile methodologies, organizing sprint planning meetings and facilitating daily standups to ensure alignment across teams, resulting in consistent delivery of high-quality work within tight deadlines.

McDonald's

Chicago, IL

Full Stack Developer

05/2016 - 02/2019

- Contributed to the development of McDonald's global loyalty program by designing and implementing a scalable web platform that seamlessly handled user registration, reward redemption, and real-time updates for millions of customers worldwide.
- Automated critical restaurant operational workflows, including supply chain monitoring and order management, by creating custom dashboards and backend solutions that replaced manual processes.
- Built integrations with third-party delivery platforms, such as Uber Eats and DoorDash, using secure API integrations to streamline order synchronization and reduce errors in real-time order processing.
- Implemented a comprehensive authentication and authorization system to ensure secure access for users, utilizing OAuth 2.0 protocols and role-based access control for enhanced data protection.
- Played a significant role in optimizing website performance by restructuring code, enabling faster load times, and ensuring consistent user experiences across desktop and mobile devices.
- Collaborated with product managers and business stakeholders to gather requirements and translate them into technical specifications, delivering solutions that aligned with McDonald's strategic objectives.
