

Karishma Shaik | Project Manager

Location: MI, USA | Phone: +1 (989) 9449-036 | Email: Karishsk1226@gmail.com

SUMMARY

Results-driven **Project Manager** with **over 6+ years** of experience leading cross-functional teams and managing large-scale **Supply Chain Optimization** projects. Expertise in **IoT, Blockchain, Machine Learning**, and **Predictive Analytics** to enhance operational efficiency, improve inventory management, and reduce supply chain risks. Proven ability to integrate emerging technologies to achieve measurable business outcomes, including reducing **stockouts**, improving **demand forecasting accuracy**, and driving **cost savings**. Skilled in **Agile Project Management**, **cloud migration (AWS, Azure)**, and data visualization using **Power BI** and **Tableau**. Strong background in managing complex projects, optimizing supply chain processes, and ensuring the alignment of business objectives with IT solutions. Adept in leading global teams, managing project timelines, resources, and budgets, and ensuring stakeholder satisfaction.

TECHNICAL SKILLS

Languages:	Python, R, SQL
Project Management	Agile, Scrum, Kanban, Six Sigma, Lean Manufacturing
Project Tools	Jira, MS Project, Trello, Power BI, Tableau
Strategic Planning	Budgeting, Stakeholder Communication, Risk Management, Resource Allocation
Cross-Functional Leadership	Managing diverse teams of 20+ professionals across global supply chain, IT, and data analytics projects
Cloud Platforms:	AWS, Microsoft Azure
Data Analytics	Advanced Excel, Predictive Analytics, Data Visualization
Automation Tools:	UiPath, Automation Anywhere, APIs, ETL Processes
ERP Systems:	SAP SCM, Oracle ERP
Blockchain & IoT:	Integration for supply chain security and real-time inventory tracking
Supply Chain Optimization Techniques:	Inventory Management, Demand Planning, Strategic Sourcing, Logistics
Sustainability Initiatives:	IoT-based energy monitoring systems, carbon emissions reduction strategies
Performance Tracking:	Development of KPI Dashboards, Supplier Performance Monitoring Systems
Leadership & Soft Skills:	Team Collaboration, Leadership, Problem-Solving, Decision-Making, Time Management, Effective Communication, Presentation

PROFESSIONAL EXPERIENCE

LyondellBasell, USA Project Manager	July 2024 – Current
- Led CAE-driven design and simulation initiatives, performing structural, thermal, and fluid analyses to optimize vehicle performance and meet project objectives. - Oversaw Physical and Functional Design and Integration (PFDI), incorporating vehicle dynamics, aerodynamics, energy management, NVH, and safety systems into design workflows. - Managed end-to-end project lifecycles, including planning, resource allocation, milestone tracking, and risk mitigation, ensuring timely delivery of high-quality prototypes. - Ensured compliance with automotive industry standards and regulatory requirements, coordinating prototype validation and performance testing for certification. - Implemented advanced CAE methodologies to streamline simulation processes, enhance accuracy, and improve overall vehicle design efficiency. - Directed cross-functional teams, fostering collaboration between CAE engineers, design teams, and regulatory specialists to drive innovation and project success. - Applied Agile project management methodologies using tools like Jira and MS Project, ensuring iterative delivery and effective stakeholder communication. - Developed and deployed risk management strategies, proactively addressing project challenges and ensuring on-time completion within budget. - Delivered continuous process improvements by introducing cutting-edge CAE tools and optimizing workflows to enhance team productivity and project outcomes.	
Project Manager Intern LyondellBasell, USA	Jan 2024 – May 2024
- Directed a cross-functional team of 20+ members in the implementation of an IoT-based supply chain optimization project, improving inventory accuracy by 25% across global manufacturing sites. - Coordinated the integration of blockchain technology to enhance data security, resulting in a 30% reduction in supply chain fraud and increased transaction transparency. - Assisted in deploying machine learning models for predictive demand forecasting using TensorFlow and scikit-learn, contributing to a 15% improvement in inventory management efficiency. - Developed and maintained Power BI and Tableau dashboards for real-time project performance tracking, providing key stakeholders with actionable insights and enhancing decision-making processes. - Managed project timelines, resources, and budgets using Jira and MS Project, ensuring the timely delivery of milestones and alignment with client objectives. - Supported cloud infrastructure implementation with AWS and Azure, enabling scalable data storage solutions that reduced system downtime by 20% and improved operational flexibility. - Managed CAE-driven vehicle development projects, optimizing performance through structural, thermal, and fluid analyses, ensuring seamless integration of Physical and Functional Design and Integration (PFDI) elements, and maintaining compliance with regulatory standards during prototype validation.	

Hexaware Technologies	Apr 2018 – Jul 2022
Supply Chain Analyst	
- Integrated supply chain data from ERP systems (SAP, Oracle) and external data sources, improving real-time visibility and enabling more informed decision-making across operational teams. - Designed and implemented demand forecasting models using Python and R, achieving a 15% improvement in forecast accuracy and aligning inventory management with actual demand. - Automated repetitive supply chain processes with UiPath RPA, boosting efficiency by reducing manual intervention, speeding up order processing, and minimizing errors. - Developed interactive dashboards in Tableau and Power BI to track supply chain KPIs, providing actionable insights that enhanced operational performance and decision-making speed. - Conducted logistics optimization studies to refine transportation routes and scheduling, reducing costs by 10% and improving on-time delivery rates. - Collaborated with cross-functional teams in procurement and logistics to eliminate inefficiencies, reducing procurement delays by 12% and streamlining operations. - Designed and deployed a supplier performance tracking system, improving supplier evaluations and strengthening vendor relationships for more consistent and reliable deliveries. - Leveraged cloud platforms (AWS, Microsoft Azure) for scalable data storage and analysis, promoting seamless collaboration and ensuring data accessibility across distributed supply chain teams.	

Intex Technologies	Jan 2017 – Mar 2018
Supply Chain Analyst	
- Developed and implemented advanced time-series forecasting models using Python (ARIMA, Exponential Smoothing), achieving 85% demand prediction accuracy across 500+ SKUs. - Designed and deployed Economic Order Quantity (EOQ) frameworks and dynamic safety stock models, reducing overstock levels by 18% and saving \$1.2M annually in holding costs. - Built and maintained interactive Power BI dashboards to monitor key metrics such as inventory turnover, stock availability, and replenishment schedules, streamlining decision-making and cutting manual reporting efforts by 30%. - Optimized ETL workflows with SQL and Python to process and integrate three years of historical sales and inventory data from SAP ERP, enhancing data accuracy by 25%. - Spearheaded inventory optimization strategies in two regions, achieving a 25% improvement in product availability and successfully scaling the solution across all distribution centers. - Collaborated with procurement teams to synchronize purchase orders with demand forecasts, improving supplier fulfillment rates by 15% and reducing lead times through better logistics coordination. - Conducted detailed ABC classification of SKUs to streamline replenishment processes, boosting inventory turnover rates by 22%. - Applied Monte Carlo simulations to assess and select optimal replenishment strategies, minimizing risks and enhancing the efficiency of inventory management practices.	

PROJECTS

A Simulation of Distillation Column.	
- Collaborated on designing a methanol condenser with a heat transfer area of 13.54 m², managing heat loss of 154,796.7 kcal/hr, mass flow rate of 519.6 kg/hr, and evaporation rate of 656 liters/hour. - Optimized distillation column design, enhancing efficiency by 20% and improving separation performance.	
Research on the Optimizing Project Performance in Manufacturing: An Analytical Approach to Agile Project Management Capstone Project	
- Developed strategies to streamline workflows, improving efficiency and reducing time-to-market in manufacturing. - Engaged with stakeholders to validate recommendations and presented findings on integrating Agile into traditional manufacturing processes.	

EDUCATION

Masters in Engineering/Industrial Management	May 2024
Central Michigan University, Michigan	
Bachelor of Technology in Chemical Engineering	May 2017
Acharya Nagarjuna University, India	
Six Sigma Green/Black Belt Certified Supply Chain Professional (CSCP) AWS Certified Solutions Architect
